SUMMARY

Experienced and goal-oriented professional with a strong background in analyzing data and making smart business decisions. Skilled at extracting valuable insights from complex data to guide important strategies and improve predictive accuracy. Proficient in using SQL and Excel to create detailed reports that drive success for companies.

Additionally, experienced as a Computer Systems Validation (CSV) Engineer in the pharmaceutical industry, with expertise in developing and reviewing validation documents, including Validation Plans and IQ/OQ/PQ protocols. Highly knowledgeable in regulatory compliance standards such as GAMP 5, 21 CFR Part 11, and Good Documentation Practices.

TECHNICAL SKILLS

Languages: SQL, Python, R

Tools: Jupyter Notebook, Tableau, Google Data Studio, MS-Excel, MS-Office, MS Visio, Alteryx, Erwin, Databricks

Databases: MySQL, PostgreSQL, MS SQL Server, MS Access, Google BigQuery

Validation Tools and Processes: Risk Assessment, Change Control, Validation Plans, IQ/OQ/PQ Protocols, Traceability Matrix, Validation Summary Reports

Methodologies: AGILE, SCRUM, Software Development Life Cycle (SDLC), GAMP 5, Good Documentation Practices (GDP), 21 CFR Part 11 Compliance

WORK EXPERIENCE

Computer System Validation Engineer, Nanoimaging Services | San Diego, CA

07/2024 – present

- Worked on validation of GMP Computerized Systems, including NETTE and Appion, ensuring compliance with GAMP5 and 21 CFR Part 11.
- Authored and reviewed validation documents such as Validation Plans, Risk Assessments, Change Control, Traceability Matrices, and Validation Summary Reports.
- Authored and reviewed validation protocols (IQ, OQ, PQ) and supported the integration of software systems with the Quality Management System (QMS).
- Performed assessments for GMP Computerized Systems, including GAMP Assessments, System Impact Assessments, Risk Assessments, and Data Integrity Assessments.

Data Analyst, S&P Global | Remote

07/2023 - 07/2024

- Engineered and optimized risk assessment models using Python and SQL, achieving a 20% boost in precision through advanced statistical and machine learning techniques.
- Developed Power BI dashboards, leveraging analytics and Excel, reducing decision-making time by 30% and garnering a 95% satisfaction rating from stakeholders.
- Communicated key insights to senior management, aiding strategic decisions and maintaining a high satisfaction rate.
- Collaborated cross-functionally to gather system requirements, aligning with business objectives and utilizing Excel for data analysis, achieving a 25% increase in operational efficiency and compliance adherence.

Decision Science, Content Analytics Intern, Peacock, NBCUniversal | New York City, NY

01/2023 – 05/2023

- Collaborated with internal teams to analyze content performance, utilizing SQL to extract and analyze data from multiple databases and Excel for further analysis and visualization.
- Leveraged strong knowledge and experience with SQL, Excel, and business intelligence tools to develop end-to-end business intelligence solutions, resulting in a 30% improvement in data-driven decision-making.
- Designed visually compelling dashboards, contributing to a 15% improvement in content strategy alignment with organizational goals.
- Enhanced content forecasting accuracy by 40% through detailed evaluation and assessment of customer lifetime value, utilizing advanced analytics tools.
- Monitored content across demographics, uncovering valuable insights that fueled a 20% increase in content engagement by tailoring strategies based on demographic nuances.

EDUCATION

Stevens Institute of Technology, Hoboken, NJ

Master of Science in Business Intelligence and Analytics program

Aug 2021 - May 2023

GPA: 3.91

University of Mumbai, India

Bachelor of Engineering in Computer Engineering

Aug 2016 - Oct 2020
