

Mohammed A. Al-Muqsit

(332) 200-7233 | almuqsit101@gmail.com | Bronx, NY | [Github](#) | [LinkedIn](#)

EDUCATION

The City College of New York, City University of New York (CUNY)

Bachelor of Science in Computer Science

GPA: 3.5/4.0

New York, NY

Expected May 2026

Relevant Coursework:

Data Structures and Algorithms, Software Engineering, Software Design Lab, Internet Programming, Database Management Systems, Operating Systems, Computer Security, Image Processing, Computer Graphics, Data Science

SKILLS

Programming: Python, JavaScript, Node.js, Flask, Express.js, Next.js, React, Java, HTML, CSS, C++, R

Technologies: MySQL, MongoDB, PostgreSQL, Supabase, Tableau, Git, Github Actions, Vercel, AWS, GCP

PROJECTS

CD Blocker

Fall 2025

- Led a 4-person team to design and build CD Blocker, a real-time computer vision app that detects and masks credit card/ID information in live streams.
- Architected the system by combining OpenCV and Google Gemini Vision API, reducing API calls by 80% while balancing accuracy and performance
- Oversaw frontend (React/Tailwind) and backend (Python, WebSockets) integration, ensuring seamless streaming experience for creators

Movie Ratings Analysis & Visualization Tool

Fall 2025

- Developed an end-to-end interactive Streamlit dashboard to analyze Movie Ratings dataset with 100k+ ratings, enabling dynamic exploration of user preferences by genre, time, and rating distribution
- Implemented pandas queries and groupby operations to extract insights on viewing trends, and used Plotly Express for advanced data visualizations

CUNY PulseBoard

Summer 2025

- Built a centralized dashboard that consolidated 5+ CUNY student services into a single interface, reducing the time to access resources by an estimated 30%.
- Deployed frontend on Netlify and leveraged Google Cloud services, ensuring 99% uptime and scalable access for CUNY students across devices.

E-Bidding

Fall 2024

- Designed and implemented RESTful APIs using HTTP methods for auction listings, bid management, and user authentication.
- Ensured seamless data handling by verifying HTTP codes and giving necessary responses as objects in JSON
- Created backend for suspension, VIP, and rating features using Express.js, while addressing edge cases for reliability

RELEVANT EXPERIENCE

CUNY Tech Prep

New York, NY

Data Science Fellow

Jul 2025 – Present

- Selected for a competitive data science fellowship with students from across the 11 CUNY senior colleges where Fellows create technical projects using tools such as Python 3, Jupyter Notebooks, Pandas, Numpy, Scikit-learn, and SQL.
- Participate in weekly courses and learn industry best practices for exploratory data analysis (EDA), feature engineering, data collection and processing, statistical modeling, data visualization, machine learning techniques, data science process, and big data.

Metropolitan Transportation Authority (MTA)

New York, NY

Data Analysis and Administration Intern

Jun 2025 – Aug 2025

- Conducted trend analysis on Personally Assigned Vehicles, uncovering 25%+ misuse and recommending allocation changes that boosted asset utilization and cut operational costs by ~\$50K annually
- Analyzed 100,000+ rows of operational data to identify \$100K–\$2M in underutilized assets, enabling cross-departmental resource optimization and improved asset utilization.
- Developed automated reports in Excel and Power BI, cutting manual data processing time by 30% and improving decision-making visibility for senior leadership
- Optimized inventory tracking for Non-Moving Inventory using pivot tables and KPI dashboards, enabling proactive asset management and reducing surplus stock
