PROFESSIONAL SUMMARY

Generative AI Engineer with extensive experience in AI and machine learning, specializing in deploying AI-driven applications using advanced techniques like Transformer models and fine-tuning LLMs. Proven track record in developing solutions for NLP, computer vision, and data processing, leveraging tools such as OpenAI, Hugging Face, and cloud platforms like AWS and Azure. Skilled in Python and AI deployment strategies, committed to innovation and teamwork to drive high-quality results.

PROFESSIONAL EXPERIENCE

Alpine Techq Inc

Generative AI Engineer

Mar 2023 - Present

Edina, Minnesota

- Worked with Generative AI LLMs like OpenAI GPT-4 and LLAMA-3 for text generation, correction, and classification tasks, using zero-shot learning and prompt engineering to enhance model performance
- Created real-world applications and case studies on end-to-end Gen AI projects using Google Gemini Pro, resulting in improved functionalities for Medical Chatbots, code translation, and ATS tracking systems
- Used deep learning frameworks like PyTorch and TensorFlow to design, train, and fine-tune NLP chatbot modules, enhancing chatbot accuracy and user interaction
- Built applications using the RAG framework with GPT3.0, GPT3.5, GPT4.0, Llama, oLlama, and Google Gemini, leading to enhanced data retrieval and processing capabilities
- Developed and deployed LLMs using LangChain, LlamaIndex, and Hugging Face, optimizing AI models for efficiency and scalability, resulting in faster processing times and reduced resource usage
- Generated test cases and scripts using AI, implementing NLP-to-SQL for automated QA strategy development, which improved testing efficiency and accuracy
- Integrated GitHub Copilot to accelerate code generation and debugging, reducing development time and improving code quality
- Fine-tuned GPT models for domain-specific applications, enhancing model accuracy and relevance to business needs
- Applied PEFT techniques such as LoRA and Soft Prompts for efficiency, resulting in faster model training and reduced computational costs
- Deployed on cloud platforms like AWS Bedrock and Azure Cognitive Services, ensuring scalable and reliable AI solutions
- Developed an AI chatbot leveraging Retrieval Augmented Generation (RAG) techniques, improving user interaction and response accuracy
- Implemented semantic search and vector databases for accurate medical responses, enhancing the precision of information retrieval
- Evaluated performance using BLEU, ROUGE, and METEOR metrics, leading to improved model accuracy and reliability
- Developed and trained deep learning models using PyTorch and TensorFlow to enhance the accuracy and robustness of the OCR and object detection systems.
- Developed test cases and test scripts from images using Generative AI, and created a QA strategy that improved software testing efficiency and accuracy
- Established project on Telecom Services by using LLMs to analyze customer history and generate personalized offers (using Streamlet, LLMs prompts).

HCL Technologies Ltd

Senior Analyst

Jun 2018 - Jul 2021

- Enrolled and monitored devices, published internal and external applications using Windows 7 based on service owner's request, ensuring seamless application availability
- Renewed environment certificates regularly, troubleshooted user devices, and took necessary actions to resolve incidents, improving system reliability and user satisfaction
- Deployed and managed mobile applications and mobile application management policies using Azure, including MAM and MAM-WE, enhancing security and efficiency for iOS and Android applications
- Created groups, compliance policies, and conditional access, applied policies on devices for system security, device health, restrictions, and lockdown, ensuring robust security and compliance
- Collected hardware hash files of devices and uploaded them to Intune, facilitating efficient device management and inventory tracking
- Resolved enrollment, device compliance policy, device configuration, email sync, VPN, and Wi-Fi certificate issues on Android and iOS devices, improving device functionality and user satisfaction
- Set up Windows Autopilot OOB, created and managed compliance policies, configurations, software update rings, and license management, enhancing system efficiency and security
- Managed certificate delivery issues and engaged vendor partners for advanced troubleshooting, ensuring timely resolution and maintaining system integrity
- Managed MS Store for Business accounts, PKI servers for certificate deployment, and integrated third-party certificate authorities with Intune, streamlining operations and enhancing security
- Handled RDP issues and deployed PowerShell scripts using Intune to devices, improving remote access reliability and system performance
- Collected logs using Windows 7 and identified root causes of problems, applying fixes to enhance system stability
- Coordinated and engaged vendors for major escalations, ensuring timely resolution and improved vendor relationships

- Conducted end-user and client training on the application using Service Now, resulting in improved user proficiency and satisfaction

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript
- **Generative AI:** Large Language Models (LLMs), GANs, Autoencoders, Reinforcement Learning
- **Machine Learning & AI:** NLP, Deep Learning, Transformer Models (BERT, GPT, T5)
- **AI Frameworks:** TensorFlow, PyTorch, Hugging Face, LangChain, LlamalIndex
- **Prompt Engineering:** Zero-shot, Few-shot Learning, Parameter Optimization
- **Cloud Technologies:** AWS Bedrock, Azure ML, GCP AI Services
- **AI Deployment:** Model Evaluation, Fine-Tuning, RAG Implementation
- **Software Development:** Python, GitHub Copilot, API Integration
- **Languages & Tools:** PyTorch, OpenAI API, AWS, GCP, Azure, LangChain, Hugging Face, GitHub Copilot
- **Databases:** Oracle, MySQL, MongoDB
- **Cloud & Monitoring Tools:** Service Now, Azure Active Directory, Microsoft Intune Tool
- **Operating System:** Windows 7, Windows 10, Windows 11, Mac book

EDUCATIONAL DETAILS

Trine University

Master of Science, Information Science

- **GPA:** 3.9/4.0
- **Coursework:** Software Engineering, Cybersecurity, Data Science and Big Data

Jayamukhi Institute of Technological Sciences

Bachelor of Technology, Computer Science Engineering

- **GPA:** 8.1/10.00
