

Data Analyst

5017713324|[mohankanthreddyc@gmail.com](mailto:mohankanthreddyc@gmail.com)| LinkedIn

SUMMARY

Experienced Data Analyst with 3+ years of expertise in extracting, cleansing, and analyzing complex datasets to deliver actionable business insights and support data-driven decision-making. Skilled in SQL, Python, R, Power BI, and Tableau, with hands-on experience in building ETL pipelines, developing predictive models, and designing interactive dashboards. Adept at collaborating with cross-functional teams to identify trends, optimize workflows, and drive strategic initiatives while ensuring strict adherence to data governance and HIPAA compliance. Passionate about leveraging advanced analytics and visualization techniques to enhance operational efficiency and improve business outcomes.

TECHNICAL SKILLS

**Programming & Scripting:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R (Statistical Modeling, Hypothesis Testing), Shell Scripting  
**Data Analysis & Reporting:** Data Analysis, Exploratory Data Analysis (EDA), Statistical Analysis, Business Reporting, Data Visualization, KPI Tracking, Insights Generation  
**Database & Data Warehousing:** SQL (Joins, CTEs, Window Functions), Azure Synapse Analytics, Snowflake, Amazon Redshift, MySQL, PostgreSQL  
**Data Visualization Tools:** Power BI, Tableau, Excel (Pivot Tables, Lookups, Charts), Dashboard Development, Interactive Reporting  
**ETL & Data Integration:** ETL Pipeline Development, Data Cleansing, Data Transformation, Data Migration, Talend, AWS Glue  
**Big Data & Cloud Platforms:** Hadoop, Spark, Hive, AWS (S3, Glue, Redshift), Google Cloud Dataflow, Azure Synapse Analytics  
**Healthcare Analytics & Standards:** EHR Data Analysis (Epic, Cerner, MediAssist, Practo), Claims Analytics, ICD-10 Codes, CPT Codes, HIPAA Compliance  
**Predictive Modeling & ML:** Predictive Analytics, Logistic Regression, Fraud Detection Models, Risk Scoring Models, Anomaly Detection

EXPERIENCE

**Data Analyst | UnitedHealth Group, USA** **Feb 2025 – Present**

- Spearheaded data integration from Epic EHR, Cerner, claims, and IoMT devices into Azure Synapse Analytics, enabling seamless access to centralized datasets and improving overall data analysis efficiency across the Patient360 Analytics Platform.
- Engineered and optimized ETL pipelines using SQL and Python to clean, transform, and standardize patient records, reducing data discrepancies and enhancing accuracy for predictive healthcare analytics and operational reporting.
- Designed and developed dynamic dashboards in Tableau and Power BI to visualize patient health metrics, claims data, and clinical outcomes, empowering stakeholders with real-time insights and accelerating decision-making by 30%.
- Collaborated with cross-functional teams to implement predictive analytics using Python and scikit-learn, enabling early identification of high-risk patients and improving readmission prediction accuracy by 25%, which enhanced patient care strategies.
- Ensured strict HIPAA compliance by applying advanced data masking techniques, encryption protocols, and role-based access controls while aligning ICD-10 and CPT standards to harmonize reporting and maintain data security across the platform.

**Data Analyst | Streebo Inc, India** **March 2021 – July 2023**

- Collected, integrated, and standardized patient and insurance claims data from multiple EHR systems and billing platforms using SQL and Azure Synapse Analytics, ensuring data accuracy and consistency across the Healthcare360 and MedInsight platforms.
- Cleaned and transformed large datasets using Python, handling missing values and inconsistencies while applying ICD-10 and CPT mapping standards to improve overall data quality and readiness for predictive analytics.
- Conducted exploratory data analysis using R and SAS to identify health trends, readmission patterns, and anomalous claim behaviors, enabling early detection of fraudulent claims and optimizing patient outcome insights.
- Designed and developed interactive dashboards in Power BI and Tableau to visualize KPIs such as treatment costs, claim settlement timelines, patient health metrics, and operational performance for better decision-making.
- Collaborated with healthcare stakeholders and insurance teams to deliver predictive models and fraud detection insights, reducing invalid claims by 35% and accelerating claims settlement processes by 25%.
- Optimized ETL pipelines and automated data workflows using SQL and Azure Synapse, which reduced manual preparation efforts by 45% and improved data processing efficiency for healthcare analytics reporting.
- Ensured full compliance with healthcare privacy and data security standards by applying HIPAA guidelines, encryption techniques, and role-based access controls, which strengthened data governance across both platforms.

EDUCATION

**Masters in Information Quality** **Aug 2023 – May 2025**  
University of Arkansas at Little Rock | Little Rock, Arkansas

**Bachelors in Electronics and Communication Engineering** **Jul 2018 – Jun 2022**  
TKR College of Engineering and Technology | Hyderabad, Telangana
