Technical Skills + Certifications

Languages & Tools: SQL (PostgreSQL, PL/SQL), Python, Java, R, PHP, C#, Laravel, Django, SpringBoot

Databases: Oracle PL/SQL, SQLite, PostgreSQL

Cloud & DevOps: AWS (S3, RDS, IAM), GCP, Docker, Git, GitLab

Tools: Power BI, Tableau, Excel, Pandas, NumPy, Jira, Confluence

Certifications: AWS Cloud Practitioner

Education

George Mason University

Fairfax, VA

Bachelor of Science in Information Technology

Concentration in **Databases and Programming**

Relevant Coursework: DBMS, Database Management Systems (DBMS), PL/SQL (Oracle), Statistics, Data Structures and Algorithms, Programming (Python and Java), System Analysis and Design, Project Management, Cloud Computing, Linux, Operating Systems, Networking, Web Development (PHP), Introduction to Cybersecurity.

Experience

IT Operations Specialist

March 2025 – July 2025

Tony's Auto Transport Remote

- Deployed a centralized **PostgreSQL** database using **Amazon RDS** to manage vehicle records, client data, job contracts, and transport routes securely and efficiently
- Implemented **Amazon S3** for cloud-based storage of repair images, invoices, and documents, improving team access and file organization
- Managed user access and permissions through **AWS IAM**, while coordinating driver schedules, job tracking, and repair timelines using shared calendars and internal platforms
- Provided IT support across the team, including system monitoring, software troubleshooting, workflow optimization, and user training

Software Developer Intern (Laravel, PHP)

July 2024 – October 2024

Bluu Kazi Remote

- Supporting platform development and maintenance using PHP and Laravel and enhancing the front end with HTML and CSS.
- Collaborating with the development team to implement new features, troubleshoot bugs, and optimize database performance.
- Participating in code reviews, documenting processes, and effectively communicating with cross-functional teams.
- Managing agile tasks using Jira, utilizing GitLab for version control, and staying updated with the latest web development trends.

Transaction Coordinator Internship

November 2024 – February 2025

Realtor Ghassan Ghaida's office (affiliated with RE/MAX ONE SOLUTIONS)

- Developed Excel trackers to monitor rent payments, expenses, and balances, ensuring accurate reporting and clear financial records for all parties
- Coordinated communications and documentation workflows across multiple stakeholders, streamlining task dependencies and timelines while managing inquiries, resolving workflow issues, and maintaining organized storage systems to ensure compliance.

Projects

Awarded an Outstanding Project in the 2024 CEC Undergraduate Research Celebration at George Mason University.

- Built a digital management system using Python and Django, featuring a user-friendly interface for managing customer data, project materials, invoices, and proposals with real-time updates, increasing workflow efficiency by 40%. Integrated SQLite for handling data efficiently, reducing data retrieval time by 50%.
- Implemented an automated invoicing system that generates and sends invoices directly to customers in PDF format via email, reducing manual invoice processing time by 60% and minimizing billing errors by 35%, leading to faster payments and improved cash flow.
- Utilized Agile methodologies for iterative development and worked closely with my team and the client through regular meetings to tailor the solution to satisfy the client's requirements. We provided our client with training and a comprehensive user manual for their seamless adoption of the system.

“BASEBALL DATA ANALYSIS: MONEYBALL EFFICIENCY” | Python, SQLite, Pandas

- Successfully managed and processed a large-scale baseball database using SQLite and efficiently extracted relevant data using pandas Data Frames and complex SQL queries.
- Implemented sophisticated data transformations and statistical computations to compute team payrolls, winning percentages, and standardized payroll, developing them into insightful visualizations that facilitated comprehensive analysis of teams.
