EDUCATION

State University of New York at Binghamton

Master of Science in Computer Science, Minor in Cloud Computing

Binghamton, NY

May 2024

University of Mumbai

Bachelor of Engineering in Information Technology

Mumbai, India

June 2019

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, Dart, Swift, Python, SQL, NoSQL, HTML/CSS

Frameworks: Spring Framework, Spring MVC, Hibernate, Kafka, React, Redux, Flutter, SwiftUI, Django, Flask

Testing Tools: JUnit, Mockito, Jest, XCTest, Nimble, Instruments

Databases: Oracle, MongoDB, PostgreSQL, MySQL, DynamoDB, Amazon RDS, Firebase, Core Data

Cloud Technologies: AWS, Azure, Git, Docker, Kubernetes, GitLab, Jenkins, FastLane, Terraform, Ansible

Skills: Full Stack Software Engineering, Machine Learning, Agile full software development lifecycle, System Design

Certifications: Microsoft AZ-204: Azure Developer Associate

EXPERIENCE

Software Engineer Research Intern

August 2022 - Present

SUNY Binghamton University

Binghamton, NY

- Transformed legacy software into a modern web application, enhancing operational efficiency by 75%
- Led a team of 4 developers through **Agile** SDLC, overseeing system design, coding, testing, documentation & user story refinement, ensuring timely delivery of critical milestones & achieving a 35% project efficiency
- Architected scalable service-oriented Core **Java 11 Spring Boot micro-services** & integrated with **React & Next.js** server-side rendering, reducing server response time by 30% & initial page loading by 24%
- Integrated back-end technologies with **Amazon RDS Oracle RDMS**, optimizing data storage and retrieval processes ensuring seamless interaction between the application & database layers
- Deployed **Docker** containers on **AWS EC2** using **GitLab** CI/CD pipelines, enhancing infrastructure scalability & maintenance

Junior Software Developer - iOS

August 2021 - January 2022

6DegreesIT

Indore, India

- Developed & launched **3 iOS & macOS** applications using UIKit, Swift, Storyboard, & SwiftUI, enhancing user experience through efficient **MVC** architecture
- Enhanced app performances in **Unix environments** by 20% using Instruments to fix memory leaks
- Worked with the QA team to conduct unit, integration, and regression testing, reducing 20% defects and bugs
- Facilitated meetings with key stakeholders & business units to gather requirements, translating business needs into technical specifications using Test Driven Development

Python Developer

July 2020 - December 2020

Semusi Technologies

Delhi, India

- Built a 91% accurate machine learning churn predictive model leveraging **KNN & Random Forest algorithms** effectively predicting user retention for smart mobile applications
- Performed **ETL** processes for data migration from **MongoDB** to **PostgreSQL** using custom Python scripts
- Optimized **SQL** queries for streamlined data retrieval & improved model performance on over 20 million records
- Developed Flask **REST** APIs & **SQLAlchemy** integrated with **Apache Kafka**, enabling real-time analytics that accelerated data processing and supported strategic decision-making

PROJECTS

Safe Ride Shuttle App | gRPC, Spring Boot, Flutter, Dart, Google Cloud Platform

- Built ride-hailing Flutter apps for the Transportation department of the university to ensure student safety
- Implemented Java gRPC microservices, utilizing Protocol Buffers significantly improving communication speed
- Integrated Google Maps SDK & Geolocator API for real-time location tracking & map rendering
- Leveraged Firebase Real Time Database for low-latency synchronization of profiles, ride queues, & geolocation

Serverless Text-to-Speech | Node.js, AWS Lambda, Amazon Polly, DynamoDB, S3, CloudFront

- Engineered a serverless text-to-speech Chrome extension as part of a Cloud Computing specialization
- Created the Node.js extension integrated with Lambda & Amazon Polly, allowing direct in-page conversion
- Implemented AWS DynamoDB and S3 for efficient, scalable data storage and retrieval
- Configured AWS Lambda with AWS API Gateway & SNS for improving monitoring & function notifications
