

MOHANKANTH REDDY CHINTHALA

Data Analyst

5017713324|mohankanthreddyc@gmail.com| [LinkedIn](#)

SUMMARY

Experienced Data Analyst with 3 years of experience driving data-informed decisions through advanced analytics, predictive modeling, and visualization. Skilled in extracting and transforming complex datasets using Python and SQL, and delivering actionable insights via Power BI dashboards and automated reports. Adept at applying machine learning techniques, sentiment analysis, and risk stratification within agile environments to solve real-world business and healthcare challenges. Proven ability to collaborate with cross-functional teams, ensuring data accuracy, stakeholder alignment, and continuous process improvement.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy, Scikit-learn, TextBlob, NLTK), SQL (Snowflake, PostgreSQL, SQL Server), DAX

Data Visualization: Power BI, Tableau, Excel (Advanced Charts, PivotTables), Jupyter Notebook

Data Management & ETL: Azure Data Factory, Informatica, Azure ML Studio, Data Cleansing, Feature Engineering

Machine Learning & NLP: Logistic Regression, Decision Trees, Sentiment Analysis, Risk Stratification, Keyword Categorization

Methodologies & Frameworks: Agile, Scrum, Waterfall, SDLC, Predictive Modeling, Risk Segmentation, Comorbidity Index (CCI)

Data Analytics Techniques: Descriptive & Diagnostic Analytics, Trend Analysis, Feedback Scoring, Preventive Gap Analysis

Reporting & Documentation: MS Excel (QA & Validation), PowerPoint (Stakeholder Reporting), SharePoint (Collaboration & Versioning)

Healthcare Domain Tools: OptumIQ Insights, EHR & Claims Data Handling, PHI Compliance, ICD-10 Mapping, Appointment Forecasting

EXPERIENCE

- Data Analyst | UnitedHealth Group, USA**

Feb 2025 – Present

 - Developed an interactive health risk dashboard by integrating clinical, behavioral, and claims data using Snowflake, Power BI, and Azure Data Factory to support proactive care outreach and reduce emergency visits.
 - Performed extensive data cleaning and transformation using Python libraries to prepare EHR and claims data for modeling and visualization, ensuring consistency and analysis readiness across diverse data sources.
 - Implemented a risk scoring logic based on comorbidity indices and historical utilization trends to stratify members by risk level, collaborating with care teams to validate outcomes and refine stratification rules.
 - Built visual analytics using Power BI with dynamic filters for plan type, geography, and conditions, enabling the business to identify trends and monitor high-risk members across various population groups.
 - Maintained all documentation, dashboards, and transformation logs using SharePoint and Jupyter, ensuring HIPAA-compliant handling of member data while supporting regular clinical and leadership reviews.
- Data Analyst | Streebo Inc, India**

March 2021 – July 2023

 - Analyzed patient feedback collected via healthcare chatbot by applying sentiment analysis techniques using NLP tools and categorized responses to uncover pain points in hospital services.
 - Transformed unstructured text feedback into structured insights using Python libraries and stored results in PostgreSQL, enabling trend analysis by department and doctor performance.
 - Created satisfaction score dashboards in Power BI with filters by hospital branch and department, allowing leadership to track improvement in patient experience over time.
 - Built predictive models using machine learning algorithms to estimate appointment no-show risks, integrating outputs with Streebo’s Appointment Assistant Bot for real-time follow-ups.
 - Engineered features such as past appointment history, demographics, and time preferences using SQL Server and Pandas to enhance model accuracy and segment patients by risk levels.
 - Designed dashboards in Power BI to visualize no-show probabilities and clinic-level patterns, supporting data-driven adjustments in scheduling and patient outreach strategy.
 - Deployed automated pipelines in Azure ML Studio and used Twilio API to trigger WhatsApp or IVR-based reminders, improving appointment attendance and operational efficiency.

EDUCATION

- Masters in Information Quality**

Aug 2023 - May 2025

University of Arkansas at Little Rock | Little Rock, Arkansas
- Bachelors in Electronics and Communication Engineering**

Jul 2018 – Jun 2022

TKR College of Engineering and Technology | Hyderabad, Telangana
