

Mohammed Abdul Sharooq

Data Engineer

Boynton Beach, FL | (561) 770-9296 | sharooq002@gmail.com

SUMMARY

Data Engineer with **3+ years** of experience designing and deploying scalable data pipelines, cloud-native ETL/ELT workflows and real time streaming solutions. Proficient in **Python, SQL** and big data technologies (Hadoop, Spark, Kafka) with practical expertise across **AWS and Azure**, using services such as **Redshift, Snowflake**, and **Databricks** to deliver reliable and analytics-ready data solutions.

EXPERIENCE

Bank of America | Florida, USA | *Data Engineer*

July 2024 –Present

- Designed and deployed AWS-based data pipelines using **Glue, Lambda, S3, and Athena** to process high-volume customer and sales data in near real time.
- Built streaming pipelines with **Kafka** and **S3** to capture sensor and transactional data, reducing latency by 20% and supporting faster decision-making.
- Optimized **Redshift** warehouse performance with partitioning, compression, and indexing strategies, improving query efficiency by 35% for analytics team.
- Automated ingestion and monitoring with **Glue Crawlers** and **CloudWatch**, cutting manual oversight by 40% and ensuring reliable data availability.
- Developed Python, SQL based validation frameworks embedded in AWS workflows to enforce data quality across environments.
- Strengthened **governance** and operational reliability by implementing automated validation and alerting mechanisms, reducing recurring production issues.

Cognizant | India | *Programmer Analyst – Data Engineer*

March 2021 – July 2022

- Engineered ETL pipelines on Azure Data Factory**, ingesting structured and semi-structured datasets into **Azure Synapse Analytics** to support enterprise analytics and reporting.
- Developed and deployed **Spark (PySpark, SQL, Python) batch jobs in Azure Databricks** with schema enforcement, optimized partitioning and configuration tuning, handled complex transformations at scale, reducing processing time by 30% and improving reliability of downstream workflows.
- Designed **reusable DBT models with Python** to streamline data transformations and eliminate redundant logic across projects.
- Integrated **Azure Blob Storage and Data Lake Gen2** for large-scale, multi-source datasets, improved scalability by 25% through structured partitioning, optimized formats and lifecycle policies.
- Maintained **CI/CD pipelines with GitHub Actions & Azure DevOps**, reducing errors by 20% and accelerating delivery timelines.

Data Ready Technology | India | *Software Engineer (Big Data)*

August 2020 – February 2021

- Built **data pipelines with Apache Spark, Hive, Kafka**, and **SQL** to process logs, transactional datasets.
- Supported **ETL development in Informatica** with error handling, validation for **PostgreSQL & MongoDB**, leveraging SQL and basic **Python** scripts improving data quality.
- Assisted in **pipeline orchestration using Apache Airflow**, helping reduce manual interventions by 15% by workflow automation.
- Contributed to **query optimization in Spark and Hive** by applying partitioning & indexing, enhancing processing efficiency.
- Documented data lineage, dependencies, pipeline metadata in Confluence, improving team collaboration & knowledge transfer.

SKILLS

Programming & Scripting: Python, SQL, Shell Scripting.

Big Data & Processing: Spark, PySpark, Hadoop, Hive, Kafka.

Cloud Services: AWS (Redshift, S3, Athena, Lambda, CloudWatch, RDS, EC2), Azure (ADF, Synapse, Databricks, Data Lake)

ETL & Data Integration: AWS Glue, Azure Data Factory, Informatica.

Data Modeling & Orchestration: DBT, Airflow, Star/Snowflake Schema.

Databases: SQL Server, PostgreSQL, MongoDB, Snowflake.

DevOps & Infra: Docker, Kubernetes, GitHub Actions, Azure DevOps, CI/CD.

Visualization & BI: Power BI, Tableau.

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

EDUCATION

Masters in Computer and Information Science

August 2022- May 2024

Florida Atlantic University, Boca Raton, FL, USA.

Relevant Coursework

Data Science & Analytics, Software Engineering (SDLC), Cloud Computing, Theory and Implementation of Database Systems, Data Mining & Predictive Analysis, AI for Medicine and Healthcare, Cloud Security.

Bachelors in Electronics and Communication Engineering

August 2016- May 2020

Vidya Jyothi Institute of Technology, Hyderabad, Telangana, India.

CERTIFICATIONS

- AWS Certified Data Engineer – Associate (2025)
- Big Data Analytics Certification
