

MONIKA SANGEM

(515) 815-4662 | monikasangem17@gmail.com | www.linkedin.com/in/monika-sangem-9a0a28156

PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Analyst with over 2 years of experience in financial and operational reporting, data pipeline development, and KPI optimization. Skilled at translating complex data into actionable insights via SQL, Python, Tableau, and Power BI. Strong communicator experienced in collaborating with cross-functional teams, conducting variance analysis, and developing financial models to drive performance improvements.

EDUCATION

Iowa State University, Ames, Iowa | CGPA: 3.74/4

Master of Science in Information Systems with Business Analytics certification (STEM)

August 2022 – December 2024

University College of Engineering, Osmania University, Telangana, India | CGPA: 8.43/10

Bachelor of Engineering in Electrical and Electronics Engineering

August 2015 - April 2019

TECHNICAL SKILLS

Analysis & Reporting: Financial Modeling, Budget vs. Actual, Variance Analysis

Tools & Languages: Excel (Pivot Tables, Power Query, Macros), SQL, Python, R

BI & Visualization: Tableau, Power BI, Metabase

Cloud & ETL: Snowflake, Azure Data Factory, Databricks, DBT, Oracle SQL Developer

Concepts: Data Cleaning, KPI Development, Data Governance, A/B Testing, Dashboard Optimization

WORK EXPERIENCE

Data Engineer Intern at MidAmerican Energy Company (Berkshire Hathaway Energy)

May 2024 - present

- Built ETL pipelines and automated workflows using **ADF** and **Databricks** to support financial reporting and date-sensitive analyses
- Extracted, cleaned, and validated large datasets with **SQL** and **Python** to ensure accuracy in regulatory dashboards.
- Created self-service dashboards in Power BI for finance and operations teams to monitor key performance indicators and trends.
- Migrated backend data flows from **Azure SQL instance to OCI** using Oracle Data Integrator, increasing pipeline efficiency by 40%.
- Conducted variance analysis and provided insights on budget trends and cost drivers to departmental leaders.

Application Development Associate at Accenture Solutions Pvt. Ltd.

September 2019 – October 2021

- Led Oracle EBS R12 procurement implementations—including configuration, SIT/UAT, and go-live support—ensuring smooth financial system rollouts.
- Developed automated SQL reports and scripts that **reduced manual reporting time by 40% and enhanced accuracy**.
- Managed integrations between external systems and Oracle EBS 11i to support streamlined operations and data reliability.
- Resolved recurring system issues through root-cause analysis and process automation, improving service levels.

ACADEMIC PROJECTS

Yelp Customer Reviews - Big Data Analytics (ADF, SQL, Python, R, Power BI)

August 2023

Transformed raw JSON reviews into clean tables via SQL and Python before conducting sentiment analysis.

Visualized customer trends in Power BI to support strategic decision-making.

AWS Redshift – Data Warehousing Project (Airflow, S3, Redshift, SQL)

April 2024

Automated ingestion of structured financial data into Redshift with Airflow. Created schemas and performed validation to prepare data for budgeting and forecasting dashboards.

Formula 1 Analytics Project (ADF, Databricks, Power BI)

April 2025

Designed ETL pipelines and dashboards to track telemetry data, KPIs, and pit performance, mirroring high-frequency financial dashboarding needs.

CERTIFICATIONS

Power BI Essential Training – LinkedIn Learning (Feb 2025)

Formula 1 Project for Data Engineers – Udemy (Apr 2025)

Business Analytics Certification – Iowa State University (Dec 2023)
