- **CERTIFIED IN** SAS CERTIFIED ADVANCED ANALYTICS PROFESSIONAL USING SAS – SAS Enterprise 2022
- **DIPLOMA IN** MICROSOFT POWER BI – ALISON 2023
- **CERTIFIED IN** LEVERAGING AI in PREDICTIVE ANALYTICS, AUTOMATION and DATA MANAGEMENT -ALISON 2025

Core Competencies:

- | | |
|--|--|
| • SQL | • Data Analysis & Visualization |
| • Dashboarding (Tableau, Power BI, DOMO) | • Microsoft Office & Excel |
| • Agile, SDLC | • Microsoft Teams, SharePoint, Outlook |
| • Data Warehousing (Snowflake, SAS, POS, Databricks) | • Team Leadership & Development |
| • Customer Behavior Analyst, CRM | • Web-Based Reporting Tools, A/B testing |
| • E-commerce, Retail, Hospitality and Medical | • Google Analytics, Market Analysis |
| • Business Intelligence | • Predictive Modeling |

Professional Skills:

Nordstrom
Business Analyst

Sept 2024 - Present

- Led requirement gathering for Intelligent BOPIS Experience Optimization, creating BRDs, SRS, and detailed wireframes to support dynamic pickup slot selection and real-time inventory visibility.
- Conducted JAD sessions as part of the BOPIS Optimization Project to align store operations, digital, and fulfillment teams on feature rollout and user expectations.
- Built UML activity diagrams, ERDs, and flowcharts to model the improved BOPIS order routing logic, ensuring seamless integration across POS and mobile systems.
- Developed and executed UAT test cases for the Intelligent BOPIS solution's automated notification system, reducing missed pickups by 18% across pilot locations.

- Created Power BI dashboards under the BOPIS Optimization initiative to track customer wait times, order readiness, and in-store pickup volume trends.
- Used Google Analytics within the Intelligent BOPIS project to analyze user behavior on the app's pickup selection flow, leading to a UX redesign that improved conversion by 12%.
- Documented sprint progress, decision logs, and product enhancements in Confluence, and managed user stories and bug tickets through Jira for the BOPIS optimization sprints.
- Leveraged SQL and Excel to analyze pickup volume, regional adoption rates, and fulfillment times, supporting data-driven decisions for the BOPIS rollout strategy.

Environment: SQL, Power BI, Google Analytics, A/B Testing, Predictive Modeling, Regression Analysis, Jira, SharePoint, Excel, Sketch.

1-800 Flowers.com

Feb 2023- July 2024

Business Data Analyst

- Partnered with business and technology teams to build insightful analytical solutions
- Investigated data discrepancies, resolved them, and articulated them to support the team's ability to do effective data analysis
- Identified areas where operational efficiency can be improved through automation and implemented those enhancements
- Worked with the product team to set up a business intelligence tool using technologies such as SQL Server, SAS, and Snowflake.
- Used Service Now to track the assigned tickets, analyze the task, ensure work progress and Timeliness.
- Created automated data reporting tools, facilitating real-time monitoring of business operations and performance metrics, leading to actionable insights.
- Analyzed data to perform root cause analysis of technical issues with our platform
- Tableau development/visualization experience, including designing and developing reports and dashboards with large data volumes
- Identify key performance indicators/actionable insights and build automated data reporting tools to measure results and success
- Develop and design business intelligence solution using Micro strategy platform.
- Managed Grassroots marketing teams such as scheduling, communication, and assigned activities as required.
- Worked as a Market Research Analyst responsible for collecting and analyzing data for Market growth and expansion plans.
- Performed professional market research to identify the target market, market conditions, customer behaviors, trends, and competitions.
- Manage the Data warehouse and provide database and data mining technical support.
- Provide training and support to end users on Micro strategy tools and applications.

Environment: Office 365, Microsoft Teams, SAS, Outlook, Excel, Snowflake, PowerPoint, Service Now, Tableau, Micro Strategy.

Chef-Driven

May 2021 - Jan 2023

Business Intelligence & Analysis

- Perform category and channel analysis for Retail Partners and leadership Teams in an extremely fast-paced environment.
- Perform competitive analysis by the manufacturer (ours and competitive), brand, and package type to identify trends, opportunities, and challenges to core business areas.
