Summary

AI Engineer with 5+ years of Python experience, skilled in deploying scalable ML systems and end-to-end AI apps using Docker, REST APIs, AWS, and LLMs.

Education

San Jose State University

San Jose, CA

Masters of Science in Applied Data Science

Aug. 2023 – May 2025

- **Relevant Coursework:** Machine Learning, Deep Learning, Artificial Intelligence, Data Mining, Database Systems, Data Visualization, Mathematics for Data Science

Jawaharlal Nehru Technological University

Hyderabad, India

Bachelors of Technology in Electronics Engineering

Aug. 2016 – Aug 2020

- **Relevant Coursework:** Data Structures and Algorithms in Python, Statistics, IoT, Computer Networks, C, Java

Experience

AI Engineer – Founding Team

Dec 2024 – Present

CodersGenie

San Jose, CA

- Fine-tuned **LLMs** (GPT, LLaMA, Mistral) and built **agentic AI workflows** using **Python/Django, PyTorch**, and **FastAPI**, boosting production accuracy by **85%**.
- Designed **full-stack AI solutions** from backend models to **React.js/TypeScript** frontends, integrating **REST/GraphQL APIs** with **MongoDB, AWS**, and Kubernetes (Helm) deployments.
- Defined **API contracts and data models** for scalable features, implemented unit/integration/E2E tests, and optimized system performance and monitoring.
- Collaborated in an **agile environment** with Git and Jira, mentored junior developer

Software Engineer - ML

Jun 2022 – Jul 2023

Certa.ai

Hyderabad, India

- Engineered and optimized **20+ RESTful APIs** in **Python/Django, Go**, and **Ruby on Rails** to support ML-driven services, reducing latency by **40%** in enterprise integrations.
- Developed and deployed **ML-powered applications**, including **NLP-based support bots** and recommendation pipelines, and integrated them with **React.js** dashboards and **Elasticsearch** for real-time insights.
- Led **ML product adoption & scaling** by documenting engineering processes, creating training resources, and establishing performance benchmarks to ensure reproducibility and smooth cross-team adoption.

Software Engineer – ML

Jan 2021 – Jun 2022

Tata Consultancy Services

Hyderabad, India

- Created **MLOps pipelines** in **Python, SQL, Airflow**, and **Docker** to automate ML model refresh cycles and maintain system scalability.
- Deployed **large-scale data pipelines** (10TB+) using **MongoDB** and **Elasticsearch**, improving inference and analytics workflows.
- Built and maintained **GraphQL/REST APIs**, designed data models, and implemented dashboards for engineering and business teams.

Projects

AI-Powered Personal Assistants for Specialized Industries – *Python, LLMs, RAG, LangChain, Streamlit* – GitHub

- Developed domain-specific assistants using LLMs and RAG to streamline workflows in Legal and Healthcare sectors.

Publications

- **An Outlook on the Status of Security Performance in the Light of Intelligence** – Google Scholar
- **How Machine Learning Can Be Used to Improve Predictive Analytics** – Google Scholar

Technical Skills

Data Analysis & Visualization Tools: SQL, PostgreSQL, Python PySpark, Power BI, Tableau, MS Excel, AWS, GCP

Technical Expertise: LLM Fine-Tuning, Machine Learning, Deep Learning, Statistical Modeling, MLOps, Feature Engineering, RAG, Prompt Engineering

Functional Expertise: Experimentation, Visualization, Cross-Functional Collaboration, Stakeholder Communication
