

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in healthcare analytics, clinical reporting, and operational dashboards. Skilled in SQL, Python, Power BI, Tableau, and Snowflake with strong knowledge of CMS 5-Star, HEDIS quality measures, Risk Adjustment, and medical utilization analysis. Proven ability to design and maintain reporting frameworks that provide actionable insights for clinicians, operational leaders, and compliance teams. Experienced in building ETL pipelines, data models, and backend processes to support healthcare data management and decision-making. Adept at translating complex datasets into clear insights, supporting strategic planning, compliance, and quality improvement.

EDUCATION Master of Science in Information Quality

University of Arkansas at Little Rock, AR | Aug 2022 – May 2024

Awarded Annual Merit Scholarship for academic excellence (Fall 2022 & Spring 2024)

Bachelor of Science in Computer Science

Osmania University, Hyderabad, India | Aug 2017 – May 2021

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
 - ISO 9001 Master Data Quality Manager
 - Data Analytics and Visualization Job Simulation – Accenture
 - Data Science Foundations – IBM
 - Data Analysis with Python – IBM
 - SQL and Relational Database Management 101 – IBM
 - GenAI Powered Data Analytics Job Simulation – TATA
 - Data Analytics Job Simulation – Deloitte
-

TECHNICAL SKILLS

Languages & Databases: SQL, T-SQL, Python, R, Java, PostgreSQL, MySQL, Snowflake

Healthcare Analytics: CMS 5-Star, HEDIS, Risk Adjustment, Medical Utilization Analysis, Healthcare Reporting Frameworks

Data Visualization & BI Tools: Power BI, Tableau (Calculated Fields, Parameters, LOD Expressions, Interactive Dashboards, Geospatial Maps, Trend & Forecast Models), Excel (PivotTables, VBA, INDEX-MATCH, Forecasting, What-If Analysis)

ETL & Data Integration: Data Warehousing, Data Governance, ETL Pipelines, SSIS, Alteryx, clinical and claims data integration

ERP & Medical Logistics Tools: SAP ERP, Microsoft Dynamics 365, Inventory Management Systems, Healthcare Logistics/Claims Processing Systems

Analytics & Modeling: Statistical Analysis, Time Series Forecasting, Predictive Analytics, Optimization Models, Risk Adjustment Forecasting, Quality Metrics Modeling

Application Development: .NET Framework (C#), Power Apps (Canvas Apps, Model-Driven Apps), VBA scripting

Other Tools & Platforms: SharePoint, JIRA, Agile/Scrum, Git

PROFESSIONAL EXPERIENCE

Prosis Technologies Inc (October 2024 – Present)

Data Analyst

- Developed and interpreted operational and clinical reports in Power BI, Tableau, and Excel for leadership, supporting decision-making on utilization, case management, and compliance.
- Designed data models and backend processes in SQL, Python, and Snowflake to consolidate claims, patient, and provider data for healthcare analytics.
- Collaborated with Data Integration and Data Management teams to source, validate, and transform healthcare datasets (claims, eligibility, risk adjustment) into reliable reporting layers.
- Built HEDIS and CMS 5-Star dashboards to monitor quality metrics, identify performance gaps, and guide quality improvement initiatives.
- Developed Risk Adjustment reports that improved coding accuracy and documentation, directly impacting reimbursement accuracy and compliance.
- Conducted medical utilization analysis, surfacing trends in hospital admissions, readmissions, ER visits, and procedure usage, supporting cost optimization and patient care initiatives.
- Delivered ad-hoc healthcare reports by combining multiple datasets (claims, provider, member, survey data) into executive-ready presentations.
- Automated ETL pipelines for clinical and operational data, reducing reporting turnaround by 40%.
- Partnered with clinicians and operational leaders to interpret dashboards, improve metric literacy, and align reporting with compliance and clinical standards.
- Conducted moderately complex analyses on patient cohorts, utilization spikes, and escalation cases to identify systemic issues and recommend solutions.
- Assisted in the integration of SAP ERP and healthcare logistics systems, ensuring data flow across finance, operations, and medical distribution.
- Authored data dictionaries, reporting standards, and governance models to ensure consistent use of healthcare KPIs across the organization.

Data Analyst (Volunteer)

Arkansas Census State Data Center | Oct 2022 – May 2024

- Spearheaded data governance initiatives by identifying critical data quality issues and creating comprehensive data governance policies and standards.
 - Developed and implemented data quality rules, measured critical data elements across various data quality dimensions, and designed data profiles by cleaning census data using Python libraries.
 - Assisted in the delivery of operational reports by writing complex SQL and T-SQL queries to extract and manipulate data from databases, ensuring accurate and timely data reporting.
 - Utilized PySpark to efficiently process and analyze large datasets, ensuring scalable data handling and improved performance in data processing tasks.
 - Developed and implemented strategies for matching and linking census data, improving data consistency and reliability across various datasets. Worked with cross-functional teams to integrate these strategies into broader data management practices. Trained team members on these policies to ensure adherence and improve data integrity.
 - Coordinated with team members to streamline the resolution process and worked closely with managers to align data initiatives with organizational goals, ensuring that data projects met business requirements and delivered value. Provided regular updates and insights to managers to inform strategic decision-making.
 - Designed, developed, and published an online parser website and tool to intake addresses, parse, and map them with suitable mapping tokens and address components. Conducted manual QA and data testing on the developed tool to ensure functionality and reliability.
 - Created insightful reports and dashboard to track work on census data for internal and external stakeholders using Power BI and Tableau, enhancing data-driven decision-making processes.
 - Documented procedures and protocols to standardize data quality measures and improve overall data integrity.
-

•

Prosis Technologies Inc., Hyderabad, India | Mar 2019 – Aug 2019

Data Analyst Intern

- Collected and cleaned healthcare operations and claims datasets using SQL and Excel to identify performance gaps and opportunities for optimization.
- Assisted in building ETL pipelines for medical logistics and claims data, integrating multiple sources into centralized reporting systems.
- Created Power BI and Tableau reports for hospital resource utilization, order fulfillment, and claims turnaround metrics.
- Supported senior analysts in developing Risk Adjustment and HEDIS metric reporting for internal quality teams.
- Conducted exploratory data analysis (EDA) on claims and provider datasets, highlighting bottlenecks in healthcare delivery processes.
- Developed VBA and Python scripts to automate repetitive reporting tasks, reducing manual processing by 25%.
- Participated in cross-functional workshops with IT and clinical staff to define healthcare data requirements and align on KPIs.

PROJECTS

- HEDIS Compliance Dashboard: Built a Power BI dashboard that tracked compliance with HEDIS quality measures, enabling leadership to identify underperforming areas and improve scores.
- CMS 5-Star Reporting Framework: Designed automated reporting pipelines in SQL and Snowflake to consolidate claims and quality data, providing real-time insights into CMS 5-Star measures.
- Risk Adjustment & Medical Utilization Analysis: Developed Python models to analyze claims data, identify documentation gaps, and support accurate risk scoring.
- Clinical Operations Dashboard: Created Tableau dashboards integrating provider, claims, and patient data to monitor utilization, escalation patterns, and patient outcomes.

RELEVANT COURSEWORK

- Advanced Business Intelligence & Dashboard Design (Power BI, Tableau, SAP Analytics)
- Cloud Data Warehousing & Snowflake (Pipelines, Optimization, Migration)
- Statistical Methods & Predictive Analytics (Case Volume Forecasting, Risk Adjustment Modeling)
- Data Mining & NLP (Patient Sentiment & Healthcare Survey Analysis)
- Information Quality & Data Governance (Compliance, Healthcare Data Integrity)
- Supply Chain & Medical Logistics Analytics (Healthcare Delivery Optimization)
- Database Systems & SQL Programming (SQL Server, Snowflake, PostgreSQL)
- Python for Data Science (ETL Automation, Forecasting, Anomaly Detection)

SOFT SKILLS

Data Interpretation & Insight Extraction | Problem Solving | Communication & Presentation | Cross Functional Collaboration | Independent Task Management | Time Management | Data Visualization | Supply Chain Optimization
