

MOHIT MANJARIA

 mmanjaria9@gmail.com  +1 857-207-7337  Boston, Massachusetts  <https://www.linkedin.com/in/mohit-manjaria/>  [Github](#)

OBJECTIVE

Seeking Summer Intern Opportunities in the field of Data science & Analytics with focus in Machine learning, statistics & AI.

EDUCATION

Northeastern University

Master Science in Data Analytics (Concentration in Statistical modeling)

Boston, MA

April 2021

Mumbai University

Master's in Management Studies (Concentration in Statistics)

Mumbai, India

May 2018

Bachelor of Management Studies (Concentration in marketing)

April 2015

PROFESSIONAL EXPERIENCE

Data Analyst at Here Technologies, Mumbai

August 2015 – August 2019

- **Collaborated** with scrum master and product owner to analyze the blended requirements, understanding user stories i.e. scope of the project, **prioritizing** product backlog, created test cases on **JIRA** assigned to testers.
- Consolidated and standardized unstructured and structured data by applying data mining techniques using **python**
- **Collected, clean, analyzed** data to identify trends to recommend on the process improvement and correlation to produce accurate results
- **Analyzed** business problems using root cause analysis, primary data and secondary data with a proposed solution
- Built an interactive **dashboard** using Tableau to identify the performance of individuals across different business units of HERE.
- Delivered presentations, and reports to help teams to improve their process and make faster better decisions.

TECHNICAL SKILLS

- **Programming Languages:** Python, R, Java
- **Databases:** MYSQL, PostgreSQL
- **Python Libraries:** Scipy, Numpy, Pandas, Matplotlib, NLP, Sklearn, Tensorflow, Keras, NLTK
- **Visualization tools:** Tableau, PowerBI, Qlik Sense, Rshiny, Matplotlib, Seaborn, ggplot2
- **Big Data Technologies:** Azure, Hadoop, Map Reduce, Pig, Hive, HBase, Spark, Scala
- **IDE and Tools:** Git, PyCharm, Jupyter Notebook, Anaconda, Google Colaboratory

CERTIFICATES & ACHIEVEMENTS

- **Here Technologies** - Innovation Recognition (August 2018) – *'Achieving good metrics in the project which ultimately drives down cost and outstanding Participation and invaluable contribution to innovation.'*
- Kudos Award (April 2017) – *'For walking an extra mile project enhancement of Quality'*
- HERE Lean Six Sigma Certified white belt
- Python for Data Science and Machine Learning
- Agile Project Management

ACADEMIC PROJECTS

Movie Recommendation System

March 2020 – April 2020

- Build recommendation system by applying demographic, content based, collaborative filtering to movies dataset
- Computed pairwise similarity by using **TF-IDF** vectorizer for building plot-based recommender
- Computed movies similarity based on numerical quantity using **cosine similarity**

Predicted the large item sales for Walmart Data (R platform)

February 2020 – March 2020

- Cleaned the data and summarized through Exploratory Data Analysis to understand data
- Calculated the correlation between all features to find which feature influences dependent variable sales.
- Calculated variances with **hypothesis testing** and lasso regularization(clustering) to find predictors, patterns of purchasing behavior

Predicted weather forecasting and stock price

January 2020 – February 2020

- Visualized, Stationarised **Time series analysis** and found the optimal parameters to train the **ARIMA** model by ACF and PACF plots
- Determined the series is stationary or not by **ADF** (Augmented Dickey-Fuller) Test

Predicted the best investment using linear regression

January 2020 – February 2020

- Developed a **linear regression model** in python to identify the best investment for ecommerce store
- Measured performance on test set using RMSE

Bank Note Authentication

December 2019 – January 2020

- Utilized **DNN** classifier to predict authentication of banknote
- Compared DNN with Random Forest Classifier that has resulted in better precision and recall

Opinion mining by sentiment analysis

January 2020 – February 2020

- Build the sentiment analysis model to categorize words based on the sentiments
- Determined Different polarities and utilized pre-processed chats by applying **NLP** Techniques

EXTRACURRICULAR ACTIVITIES

- Volunteer Experience at Breakfast Club in Northeastern University January 2020 - Present
- Volunteer Experience – At HERE Technologies April 2018 – May 2019
