PROFESSIONAL SUMMARY

Results-driven and self-starter healthcare focused Data Analyst with three years of experience managing clinical datasets and delivering actionable insights. Skilled in managing ETL workflows and data visualizations, with expertise in statistical programming languages and analytical tools; displaying a proven ability to drive data-informed decision-making and solutions.

SKILLS & COMPETENCIES

- **Core Competencies:** Data Analysis, Statistical Reporting, Data Visualization, Risk Assessment, ETL workflows
- **Languages and Tools:** R, SQL, Python, Quarto, Tableau, Tidyverse, ggplot2, Pandas, NumPy, Google Apps Script
- **Platforms:** RStudio, Jupyter Notebook, Snowflake, Microstrategy, Epic, AthenaOne, Cerner, REDCap
- **Visualization and Reporting:** R Shiny, Plotly, Tableau, Power BI, MS Office (Excel, Word, PowerPoint)

PROFESSIONAL EXPERIENCE

Pediatric Neurology Data Analyst Consultant **Children's Brain Institute | Lexington, MA** **May 2025 - July 2025**

- Conceptualized, built, and streamlined a successful new patient intake process made bespoke for a small clinic setting.
- Reduced new patient registration time from initial call to appointment scheduling by 67%.
- Analyzed referral, prior authorization, and claims data to increase the efficiency and funding of clinic operations.

Healthcare Data Analyst **Boston Children's Hospital | Boston, MA** **March 2022 - October 2024**

- Managed and maintained ICU patient care dashboards analyzing over 13 years of data, enabling real-time monitoring and improved clinical decision-making.
- Delivered 25+ customized reports synthesizing clinical datasets, providing stakeholders with actionable insights for research and strategic planning.
- Processed 4,000+ biweekly data points for COVID-19 reports covering 35 hospitals, contributing to CDC epidemic response efforts.
- Developed tailored reports and visualizations for the PICU Cloud team, standardizing six key pediatric care metrics across 32 hospitals globally.
- Applied ICD-9/10 and CPT coding standards to stratify ICU patients, contributing to multiple peer-reviewed publications with statistical models and calculated scores (pSOFA, PIM3).
- Created a dashboard visualization consisting of 30+ CPT billing codes used by pediatric critical care doctors to analyze diagnoses on the unit and forecast potential revenue flow based on retroactive trends for the department.

Patient Experience Representative in Neurology **Boston Children's Hospital | Waltham, MA** **November 2018 - March 2022**

- Answered phone lines for 3+ hours daily at a rate of 15-20 calls hourly; providing consistently excellent patient service.
- Organized traffic for a patient population of up to 70 patients daily, assisting with check in/out and scheduling appointments.
- Set up provider clinic room schedule on a weekly during the COVID-19 pandemic and its aftermath.
- Completed bi-weekly inventory supply checks and ordered supplies through the hospital portal.
- Mediated billing, copay, and insurance concerns with patients, making sure to either provide a solution or to refer patients to the appropriate resource.

EDUCATION

Master of Science in Data Science **Merrimack College | North Andover, MA | 2022** - GPA: 3.8

Bachelor of Science in Public Health **University of Massachusetts Amherst | Amherst, MA | 2018**
