EDUCATION

University of Cincinnati

BSc in Information Technology, **Software Development (3.91/4.0)**

Jan 2020 - Dec 2024

Bloom Institute of Technology, Certificate in Full-Stack Web Development

Jun 2021 - Apr 2022

TECHNICAL SKILLS

React, HTML, Python, JavaScript, Typescript, Go, Angular, Firebase, SQL, C#, Node.js, Java, Docker, ASP.Net, AWS

EXPERIENCE

Olog, Cincinnati, Ohio, Software Engineer

December 2025 - Present

- Spearheaded the development of a visually appealing landing page for the Olog Reader.
- Implemented secure user authentication with AWS Cognito strengthening data security for over 100 users.
- Integrated Stripe webhooks for real-time payment tracking and automatic tax calculation in a native macOS application.
- Developed payment history dashboard for business financial analytic using Firebase.

Medpace, Cincinnati, Ohio, Software Engineer Intern

Aug 2024 - Dec 2024

- Led front-end migration of legacy ASP.NET app to Angular, enhancing user experience for 30+ clinical researchers.
- Utilized JavaScript, HTML, CSS, and Angular to refactor website code, implementing higher-order functions.
- Developed scalable RESTful APIs using SQL Server for clinical research, supporting 10,000+ patient records.
- Collaborated in a team of 5+ members on development and version control to ensure high-quality software deliverables.
- Coordinated code reviews for the team, ensuring adherence to best practices for code compliance.

OBAI (Early-Stage Insurtech Startup), Cincinnati, Ohio, Software Engineer

Jun 2024 - Aug 2024

- Built a responsive React website using component architecture and state management, achieving 40% faster load time.
- Developed a white-labeling feature using HTML, Tailwind and Javascript enabling platform customization.
- Developed responsive front-end components with React, ensuring seamless mobile access for a growing user base.

E-commony (Start-up), Remote, Full-Stack Software Developer Intern

Mar 2022 - Sept 2022

- Implemented Angular, HTML, and CSS to create a touch screen pin code for over 50 users to input user codes.
- Built a backend system with Flask, created API endpoints for 50+ users to monitor food locker temperatures.
- Containerized backend services using Docker for deployment on AWS Elastic Container Service (ECS).
- Collaborated with stakeholders to define project scopes, interaction guidelines, and timelines.

University of Cincinnati, Cincinnati, Ohio, Research Assistant

Jan 2023 - April 2024

- Analyzed Covid Crisis Twitter data rows according to location and specific action words using **Python**.
- Created heat maps using analyzed Covid crisis Twitter data.
- Assisted in writing research papers, documentation for code and conducting research for fact-checking purposes.

HONORS AND ACHIEVEMENTS

- **Dean's List**, University of Cincinnati (Every Semester, Jan 2020 - May 2024)
- **Teaching Assistant**, Microsoft Teams (Jan 2024 - Jun 2024)
- **Career Mentor**, HeadStart Fellowship (Jun 2022 - Aug 2022)
- **Software Engineer Apprentice**, Pinterest (Jun 2022 - Aug 2022)

PROJECTS

Water my Plants, Technical Team Lead

Aug 2021 - Sep 2021

- Led a team of junior developers in developing and launching a full-stack project.
- Prioritized feature development based on user needs and project constraints, ensuring timely delivery.
- Developed login/signup page components using **Axios with useEffect**, and configured authenticated user features.
