

MIRAL GALA

Business & Strategy Analyst | Data-Driven Insights | SQL, Tableau, Python

+15519987278 | gmiral.mg@gmail.com | [LinkedIn](#) | Jersey City, NJ | [Tableau public profile](#)

SUMMARY

Business Analyst with 5+ years of experience in business performance analysis, KPI monitoring, and system implementation. Adept at leading cross-functional teams through the SDLC and managing Agile workflows using JIRA. Demonstrated leadership in driving cross-departmental initiatives, aligning stakeholders, and mentoring junior analysts to ensure project success. Proficient in SQL, Python, Tableau, and Confluence for data analysis, dashboarding, and process optimization. Delivered \$4.8M in cost savings and improved operational efficiency through data-driven decision-making and strategic planning.

EXPERIENCE

Assistant Manager, Business & Strategy Analyst

Gurgaon, India

Hyundai Motors India Limited

12/2021 - 10/2022

- Led cross-functional development of Hyundai's Charging Management System (CMS) application, managing the end-to-end **SDLC**, defining 100+ business requirements, coordinating with 3 IT vendors, and delivering a scalable EV platform adopted by 10,000+ users across India.
- Built executive Tableau dashboards to visualize key performance metrics (cost, mass, performance, timeline), reducing report turnaround time by 30% and improving cross-departmental transparency, thereby increasing profitability by \$500K.
- Led Agile ceremonies including sprint planning, backlog grooming, and UAT using JIRA, driving alignment across business and tech teams for CMS upgrades; achieved 95% sprint velocity and reduced delivery delays by 40% through proactive stakeholder collaboration.
- Developed data-backed mid-term and long-term business strategies for contributing to a 20% increase in asset utilization and better alignment of operations with strategic goals.
- Negotiated and managed B2B partnerships with 6 major Charge Point Operators (CPOs), facilitating the deployment of 50+ public chargers and achieving 100% system integration with Hyundai's CMS.

Deputy Manager, Benchmarking and Product Analyst

Gurgaon, India

Maruti Suzuki India Limited

07/2017 - 12/2021

- Directed a global competitive analysis initiative 10+ OEMs, delivering actionable insights on feature-cost trade-offs and influencing product strategy for Maruti's product roadmap.
- Implemented cost-saving initiatives through competitive benchmarking and teardown analysis, resulting in \$4.8 million in annual savings across two vehicle programs and significantly improving production cost efficiency.
- Utilized SQL to extract and analyze large volumes of vehicle specification and cost data from internal systems, enabling faster benchmarking comparisons and reducing manual analysis time by 35%.
- Standardized benchmarking workflows, reducing cycle time by 27% through lean process optimization and effective knowledge transfer using Confluence to document SOPs and process maps.
- Developed predictive models using historical benchmarking data to forecast cost and performance trends across electric and hybrid vehicle components, supporting strategic sourcing and product roadmap decisions.

EDUCATION

Master of Science in Business Analytics

Jersey City, United States

Saint Peter's University, GPA 3.9/4.0

02/2024 - 05/2025

Bachelor of Technology in Electrical Engineering

Bhopal, India

Maulana Azad National Institute of Technology Bhopal, GPA 9.41/10.0

07/2013 - 06/2017

SKILLS

Business & Strategy: Business Performance Analysis, Strategic Planning, Financial Modeling, Forecasting, KPI Tracking, Market Research, Competitive Benchmarking, Cost-Benefit Analysis, Product & Pricing Strategy

Technical: Python, SQL, R, Tableau, Power BI, MS Excel (Advanced), JIRA, Confluence, Salesforce

Soft Skills: Strategic thinking, cross-functional collaboration, stakeholder management, executive communication

KEY ACHIEVEMENTS

Recognition

- Awarded "Employee of the Quarter" for successfully coordinating the EV Benchmarking project. (Q2 FY19-20)
- "Best Performing GET" award as the top trainee during production training

Product Launch

Led end-to-end development and launch of Hyundai's EV Charging Management System, adopted by 10,000+ users nationwide.

Global Exposure

Selected to conduct EV benchmarking at SUZUKI Japan, providing strategic insights into international market trends and feature-cost trade-offs.

Cost-Saving

Implemented cost-saving initiatives through benchmarking and competitor teardown analysis, resulting in annual savings of approximately \$4.8 million across two vehicle programs, significantly enhancing production cost efficiency

PROJECTS

Autonomous Vehicle Safety Analysis

2024 - 2025

Jersey City, United States

- Analyzed AV disengagement reports using Python to identify safety trends and operational challenges.
- Designed an interactive **Tableau dashboard** to present AV safety insights, public perception trends, and regulatory challenges, enabling data-driven decision-making.
