

MOHAN BABU KOTTE

Java Full Stack Developer

7735024804

mohanbabukotte@gmail.com

Illinois, USA

Highly skilled and motivated Java developer with **5+ years** of hands-on experience in designing, developing, and maintaining robust and scalable software solutions. Seeking a challenging role where I can leverage my expertise in Java programming, software architecture, and problem-solving to contribute to innovative projects and drive business success.

CERTIFICATION

EDUCA-

Governor's State University, Illinois, USA

Masters/ Computer Science

TECHNICAL SKILLS

- **Web Technologies:** HTML5/HTML, CSS3/ CSS, Bootstrap 3/4, Kotlin, JavaScript, ES5/ES6, jQuery, React.js, Angular 2/4/6/7, TypeScript, Ajax, JSON.
- **AWS:** S3, EC2, ECS, Lambda, SNS, SQS, EMR, VPC, IAM, Cloud watch, Redshift, API
- **Cloud Technologies:** AWS, Azure, GCP
- **Java Technologies:** Java 8, 11, Core Java/J2EE (Servlet, JDBC), Spring (Framework, Apache Flink, Security, Hibernate 4, JPA, MVC, AOP), Spring Boot, Java Swing, Restful Web Services (REST), Apache (Maven 3.0, Tomcat 7.0), Microservices
- **Databases:** SQL Server, MySQL, MongoDB, Oracle.
- **Operating Systems:** Windows, Linux and Unix.
- **Tools/ IDEs:** Jira, Jenkins, Docker, Visual Studio Code, Eclipse Enterprise, IntelliJ, ELK.
- **Version Controls:** Git, GitHub, Bitbucket.

PROFILE SUMMARY

- Over **5+ years** of professional experience in Requirements Analysis, Design, Development and Implementation of **Java, J2EE** and **Client-Server** Technologies.
- Worked on **Hibernate** for mapping the java objects to relational database and **SQL** queries to fetch the data, insert and update the data from the database.
- Experience in writing functional Test cases for new features using **Cypress** and **Playwright** for comprehensive functionality testing.
- Experience in Deploying and maintaining **Micro services** using **Docker** and experienced on **Docker, AWS ECS, Kubernetes**
- Expert developer using **Spring Boot** for radically fast building of **Micro-services** and develop Cloud based **Micro service** applications with very less configuration. Worked with **JMS API, Spring JMS, IBM MQ, Active MQ, Rabbit MQ, MQ-Series API** and **Kafka**.
- Experience in creation and maintenance of **CI/CD pipelines**.
- Well versed with **J2EE Design Patterns** like **DAO, Service Locator, Value Object, Business Delegate Pattern, Front Controller Pattern, Singleton, MVC, Session facade** etc.
- Extensive experience in using version control tools like **SVN, Git**.
- Experience with Integrated Development Environments like **Eclipse, IntelliJ** and **STS**.
- Experience with web services, **Groovy/Grails, EXTJS, XML/XSLT, Struts, Log4j, Maven, Spring (Core, Spring Boot, Spring Data)**, and **Angular**.
- Experience in developing light weight business components and integrated applications using **Spring** framework, **Spring web MVC**. Used testing frameworks like **JUnit, Selenium, HttpUnit, DB Unit, STIQ**, and **JMock**.
- Strong experience on **Agile (SCRUM)** and **Waterfall SDLC**.
- Used **Docker** Container to address every application across the hybrid cloud and **Docker** for better collaboration and innovation.
- Proficient in UI design, developed Front End using **JSP, HTML5, CSS3, JavaScript, Ajax, jQuery, Angular, React, TypeScript, ECMAScript**.
- Experience in writing with no schema database Couch DB and have knowledge on **MongoDB**.
- Having Handful experience in using **OAuth 2** for **Microservices security**.
- Experience in using Web/Application servers like **WebLogic, JBoss, Glassfish** and **Tomcat**.
- Development experience with java such as **OOPS Concepts, Strings, IO, Multi-threading, Collections and Exception Handling**.

RELEVANT EXPERIENCE

(ColomboAI) Ingredion Incorporated \ Java Full Stack Developer
Westchester, Illinois, USA Jul 2024 - Nov 2024

Ingredion Incorporated is a global ingredients solutions company. It creates ingredients from plant-based materials for the food, beverage, brewing, and industrial markets. Developed scalable backend solutions, implemented microservices, optimized database performance, enhanced user interactions, and ensured secure and efficient system integration.

Responsibilities:

- Utilized **AWS Lambda** to optimize Backend processes and improve application performance.
- Played role of middle tier developer using **Hibernate** framework to generate custom report and to improve the performance of query.
- Design and maintain **Spring Boot Microservices** for large-scale enterprise applications.
- Configured backup, alert systems, repairs, and monitoring for **Cassandra** clusters using **OpsCenter**.
- Created various **MongoDB** collections and wrote services to store and retrieve user data from for the application on devices and used **Mongoose API** in order to access the **MongoDB** from **Node.js**.
- Developing **Spring Boot** microservice architecture applications and deploy them to **AWS EC2** instances using **CI/CD Jenkins** Pipeline. Extensive experience in **Pivotal Cloud Foundry (PCF)**.
- Developed reusable and interoperable Web service modules based on **SOA** architecture using **RESTful**.
- **Java** message queue (**JMS**) is used for exchanging the information and messaging services.
- Designed and developed the framework to consume web services hosted in Amazon **EC2** instances.
- Developed new user-facing features using **React**. Worked on **Lambda** Expressions, Functional interfaces **Stream API's**, **Time API**, and Improvements on Collection, Concurrency, and IO improvements by using **Java 8**.
- Developed full-stack solutions using **JavaScript**, **React.js**, **Node.js**, and **Express.js**, contributing to both frontend and backend systems. Implemented the “vibe” functionality using **JavaScript**, enhancing platform engagement and improving user experience. Resolved key bugs and optimized features, including.
- User avatar image setup, ensuring smooth user profile management.
- Comment section improvements, increasing reliability and user interaction.
- Collaborated on passkey integration for secure, password less authentication, enhancing platform security.
- Designed and currently implementing a notification system to improve user interaction and provide real-time updates. Used **IntelliJ IDEA IDE** tool for application development.
- Involved in various **SDLC** phases like Requirement gathering, Design, Analysis and Code development.
- Working on creating batch jobs using **Autosys** as the job scheduler and technologies like **SQL invoker**, **UNIX shell** scripting and **core java**.
- Developed application using **Spring Boot**, **Java8**, **Hibernate**, **Web Services (RESTful)**.
- Implemented light weight **WADL** (Web application description Language) for better understanding of Rest based web services and its configuration.
- Developed test cases using **JUnit** to validate several business rules in the application. Implemented the security on **microservices** using **Spring Boot** Auth server which generated **JWT** tokens as **OAuth2** mechanism.
- Involved in writing java **API** for **Amazon Lambda** to manage some of the **AWS** services.
- Worked in an **Agile** development environment, collaborating with cross-functional teams to deliver features efficiently and on time. Utilized **Git** for version control and **Jira** for project management, ensuring clear communication and effective project tracking
- Worked on creating the **Docker** containers and **Docker** consoles for managing the application life cycle. Setup **Docker** on **Linux** and configure **Jenkins** to run under **Docker** host.
- Developed Service Timeouts for **NoSQL**, **MongoDB**, **Db2** and **Sybase**.

Technologies Used: AWS, AWS Lambda, Cassandra, CI/CD, Docker, EC2, Hibernate, Java, Java 8, Jenkins, Kafka, Lambda Expressions, Microservices, MongoDB, Mongoose API, Node.js, NoSQL, OpsCenter, PCF, React, Spring, Spring Boot, SQL, Stream API

Medline Industries

\ Java Full Stack Developer

Northfield, Illinois, USA Jan 2023 - Jun 2024

Medline Industries, LP is an American private healthcare company. Built scalable applications, integrated microservices, automated workflows, and optimized data processing and system notifications for improved performance and reliability.

Responsibilities:

- Used **JMS** (Java Mailing Service) **API** and **Kafka** to mail notifications upon the success or failure when the backend processes are completed and to send mail notifications regarding any system related problems.
- Define set of resources and specifying deployment parameters to **Azure** Resource Manager (**ARM**) templates to creating resource group of virtual machines
- Involved in integrating **Microservices** into an existing system architecture using **Clojure**.
- Triggered the automation jobs using **Jenkins** to get the cucumber **JSON** reports.
- Experience in handling messaging services using **Apache Kafka** implemented **Micro services** architecture to make application smaller and independent **REST** web services using Jersey with the enabled **OAuth**.
- Development in several shell scripts, **MySQL** & involved in designing invoking of all forms of data using validation service using **SQL** Server. Implemented **Kubernetes** for container orchestration, deploying applications in a distributed environment to ensure high availability and scalability.
- Developed mapping spreadsheets for (**ETL**) team with source to target data mapping with data modeling naming standards.
- Implemented configured **Jira** issue tracking software with **Agile** plug-in across all the company functions.
- Developed **CI/CD** pipeline and build tasks to run the unit tests on **Jenkins** and maintained separate build in Maven for the module for easy integration to the portal build and configure with **Jenkins**.
- Created Low Level Design Documents for services and web application.
- Design and developed the UI using **Node.js**, **Spring MVC**, **HTML5**, **CSS3**, **Bootstrap**, **JavaScript**, **jQuery**, **AJAX**.
- Implemented the **RESTful** web service to load the **JSON** files into the database SoapUI was used to test the Web Service application.
- Implemented the complete set up with configuration file changes from **Angular 6** to **Angular 8**. While migrating the project which involved converting angular components and updating router Modules.

Technologies Used: Agile, AJAX, Angular, Angular 6, Apache Kafka, Azure, Bootstrap, CI/CD, CSS, CSS3, HTML, HTML5, Java, JavaScript, Jenkins, Jira, JMS, jQuery, JSON, Kafka, Microservices, MVC, MySQL, Node.js, OAuth, RESTful, S3, Spring, Spring MVC, SQL, SQL Server

L&T Finance

\ Java Full Stack Developer

Mumbai, India Jan 2021 - Jul 2022

L&T Finance Holdings Limited (LTFH) is an India-based non-banking financial company. I implemented the security best practices and ensuring compliance with regulatory requirements in software development processes.

Responsibilities:

- Involved in writing the **Microservices** in **Spring Boot** application with **Spring** annotations.
- Worked on Server-side **CSS** pre-processing platforms and UI kits, such as LESS/SCSS, **Node.js**, foundation and **Bootstrap**.
- Used **SDK** such as **Eclipse IDE**, **Toad**, and **SVN** etc. in this project.
- Implemented **Spring Boot** Micro services to create sub modules and registered on **Docker**.
- Write unit tests using **JUnit**, Mockito or other testing frameworks to ensure code quality and test coverage.
- Good Experience in **React** for creating interactive UIs using one-way **data flow**, **Virtual dom**, **JSX**
- Implement **Java 8** Method References feature to point to methods by their names & implement functional Interfaces.
- Deployed our application on Pivotal Cloud Foundry (**PCF**) which is used to reduce the development overhead by providing a ready to use platform.
- Developed automation of Validation service to provide the **JASPER** report based on bean validations, **Spring** validations on test cases.

- Used **Node.js** to run **Grunt** tasks and build properly the project (compile, minify, concat etc.) and Implement modules into to integrate with designs and requirements. Used **Grunts**, **BowerJS**, **Express** from **NodeJS**.
- Migrated **SOAP** web service resources to **Spring RESTful** webservices resources using **Spring RESTAPI** with **Spring Boot**.
- Creating real-time bidirectional communication using **Socket.IO**, **HTML**, **CSS**, and **JavaScript** to create front-end communication.
- Created/managed **MongoDB/NoSQL** collections. Developed Server-side automation using **Node.js** scripting and connecting different types of **SQL** and **NoSQL** databases.
- Designed and developed the **ETL** (Extraction Transformation and Loading) solution using the request module and the **OAuth 2.0** protocol.
- Experience in Integration of **Amazon Web Services AWS** with other applications infrastructure.
- Implemented Product-Retrieval Service as **SOAP** based service using **Apache** frame works.

Technologies Used: AWS, Bootstrap, CSS, Docker, Eclipse, HTML, Java, Java 8, JavaScript, JUnit, Microservices, MongoDB, Node.js, NoSQL, OAuth 2.0, PCF, React, SOA, SOAP, Spring, Spring Boot, SQL, SVN, Web Services

Wellness Forever Medicare Limited \ Java Developer **Mumbai, India Mar 2019 - Dec 2020**

Wellness Forever is India's third-largest retail pharmacy. It is operating a large omnichannel and hyperlocal retail network. Utilized the frontend technologies such as HTML5, CSS3, JavaScript (React/Angular/Vue), to design and implement captivating user interfaces that elevate user experience.

Responsibilities:

- Designed and developed the persistence layer using **Hibernate** persistent objects, for interaction with the databases. Implemented data reading, saving and modification by stored procedures in **MySQL** database and **Hibernate** criteria.
- Involved in Migrating existing application in to **Microservices** architecture using **REST APIs** and **Spring Boot**.
- Working on creating batch jobs using **Autosys** as the job scheduler and technologies like **SQL invoker**, **UNIX shell scripting** and **core java**.
- Migrated tables from **SQL Server** to **Cassandra** and written queries in **CQL** for retrieving the data present in **Cassandra** Cluster. For version control management used **CVS** software.
- Supports different markets for alerts and bugs, Analyze and understand fix them.
- Used **IntelliJ** for development and debugging **Spring Boot** applications and Used **Git** for version control.
- Developed and maintained responsive web applications using **React.js**, delivering high-quality code that met project requirements and deadlines.
- Involved in writing **Spring** Configuration **XML**, file that contains declarations and business classes are wired-up to the frontend managed beans using **Spring IOC** pattern.
- Responsible for unit, functional, integration, automation backend **API's** testing for all new software features and enhancements using **JUnit** and **TestNG** framework.
- Involved in various phases of Software Development Life Cycle (**SDLC**) such as requirements gathering, modeling, analysis, design, and development.
- Implemented multi-threaded synchronization processes, with **JMS** queues for consumption of Asynchronous requests.
- Developed **JASPER** report to show the result after validations are performed on the test cases and maintaining several data accuracy.
- Developed all the UI pages using **HTML5**, **CSS3**, **JSON**, **JavaScript**, **jQuery**, **Angular 8**, **Ajax**.
- Written complex **SQL** queries, Stored Procedures and Functions in **PL/SQL** for manipulating the data.
- Responsible to integrate applications for web- based environment using **SOA**.
- Implemented **core java Multithreading**, **Collections**, **Exception Handling**, and **OOP's concepts**.

Technologies Used: Angular, Autosys, Cassandra, core java, CSS3, CVS, Git, Hibernate, HTML5, IntelliJ, Java, JavaScript, JMS, jQuery, JSON, JUnit, Microservices, MySQL, PL/SQL, React, S3, SDLC, SOA, Spring, Spring Boot, Spring IOC, SQL, SQL Server, TestNG, XML
