## PROFILE SUMMARY

AI & Data Engineer specializing in **LLM applications, GenAI platforms and autonomous AI workflows**. Experienced in designing **multimodal RAG systems, transformer-based pipelines and conversational agents** using **LangChain, LlamaIndex and enterprise vector databases**. Skilled in building **cloud-native and real-time data platforms** with **FastAPI, Kafka, Snowflake, Kubernetes and AWS**. Proven ability to deploy **high-performance decision intelligence solutions** through **CI/CD pipelines, MLOps practices and secure microservices architectures**. Known for working closely with technical and business teams to **deliver AI solutions that drive measurable operational and product impact across industries**.

## TECHNICAL SKILLS

- **Programming & Frameworks:** Python, Java, JavaScript/TypeScript, Bash, C++, Node.js, React, Spring Boot, FastAPI, Flask, Django, QT, LangGraph
- **AI & Machine Learning:** LangChain, LlamaIndex, Gemini APIs, TensorFlow, Keras, PyTorch, RAG Pipelines, Prompt Engineering, SageMaker, MLflow, Kubeflow
- **Cloud & DevOps:** AWS (Lambda, S3, CloudWatch, CodeDeploy), Azure, GCP, Docker, Kubernetes, Git, CI/CD Pipelines, N8N
- **Data Engineering & Analytics:** Kafka, PostgreSQL, MySQL, Snowflake, MongoDB, BigQuery, Supabase, Pinecone, ChromaDB, Tableau, Power BI, Streamlit, ETL Pipelines, Confluent Kafka Cloud
- **Security, Monitoring & Automation:** RESTful APIs, OAuth, SAML, JWT, Microservices, DevSecOps, Prometheus, Grafana, ELK Stack

## PROFESSIONAL EXPERIENCE

### Lead Data Engineer | Allata

Mar 2025 – Present

- Led end-to-end ownership of the enterprise marketing analytics use case, including ingestion, refinement and harmonization of streaming data (LinkedIn, TikTok, Meta, BingAds, GoogleAds, DV360, CM360, Impact) into **Snowflake Medallion architecture**.
- Designed automated **ETL pipelines** using **Python, GitLab and Azure Kubernetes Service (AKS)** to ensure scalable and fault-tolerant data processing.
- Designed interactive dashboards in **Tableau** on the **Snowflake Gold layer**, enabling real-time insights across 5+ KPIs.
- Collaborated with stakeholders to define metric logic, visualization standards and reporting workflows using **Tableau** and **Snowflake**, increasing dashboard adoption across business teams by 45% and reducing manual report requests by 60%.

### AI Software Developer | Gamut Source LLC

Mar 2024 – Mar 2025

- Engineered a scalable **Generative AI accelerator** with multimodal chatbot capabilities using **LangChain, Streamlit and open-source LLMs**, reducing time-to-production by **80%** through **LLM-as-a-Judge evaluation** and **MLflow-based MLOps automation**.
- Designed and deployed multiple **RAG and fine-tuning pipelines** on **Databricks** using **PyTorch, Python and PySpark**, improving retrieval accuracy by **38%** and reducing inference latency by **~27%** for enterprise NLP workloads.
- Partnered with cross-functional **Generative AI and software teams** to deliver **production-ready NLP solutions** across **hybrid cloud environments**, enabling analysis of unstructured client datasets and cutting model deployment cycles by **~40%**.

### AI / Full Stack Software Engineer | Aasquare Academy

May 2023 – Feb 2024

- Architected and deployed an **AI-powered newsletter automation engine** using **FastAPI, LangChain and LlamaIndex**, reducing manual workload by 70% and delivering SMTP-based real-time personalization.
- Implemented serverless CI/CD workflows using **Docker, AWS Lambda and CodeDeploy**, enabling zero-downtime blue/green deployments and reducing deployment failures by 55% while cutting release time by **~40%** across distributed Linux systems.
- Orchestrated AI-driven workflows using **N8N**, automating **RAG-based querying and multi-system integration** for high-volume processing.
- Strengthened code reliability by integrating **PyTest, JUnit and Git-based review protocols**, increasing test coverage to **85%** and minimizing regressions.

## PROJECTS

### Multi-Agent AI System Development via Prompt Engineering & LLM Integration

Dec 2023 – May 2024

- Developed five AI applications using **LangChain, LlamaIndex, OpenAI, Mistral, Perplexity and Gemini**, showcasing advanced expertise in **multi-agent orchestration, memory modules and RAG architectures**.
- Engineered a secure **ChatGPT API** integration with a custom moderation layer, reducing harmful or misaligned responses by **~72%** and improving user trust and acceptance scores by **~48%** within AI-human interaction workflows.
- Conducted comprehensive **LLM benchmarking** across prompting strategies, fine-tuning approaches and memory configurations, improving agent task completion rates by **35%** and reducing token consumption costs by **~22%**, contributing to measurable advancements in multi-agent system design.

## CERTIFICATIONS

- AWS Cloud Practitioner – Amazon
- TensorFlow Developer Certificate

## EDUCATION

Master of Science in Computer Science | California State University, Northridge

Jan 2022 – May 2024

Bachelor of Technology in Computer Science | Kalinga Institute of Industrial Technology

July 2017- May 2021
