

Mohan Sai Ravilla

Data Analyst | ravillamohansai@gmail.com | 3475416052 | Jersey City, NJ, 07306 | [Linkdin](#)

SUMMARY

Detail-oriented Data Analyst with 4 years of experience driving insights and business decisions through data analytics, reporting, and visualization. Skilled in **Python, SQL, Tableau, and Power BI**, with hands-on experience in building dashboards, optimizing data pipelines, and conducting exploratory and statistical analysis. Adept at collaborating with cross-functional teams to identify business challenges and deliver actionable solutions across healthcare, logistics, and supply chain domains. Passionate about data storytelling, stakeholder communication, and improving processes through automation and cloud-based analytics.

SKILLS

- **Languages & Analytics:** Python (NumPy, Pandas, Seaborn, Scikit-learn), R, SQL, SAS
- **Visualization & Reporting:** Tableau, Power BI, Excel (Pivot Tables, VLOOKUP, Macros), Google Sheets
- **Statistical Techniques:** A/B Testing, Hypothesis Testing, Correlation, Regression, Forecasting
- **ETL & Data Integration:** SSIS, SSRS, Informatica, Data Cleaning, Data Wrangling
- **Databases:** MySQL, SQL Server, PostgreSQL, Oracle
- **Cloud & Big Data:** AWS (Redshift, S3), Azure (Data Factory), GCP (BigQuery)
- **Version Control & Tools:** Git, GitHub, Jupyter, Visual Studio Code, Power Automate
- **Soft Skills:** Data Storytelling, Stakeholder Communication, Problem-Solving, Agile Collaboration

EXPERIENCE

Cardinal Health, USA

Jul 2024 – Present

Data Analyst

- Collaborated with supply chain and operations teams to understand reporting needs and built end-to-end data pipelines using Python and SQL to support inventory tracking, shipping timelines, and order fulfillment metrics.
- Created dynamic Tableau dashboards for supply chain leadership, enabling live monitoring of stockouts, delayed shipments, and vendor performance, which improved visibility and reduced response time by 40%.
- Automated weekly and monthly reporting workflows by writing Python scripts for data cleaning and transformation, significantly reducing manual processing time and data errors by over 30%.
- Designed scalable, cloud-based data solutions using AWS Redshift and GCP BigQuery to manage large volumes of order and logistics data, improving data retrieval speeds and storage efficiency.
- Conducted root cause analysis on delayed deliveries and fulfillment issues by combining SQL-driven reports and stakeholder interviews, helping the operations team implement corrective actions.
- Developed Excel-based forecasting templates integrated with external data sources, enabling territory managers to simulate different cost and demand scenarios for quarterly planning.
- Partnered with business analysts to ensure KPIs (e.g., delivery accuracy, fill rate, cost per shipment) were tracked consistently and reflected in executive dashboards and reports.

United Health Group

Jan 2020 – Jan 2023

Data Analyst

- Built advanced SQL queries and Python routines to extract, process, and analyze claims and member data across various health plans, identifying billing anomalies and inefficiencies in provider operations.
- Worked closely with actuarial and product teams to develop predictive models for member risk scores and cost forecasting using SAS and Python, contributing to risk-based care prioritization.
- Designed and published interactive Power BI dashboards tracking prior authorization decisions, member approvals, and clinical outcomes, which supported executive decision-making.
- Conducted A/B testing for various member engagement strategies, including telehealth campaigns and medication reminders, analyzing response rates and behavioral impact using statistical testing methods.
- Led the migration of multiple on-premise reporting systems to Azure Data Factory pipelines, enabling faster access to data and automated scheduling of reports and alerts.
- Identified gaps in historical claims data and collaborated with data engineering to patch missing entries, improving the accuracy of quarterly actuarial forecasts.
- Supported regular compliance audits by preparing summary reports, validating data integrity, and documenting metadata for financial and medical records used in Medicare reporting.

EDUCATION

- Master's in Computer Science from Pace University, New York
