EDUCATION

University of New Orleans | New Orleans, Louisiana

B.S. in Computer Science | GPA: 3.9

December 2024

Relevant Courses: Software Engineering, Software Design, Data Structures, Mobile Apps Dev, Databases, Algorithms, Networks, AI

SKILLS

Programming Languages: Java, Python, JavaScript, HTML, CSS, SQL, C, C#, C++

Frameworks & Libraries: React-Native, React, JUnit, .NET, NumPy, SQLAlchemy, Pandas, PyTorch, TensorFlow

Developer Tools: Docker, pgAdmin, PyCharm, Visual Studio Code, Eclipse, Jupyter Notebook, Sublime, PostgreSQL, Git

Cloud Technologies: AWS, Azure

RELEVANT EXPERIENCE

Software Engineer Intern | Southern Poverty Law Center | Montgomery, Alabama

June 2024 – August 2024

- Collaborated with cross-functional teams, including Software Engineers and stakeholders, to analyze and document business requirements, evaluate systems, resolve application issues, and implement solutions to enhance functionality and performance.
- Developed and maintained application code and databases using technologies like Docker, Python, pgAdmin, and Azure, while gaining hands-on experience with Agile methodologies, including daily stand-ups, sprints, and Program Increments (PIs).

Software Engineer Intern | Treevah | Chicago, Illinois

January 2025 – March 2025

- Designed, developed, and refined scalable web and mobile applications using React and React Native, focusing on delivering optimal performance and user experience.
- Collaborated with a startup team to implement innovative software solutions, including cloud-based file management systems on Azure, while leveraging advanced front-end skills in HTML, CSS, and JavaScript.

PROJECTS

Comic Finder Mobile Application | JavaScript, React-Native

December 2023

- Led development of a mobile app to search and organize comic books using JavaScript, React Native, and API integration; implemented user accounts, search, and list features with custom UI, navigation, and React hooks like useState and useReducer.

Touchless Kiosk System | Python, SQL

December 2024

- Developed a touchless kiosk system for a class-wide project with LEAP motion integration and Raspberry Pi for campus-wide use, enabling gesture-based interaction for events and tasks; designed and implemented a Python-based database using SQLAlchemy to ensure seamless integration with the project's Python codebase, collaborating with a team to deliver a consistent and scalable solution for an innovative user experience.

CERTIFICATES

SAFe (Scaled Agile Framework) Certified

July 2024

Microsoft Certified: Azure AI Fundamentals

April 2025

Microsoft Career Essentials in Software Development Certified

May 2025

Microsoft Career Essentials in Business Analysis Certified

June 2025

Microsoft Career Essentials in Data Analysis Certified

June 2025
