

MOHAMMED AMMAR DADANI

Austin, TX 78727 ♦ 7374081037 ♦ ammar37004@gmail.com ♦ [LinkedIn](#) ♦ [GitHub](#) ♦ Green Card Holder

PROFESSIONAL SUMMARY

Motivated fresher with a background in Computer Engineering (Honors in Cybersecurity) and Mechanical Engineering. Strong foundation in digital forensics, ethical hacking, and information security management. Familiarity in vulnerability assessment, penetration testing, and incident response.

SKILLS

- **Languages:** Python, C++, C, JAVA
- **NLP & AI Tools:** NLTK, BERT, Generative AI APIs
- **Incident Response, Penetration Testing, Vulnerability Assessment.**
- **Data Visualisation:** PowerBI, Excel, Tableau.
- **Cloud Technology:** AWS.
- **Data Analysis:** NumPy, Pandas, Matplotlib, Seaborn.
- **Database Management:** MySQL.
- **Data Analysis and Machine Learning:** TensorFlow, Catboost, Scikit-learn, Keras, NumPy, Pandas, Matplotlib, Seaborn.
- **CAD/CAM software familiarity**

PROJECTS

AdmissionPulse:

- Engineered a platform to predict graduate admission chances based on SOP, LOR, GPA, GRE, and TOEFL scores.
- Automated personalized SOP and LOR generation using Generative AI APIs and BERT-based evaluation models, achieving ~90% accuracy with custom-trained NLP pipelines.
- Evaluates and rates both generated and pre-written SOPs.

Bike Rental Demand Forecasting System:

- Built an interactive forecasting dashboard using Streamlit to predict bike rental demand in urban settings.
- Applied SARIMA and Prophet models for 24-hour forecasting, with interactive visualizations and performance metrics (RMSE, MAE, MAPE) for evaluation.
- Delivered real-time CSV export functionality for operational use cases.

Kannada Weather Chatbot:

- Developed a natural language processing chatbot for real-time weather updates in Kannada and English.
- Implemented fuzzy matching for accurate city name detection and integrated OpenWeather API for live data.
- Achieved high accuracy in understanding user inputs, enhancing usability for native language speakers.

Movie Hit/Flop Prediction

- Built a predictive model using Python to forecast box-office success based on actor, director, producer, budget, and language inputs.
- Collected and processed large datasets from Kaggle for model training and validation.

EXPERIENCE

Test Engineer, 06/2025 - Current

Flextronics – Pflugerville, TX

- Managed inventory, maintenance, and calibration of test equipment to ensure accurate and reliable results.
- Automated testing procedures and reduced manual test cycles by 20% and improved efficiency.
- Conducted engineering tests, system checkouts, and validation tasks to verify product performance and specification compliance.
- Analyzed test data, identified discrepancies, and implemented corrective actions to resolve technical issues promptly.
- Collected, interpreted, and documented engineering data; improved procedures to optimize workflows and reduce errors.

Intern, 01/2021 - 07/2021

Yesh Engineering – Mumbai

- Assisted in the operation and maintenance of conveyor belt systems and sorting line processes.
- Maintained optimal inventory of parts and tools, improving operational throughput by 15%.

EDUCATION

Bachelor of Science: Computer Science With Honors in CyberSecurity , 05/2025

University of Mumbai – Mumbai

- 3.31 GPA

Associate of Science: Mechanical Engineering , 08/2021

Maharashtra State Board of Technical Education - Mumbai

- 3.42 GPA

CERTIFICATIONS

- C++, Trycatch – January 2023
- Cloud Computing, AWS - March 2024
- Python, Trycatch – May 2024
- Certificate of Publication, Journal of Engineering, Computing and Architecture - November 2024
- Power BI for Beginners - March 2025
