Education

Northeastern University

Master of Science in Information Systems – GPA: 3.57

Sept 2023 – Apr 2025

Boston, MA

University of Mumbai

Bachelor of Engineering in Information Technology

Aug 2014 – Aug 2018

Mumbai, India

Experience

WE Rebel LLC

FullStack Intern

May 2024 – Aug 2024

New York, NY

- Developed and integrated scalable **RESTful APIs** using **ASP.NET Core** to support a web-based **music creator dashboard**, streamlining **audio content management** for 1,000+ users
- Leveraged **AWS services** such as **S3** and **DynamoDB** to store and manage structured and unstructured data, enabling reliable **cloud-native persistence** for media files and user-generated content

GEP Worldwide

Software Engineer

Jul 2021 – Jul 2023

Mumbai, India

- Designed and maintained scalable modules for a **cloud-based procurement platform** using **C#**, **ASP.NET MVC**, and **WebAPI**, enhancing **procurement automation** and expanding **user accessibility**
- Built **config-driven Angular grids** to enable flexible **UI customization** based on **client-specific needs**, improving **end-user procurement workflows** and reducing **manual data entry** by 25%
- Optimized **SQL stored procedures**, cutting **report generation time** by 40% and reducing 90% **deadlocks** through **index tuning** and efficient **transaction handling**
- Built **unit and integration tests** with **C#** and **NUnit**, validating **controller logic** and increasing **code reliability**
- Implemented automated **CI/CD pipelines** via **Azure DevOps**, reducing **deployment times** and enabling seamless **rollouts across UAT and Production environments**
- Collaborated in an **Agile Scrum environment** with **offshore teams**, leading **sprint execution**, attending **daily stand-ups**, and aligning deliverables with **product roadmaps**
- Resolved 200+ **critical production issues** with 95%+ **SLA adherence**, achieving 30% fewer **client escalations** and strengthening **Service Confirmation module reliability** for end-users

GEP Worldwide

Software Development Engineer in Test

Feb 2019 – Jun 2021

Mumbai, India

- Engineered scalable **automation frameworks** using **Java**, **Maven**, and **TestNG** to validate **APIs**, **UI workflows**, and **backend services**, reducing **manual QA efforts** by 45% across **Agile sprints**
- Built and maintained **CI/CD pipelines** in **Jenkins** for automated **testing**, **packaging**, and **deployment**, cutting **delivery cycles** by 30% and improving **release stability** across multiple modules
- Mentored 3 junior engineers on **Test-Driven Development (TDD)** and **Agile QA best practices**, leading to a 40% reduction in **post-release UAT defects** and raising overall **sprint quality metrics**

Projects

IoT Monitor | *ASP.NET Core, PostgreSQL, Swagger, Angular*

Apr 2025

- Developed a real-time IoT monitoring platform to collect, store, and visualize sensor data from distributed edge devices
- Designed REST APIs using **ASP.NET Core** and persisted sensor data using **PostgreSQL** for reliable storage
- Integrated **Angular** frontend to visualize sensor trends and device statuses in real-time

E-Commerce Platform | *Spring Boot, Kafka, MongoDB, Docker, Kubernetes*

Aug 2024

- Built **containerized microservices** with **Kafka**-driven asynchronous messaging and **Keycloak**-based access control
- Deployed application to **Kubernetes** for scalability and monitored system performance using logs and **CLI-based tools**

Technical Skills

Languages & Frameworks: C#, Java, TypeScript, JavaScript, Python, SQL, .NET Core, Spring Boot

Frontend: React, Angular, HTML5, CSS3, GraphQL

Backend: REST APIs, ASP.NET Core, Node.js, Swagger, OpenAPI

Cloud / DevOps: Azure DevOps, AWS (S3, DynamoDB), Jenkins, Docker, GitHub Actions, Kubernetes

Database: PostgreSQL, SQL Server, MongoDB

Messaging & Monitoring: Kafka, Redis, Elasticsearch, New Relic, Postman

IDEs & Tools: Visual Studio, IntelliJ, VS Code
