

Mohan Krishna

Mobile no: 314-585-8719 | Email: mohankrishna4441@gmail.com | Irving, Tx | [LinkedIn](#)

Authorised to work for any employer

Highlights:

- Having 4+ years of experience in System Administration, Virtualization, Backup solutions, Storage solutions, and On-Prem to cloud Migrations.
- Hands-on experience in designing, developing, and deploying Virtualization techniques in various datacenters.
- Experience in Troubleshooting Network, OS, and Performance related problems, building, configuration, patching, upgrading, and troubleshooting VMWare ESXi hosts for Linux VMs
- Experience in working with ESX servers –Installation, configuration, management, and maintenance.
- Skilled in deploying, managing, and troubleshooting Ubuntu, Centos , Debian -based environments for both server and desktop configurations.
- Installed RHEL on physical servers or virtual machines.
- Successfully managed and administered Red Hat Enterprise Linux servers in a corporate environment, ensuring high availability and optimal performance.
- Designed disaster recovery strategy for Citrix XenDesktop environment, ensuring business continuity during system outages.
- Good knowledge of RAID groups and setting up, CIFS and iSCSI protocols in SAN/NAS environment on RedHat LINUX.
- Hands-on experience with various storage equipment like HP Nimble, Dell EMC VNX, and Dell EqualLogic.
- Good knowledge of AD domain, OU, user & machine accounts, groups, and GPOs.
- Utilized Nutanix Prism for centralized management and monitoring of HCI clusters, enabling proactive issue detection, resource allocation, and performance tuning.
- Experienced with the installation, and configuration of Veritas Storage Foundation 3.5, 4.0, 4.1, and 5 and volume
- Hands-on experience with HP ProLiant Servers and Dell Power Edge rack mount servers.
- Extensive experience in all forms of backup and recovery modules in Windows servers and VMware environments.
- Handled Dell power edge servers and storage daily.

Skills and Tools:

VMware	VMware Vcenters 7.x, 6.x with ESXi 7.x,6.x,VMware Horizon Client, vSAN.
Windows	Windows Server 2008/2008 R2/2012/2016/2019/2022 - Active Directory Domain Services (ADDS), RODC, DNS, DHCP, WSUS, DFS, WDS, File Service, Print Services, Webserver (IIS 7, IIS 6), Application Server, SharePoint Services, TCP/IP Networking, FTP, SSL, Terminal Services and Clustering, MS Azure Cloud
Storages	Pure Storage Array//x50R2,//m50R2. NetApp FAS/AFF, NetApp ONTAP, Dell Power Flex, Dell Vmax
Hardware	HP ProLiant Series,Dell PowerEdge ,Cisco UCS.
Scripting languages	PowerShell, VB scripting
Backup Tools	Synology, Rubrik, Rubrik Cloud.
Ticketing tools	Service now, JIRA
Operating Systems	Windows Server 2003/2008/R2, 2012/R2, 2016 Windows 98/XP/Vista/7, UNIX, RHEL 4/5,Ubuntu, Centos, Debian

Professional Experience:

NOKIA, TX System Engineer

Jan 2024 – present

- Design and Implementation of a migration strategy for consolidating Data Centers from around the US to new locations in the US, which involves more than 500 virtual machines.
- Designed, implemented, and maintained VMware vSphere virtualization infrastructure, managing ESXi hosts, vCenter Server, and vSAN, ensuring high availability, scalability, and performance optimization to meet business requirements.
- Proficient in administering patches and upgrades for Windows, Linux, and virtualized environments.
- Collaborated with cross-functional teams to troubleshoot and resolve technical issues related to KVM virtualization and Debian Linux.
- Did setup and troubleshooted network configurations, including static IPs, DNS, and DHCP, in Ubuntu, CentOS, and Debian.
- Created and Maintained User Profiles for all new users via Windows Server User Manager for Domains.
- Utilized tools such as NetApp OnCommand System Manager and Active IQ to monitor storage performance, identify bottlenecks, and perform capacity planning.
- Built and managed Linux servers: DNS, NTP, and NFS/Autofs.
- Administer Microsoft Windows Servers (Active Directory), Microsoft Workstations, and network security devices for 350 users.
- Experienced with KVM on Ubuntu and CentOS for managing virtual machines, including configuration, resource allocation, and optimization.
- Managed and maintained Isilon storage clusters, ensuring high availability and optimal performance.
- Proficient in using configuration management tools (e.g., Ansible, Puppet) to automate system configuration, deploy updates, and maintain consistent configurations across multiple Linux hosts.
- Utilized Shell scripting to build monitoring tools and data analysis scripts, providing real-time insights into system performance and facilitating proactive problem resolution.
- Upgraded Citrix infrastructure from XenApp 6.5 to XenApp 7.x, reducing server footprint and improving performance.
- Proficient in WebLogic administration, managing server configurations, deployments, and troubleshooting.
- Managed and prioritized tasks in Jira according to SLA (Service Level Agreement) requirements.
- Handling Data Centre Operations with Business and mission-critical applications.
- Deployed and managed Scripts for ESXi configuration backups.

Wells Fargo, MO System Engineer

May 2022 – Dec 2023

- Used Virtual Machine Cluster (VMC) for configuring and managing virtual machines within the cluster.
- Created and documented processes for deploying Virtual machines on VMware and used service now Tool for ticketing (Change Management, Incident Management, and Request Management) and looking after high-priority incident tickets on both the virtual machine and ESX host level.
- Experience in generating Reportson SCCM using SQL Management Studio.
- Designed and implemented virtualization solutions using KVM on Debian Linux, resulting in cost savings and improved scalability.
- Proficient in administering Linux-based systems, including installation, configuration, and ongoing maintenance of various distributions such as Ubuntu, CentOS, and Red Hat.
- Managed software packages using apt for Debian-based systems and yum/dnf for CentOS, ensuring proper system updates and dependency resolution.
- Dealt with various servers like Dell PowerEdge series, cisco UNC series, and HP ProLiant series.
- Managed the Deployment of Windows Updates and Security patches through SCCM/WSUS.
- Planned and implemented storage migration from one data storage device to the other
- Experience working on EMC SAN storage technologies in the DR site and with Cisco UCS and HP C7000 Blades for ESXi hosts.
- Worked on MS Azure for SQL backups and SAP daily data and also configured it for backup. Created logical and physical data models for an inventory management system, ensuring scalability and data integrity.
- Managed and maintained Red Hat Enterprise Linux (RHEL) operating systems in a production environment, ensuring system stability, security, and performance.
- Optimized KVM virtualization infrastructure, resulting in a 20% improvement in resource utilization and cost savings.
- Developed and implemented automation scripts that reduced routine maintenance time by 30% Installed and configured Dell Power scale system for better efficiency than previous systems.
- Engineered a comprehensive disaster recovery solution by integrating VMware Site Recovery Manager (SRM) with cloud-based services, resulting in reduced recovery time.

Tata Consultancy Services (TCS), India Jr System Engineer

Sep 2020 – Dec 2021

- Managed and maintained Linux servers running Debian and Ubuntu, ensuring optimal performance and uptime.
- Installed Dell EMC PowerEdge servers as per customer requirements. Part of the team that installed Vxblock
- Installed and configured Power Vault ME5 as per customer requirements.
- Upgraded Various components of Servers as per the requirement. Updated Windows OS across the Infra Environment

- Performed installations and configurations of various Linux distributions (e.g., Ubuntu, CentOS, Red Hat).
- Optimized workload performance by leveraging Nutanix's distributed storage fabric and implementing data deduplication and compression techniques.
- Automated routine tasks through Prism, enhancing operational efficiency and reducing manual overhead.
- Managed backup solutions – Rubrik and Wasabi. Developed complex SQL queries to extract actionable insights from large datasets, resulting in a 15% reduction in query execution time.
- Successfully managed and administered Red Hat Enterprise Linux servers in a corporate environment, ensuring high availability and optimal performance.
- Designed and implemented a robust hybrid cloud architecture using VMware technologies, enabling workload portability and optimized resource allocation between on-premises datacenters and cloud environments.
- Analyzed cloud usage patterns and implemented cost optimization strategies, utilizing VMware tools to right-size instances, allocate resources efficiently, and manage cloud spending effectively
- Successfully migrated legacy systems to newer, more efficient Debian and Ubuntu platforms, reducing maintenance overhead and improving system reliability.
- Experience with network devices, switches, and routers like Cisco Catalyst, Cisco switches, and Palo Alto.
- Monitored Regular VMware/ vSphere Patches. Automated regular processes and everyday tasks.

Education:

Masters in Computer Science	May 2023
Southeast Missouri State University, Missouri	
Bachelor of Computer Science and Engineering (CSE)	June 2020
Vignan University, India
