SUMMARY

Data Scientist with more than 2 years of experience in Python, SQL, and cloud/BI tools to build machine learning models, ETL pipelines, and dashboards. **Graduated in June 2025** with focus on real-world data solutions. **Open to start immediately.**

EXPERIENCE

Data Scientist (Capstone) January 2025 – June 2025
Washington Department of Fish and Wildlife Seattle, WA

- Processed and merged **250K+ biological and sensor records** using **Python-based ETL workflows**; prepared clean and analyzable data for modeling crab shell condition.
- Built and tuned **Random Forest, GAM, and Balanced RF models**, achieving **92% accuracy** and **0.78 F1 score**.
- Developed an **R Shiny dashboard** used by **5+ stakeholders** to support data-driven decisions in **4 fisheries regions**.

Data Analyst Intern June 2024 – June 2025
Seattle University Seattle, WA

- Designed a centralized **MS Access database** and **Tableau dashboard** analyzing **10 years of enrollment data**.
- Identified **15+** high-demand programs through trend analysis, supporting targeted outreach.
- Delivered insights that drove a **30% increase** in study-abroad participation.

Data Scientist June 2022 – September 2023
360Customizer Pune, India

- Engineered a K-Means model** to segment customers by behavior, increasing average cart size by **18%**.
- Ran A/B tests** on the homepage and CTA layout, boosting the engagement of the featured product by **12%**.
- Analyzed 50K+ customer records** using **Python and SQL** to uncover key retention drivers.

SKILLS

- Languages & Tools:** Python, R, SQL (MySQL, PostgreSQL, PL/SQL), Git
- Machine Learning & Modeling:** Random Forest, XGBoost, Clustering (K-Means), CNNs, Regression, Classification, NLP
- Data Engineering & Analytics:** ETL Pipelines, Data Cleaning, Feature Engineering, Statistical Analysis, Hypothesis Testing, A/B Testing, MongoDB, Hadoop, Spark, PySpark, Databricks, ArcGIS
- Visualization & BI:** Tableau, Power BI, R Shiny, Looker, Excel, Google Analytics, Google Tag Manager
- Cloud & Platforms:** AWS (S3, Lambda, Redshift), GCP, Docker
- Libraries & Tools:** scikit-learn, TensorFlow, Keras, Librosa, BeautifulSoup, Selenium

PROJECTS

Bird Species Classification using Neural Networks – Python, TensorFlow, Librosa March 2025 – June 2025

- Designed and trained **CNNs** using **TensorFlow/Keras** on spectrogram data, reaching **98.6% binary** and **81% multi-class** accuracy across 12 bird species.
- Applied dropout and hyperparameter tuning** to improve generalization, **reducing overfitting by 15%**.

Youth Drug Use Analysis – Python, Machine Learning January 2025 – March 2025

- Trained tree-based classifiers (**decision tree, bagging, and random forest**) on national survey data, achieving **88.2% (binary)**, **86.4% (multi-class)** accuracy, and **MSE of 2.21 (regression)**.
- Identified **10+** key demographic and behavioral predictors to inform **targeted public health** recommendations.

EDUCATION

Master of Science in Data Science, Seattle University September 2023 – June 2025
Bachelor's in Electronics and Telecommunication (Honors in Data Science), Pune University June 2017 – June 2022

LEADERSHIP

Vice President of Marketing & Communication June 2024 – June 2025
Graduate Student Council, Seattle University Seattle, WA

- Led communications for **1,200+** graduate students and represented them on the **Board of Trustees' Tech Committee**.
