

Monika Dhukia Business Data Analyst

monikad.analyst@gmail.com | (628) 758-2736 | USA | [LinkedIn](#) | [GitHub](#)

Summary

Results-driven Business Data Analyst with 7+ years of experience in transforming complex data into actionable insights to support strategic decision-making. Proficient in SQL, Python, R, data visualization, statistical analysis, and cloud platforms like AWS and Azure. Experienced in data cleaning, validation, ETL pipelines, requirements gathering, business process modeling, stakeholder management, and report automation. Strong communicator and problem solver committed to improving data quality, driving business growth, and optimizing operational efficiency.

Technical Skills

- **Data Querying & Management:** Advanced SQL (complex joins, CTEs, window functions), Data Warehousing, Data Modeling
- **Programming & Statistical Tools:** Python (Pandas, NumPy, SciPy), R (clustering, statistical analysis), SAS
- **Data Engineering & Cloud Platforms:** AWS (Athena, Glue, DataBrew), Azure (Data Factory, Databricks), ETL pipeline design, Data Integration
- **Data Visualization & Reporting:** Power BI (DAX, KPI dashboards), Tableau (LOD expressions, dynamic filtering), Excel (pivot tables, macros)
- **Data Quality & Validation:** Data cleansing, anomaly detection, automated validation frameworks, data governance
- **Business Analysis & Process Improvement:** Requirements elicitation, stakeholder engagement, JAD sessions, process mapping (Visio), workflow optimization
- **Project & Agile Methodologies:** Agile frameworks (Scrum, Kanban), backlog management, user story creation, cross-functional collaboration
- **Soft Skills:** Critical thinking, problem-solving, effective communication, presentation skills, decision support, change management

Professional Experience

Business Data Analyst, Payoneer

10/2024 – Present | Remote, USA

- Collaborated cross-functionally with product, BI, and marketing teams using agile methodology to translate business requirements into actionable data solutions, improving targeting strategies through advanced customer segmentation and behavioral analysis for cross-border SMBs.
- Facilitated stakeholder workshops and requirements gathering to map business processes, identify pain points, and translate needs into actionable analytics projects, prioritizing initiatives that aligned with strategic goals and improved customer acquisition.
- Designed and executed optimized SQL queries leveraging CTEs and window functions on AWS Athena, processing 85%+ of historical transaction data across structured and semi-structured formats (Parquet, CSV) to support strategic business decisions.
- Conducted RFM and cohort analyses to identify key customer segments, revealing that 62% of SMBs fall into four high-value clusters, directly informing customer retention and growth strategies based on transaction behavior and churn patterns.
- Utilized Python (NumPy, Pandas, SciPy) for comprehensive data preparation, cleaning, and time-series analysis, including Z-score based outlier detection to identify seasonal trends, enhancing the accuracy of business forecasting models.
- Implemented rigorous data validation frameworks using AWS Glue and DataBrew, establishing automated quality checks across ETL pipelines, ensuring 98%+ data integrity, thereby increasing trust in business-critical metrics and reducing operational risks.
- Developed and maintained interactive Power BI dashboards with advanced DAX-driven KPI cards, drill-through filters, and dynamic slicers, enabling real-time segment-level revenue tracking and delivering a 37% uplift in targeted marketing efficiency through data-driven insights.
- Presented analytical findings and strategic recommendations to senior stakeholders, enabling informed decision-making that improved customer acquisition, retention, and overall business performance.

Business Data Analyst, Dell Technologies India

02/2021 – 12/2023 | Remote, India

- Partnered closely with Sales, Marketing, and BI teams in agile environments to facilitate detailed requirements gathering and stakeholder interviews, uncovering regional market insights and defining actionable strategies for market expansion across India.
- Streamlined data integration and ETL workflows using Azure Data Factory and Azure Databricks, improving data processing efficiency by 30% and ensuring reliable, high-quality data from SAP, Salesforce, and CRM ERP systems for business analysis.
- Directed wide stakeholder analysis and facilitated JAD (Joint Application Development) sessions to gather and validate business requirements. Created detailed use cases, process flow diagrams (using Visio), and requirement traceability matrices to ensure alignment with business goals and support agile delivery.
- Conducted advanced time-series and cohort analyses using Python (Pandas, NumPy) to identify sales growth trends and customer purchasing patterns by region, enabling targeted marketing initiatives that increased sales revenue by 15%.
- Applied R for hierarchical clustering and customer segmentation based on product preferences and purchase frequency, directly informing personalized campaign strategies that boosted customer engagement by 20%.
- Developed and optimized SQL queries on Azure SQL Database to extract and transform complex datasets, supporting data-driven decision-making with timely and accurate sales performance reports.
- Led data quality assurance processes via Azure Data Factory pipelines and Databricks notebooks, implementing validation rules that reduced data errors by 25%, ensuring dependable analytics inputs.
- Designed and delivered interactive Tableau dashboards with dynamic filters, calculated fields, and Level of Detail (LOD) expressions to provide granular visibility into regional sales performance, empowering sales leaders to increase market share by 10%.
- Conducted business process mapping and workflow analysis to identify inefficiencies and recommend improvements in sales data management and reporting processes, facilitating more agile and informed decision-making.

Assistant Manager, HDFC Bank

10/2017 – 01/2021 | Haryana, India

- Automated financial and CRM data reports using Excel, enabling efficient identification of discrepancies. This improved reporting accuracy, streamlined operations, and provided insights to support targeted cross-selling plans and business planning initiatives.
- Conducted in-depth analysis of financial data to optimize reporting workflows. Enhanced reporting efficiency and facilitated better decision-making by delivering actionable insights, helping the team align with strategic goals and improve client engagement.
- Managed daily client communications and reporting processes, reducing issue escalations by 20%. Ensured timely delivery of accurate reports, which contributed to increased customer satisfaction and supported stronger client relationship management.
- Reinforced collaboration between departments by providing precise data reports and timely updates. Played a key role in enhancing overall data accuracy, leading to improved operational efficiency and support for informed, data-driven business decisions.

Education

San Francisco Bay University — Fremont, CA, USA

Master of Science in Computer Science

02/2024 – 05/2025

Kurukshetra University — Kurukshetra, India

Bachelor of Technology in Computer Science

07/2010 – 06/2014
