CORE COMPETENCIES

- Vendor relations
- Logistics
- Inventory Control
- Process improvement
- Data Analysis
- Enterprise Resource Planning
- Forecasting
- Project Management
- Root cause analysis

Software: Oracle, Power BI, SQL, S/4 HANA, MSFT Suite, Tablea

PROFESSIONAL EXPERIENCE

DSV– Seattle, WA

June 2024

QA SPECIALIST – TRANSPORTATION & LOGISTICS

- Managed last-mile logistics for international shipments, ensuring on-time delivery of high-value products ranging from \$10M to \$100M by reducing lead times and minimizing disruptions in the supply chain.
- Support procurement processes by collaborating with suppliers and vendors to align delivery schedules with import/export logistics, minimizing lead times and reducing disruptions.
- Leveraged analytical skills to interpret procurement data and domestic and international shipping trends, to devise strategies that reduced costs, and enhanced efficiency in supply chain operations, achieving significant cost savings.
- Direct quality assurance for sensitive cargo to maintain product integrity, while conducting post-delivery audits and reviews to enhance operational efficiency.

RECREATION EQUIPMENT INC. CO-OP (REI)– Issaquah, WA

June 2023 - September 2023

SUPPLY CHAIN LOGISTICS INTERN

- Implemented a real-time predictive model using Tableau to forecast SKU & DC level demand, improving the accuracy of inventory transfer planning.
- Developed a business proposal to halt out-of-region inventory transfers, supported by a comprehensive inventory analysis of 3 major distribution centers.
- Applied data analysis techniques to optimize procurement processes, reduce costs, and improve truck utilization across the distribution network by transforming 200 GB of data into an enterprise-level logistics dashboard with SQL.
- Automated performance dashboard management and maintenance by creating a SQL query that automatically updates and refreshes the dashboard.

INDEX – Bellingham, WA

September 2022 - December 2022

SUPPLY CHAIN BUYER INTERN

- Supported lean manufacturing initiatives in the sensor manufacturing facility by analyzing procurement workflows and identifying inefficiencies, leading to improved material flow and reduced waste in the sourcing process.
- Managed the procurement of over 200 parts by leveraging ERP systems to track purchase orders, collaborate with suppliers for sourcing, negotiate pricing, and ensure timely delivery, improving purchasing efficiency and supplier communication.
- Facilitated faster and easier access to critical data like purchase orders and part masters, company-wide for over 200 parts by leveraging advanced Excel functions to develop an extensive master document for sourcing and pricing.

VIRGINIA MASON MEDICAL CENTER – Seattle, WA

July 2021 - September 2021

LEAN PROCESS IMPROVEMENT INTERN

- Reduced transportation mileage by 25% by utilizing Excel to create a heat map of storage cart movement around the hospital, optimizing inventory management through the implementation of a Kanban system for replenishment efficiency.
- Eliminated \$10,000 in waste spending by tracking, identifying low-use/high-spend items and removing 1000 lbs. of waste inventory from the supply chain providing visibility on inefficient sectors of the Just in Time supply chain.

EDUCATION

BA – Supply Chain Management – Western Washington University – **Graduation:** June 2023

Certifications: Cybersecurity

PROFESSIONAL ORGANIZATIONS & AWARDS
