Proven track record in increasing profitability, enhancing financial accuracy, and delivering real-time dashboards. Proficient in Python, SQL, Tableau, and Excel, with strong knowledge of AI tools and cloud-based technologies.

Core Strengths

- Financial Planning & Analysis (FP&A)
- Forecasting & Data Modeling
- KPI & Performance Reporting
- Automation & Workflow Optimization
- SQL, Python, Tableau, Excel
- AWS, ETL Pipelines, Risk Analysis
- Business Strategy & Communication

Professional Experience

CharaChorder LLC – Frisco, TX

Financial Analyst | May 2022 – Present

- Led cross-functional financial initiatives using Microsoft Teams and Jira, supporting growth and process improvement.
- Maintained accurate bookkeeping and financial records using QuickBooks and Excel.
- Created balance sheets, income, and cash flow statements in Excel and Tableau to support data-driven decisions.
- Assisted tax consultants with return preparation using TurboTax and Lacerte, ensuring compliance with current tax laws.
- Contributed to budgeting and forecasting processes using Excel and Google Sheets.
- Analyzed financial trends and variances using Tableau and Power BI to identify optimization opportunities.
- Developed and documented accounting policies in Confluence to maintain regulatory compliance.

- Conducted account reconciliations, investigated discrepancies, and maintained audit readiness using Excel and SharePoint.
- Built Tableau dashboards and Excel models to support executive decision-making.
- Strengthened internal financial controls with audit tools, mitigating operational risk.
- Supported special projects and delivered ad hoc financial analyses using Python, R, and SQL.

Samsung Electronics America – Plano, TX

Data Analyst / Mar 2020 – May 2022

- Automated workflows in Alteryx to streamline financial reporting and analysis.
- Delivered monthly performance reports that influenced strategic partnerships and contract renewals.
- Conducted risk and profitability analyses to support business expansion.
- Built NLP-powered tools for customer feedback analysis to improve service delivery.
- Designed Tableau dashboards visualizing regional sales performance by carrier.

CharaChorder LLC – Atlanta, GA (Remote)

Freelance Data Scientist / Jul 2019 – May 2022

- Built BI dashboards and SQL data models to monitor user behavior and engagement.
- Deployed an adaptive typing game using React and AngularJS hosted on AWS.
- Conducted data mining and statistical modeling in R to generate business insights.

Darwin Ecosystem LLC – Dallas, TX

Data Scientist / Jul 2018 – Oct 2019

- Built ARIMA and LSTM models for market prediction and financial risk profiling.
- Developed AI chatbots and NLP applications using Python and IBM Watson.
- Migrated legacy analytics systems to AWS and built real-time dashboards.
