

Monisha Gajendra

+1 (602)-576-7983 | mgajend1@asu.edu | <https://www.linkedin.com/in/monisha-gajendra/> | Tempe, AZ, USA (willing to relocate)

SUMMARY:

Results-driven Software Engineer with 3+ years of experience in building secure, scalable, and high-performance distributed systems. Proficient in Java, C++, Python, and SQL with strong expertise in cloud infrastructure (AWS), AI/ML frameworks, and software architecture. Skilled in multithreaded programming, data structures, and algorithms. Proven track record in developing AI-driven solutions and optimizing system architectures for enhanced performance and security.

EDUCATION

Arizona State University, *Master of Computer Science*

Tempe, AZ | May 2025

Courses: Software Security, Information Assurance & Security, Data Visualization, Cloud Computing, Data Structure and Algorithms, Software Engineering, , Software Engineering, Foundation of Algorithms, Advanced Operating Systems

Graduate Teaching Assistant : Computer Networks

RNS Institute of Technology

India | Aug 2020

B.E in Computer Science & Engineering

TECHNICAL SKILLS

- **Programming Languages:** Python , Java (Java 17), C, C++, Go, Shell
- **AI/ML Frameworks:** PyTorch, JAX, TensorFlow
- **Frameworks & Tools:** Spring/Spring Boot, REST, OAuth, Unix/Linux, Terraform, Kubernetes
- **Databases:** MySQL, Postgres, Redis, DynamoDB, NoSQL
- **Cloud & Infrastructure:** AWS (EC2, S3, RDS, Lambda), Terraform, Cloud Formation Templates
- **Messaging & Logging:** Kafka, SQS, RabbitMQ, ELK (Elastic Search, Logstash, Kibana)
- **Software & Tools:** Git, Jira, Jenkins, MS Suite

EXPERIENCE

SENIOR SOFTWARE ENGINEER | *Comviva*

Dec 2022 – July 2023

- Led the design and optimization of AI/ML models for fraud detection, integrating over 25 APIs using **Spring Boot**, resulting in a **25% improvement in detection accuracy**.
- Automated large-scale data extraction and preprocessing pipelines using **Python**, reducing data processing time by **30%** and enhancing model training efficiency.
- Contributed to **multithreaded/multi-core programming** and optimization of AI libraries, improving algorithm performance and system reliability.

SOFTWARE ENGINEER | *Zenda*

Mar 2022 – July 2022

- Optimized **high-concurrency key-value storage systems (Redis)** and **relational databases (PostgreSQL)**, resulting in a 20% boost in system performance.
- Designed and implemented **RESTful APIs**, integrating Kafka and SQS for enhanced logging and messaging, improving system efficiency by **40%**.

SOFTWARE DEVELOPER | *Empower*

Oct 2020 – Mar 2022

- Spearheaded AWS cloud infrastructure migration using **Terraform**, optimizing compute environments and reducing costs by 25%.
- Ensured data integrity and high availability in a high-traffic chat application, achieving a **99.9% message delivery rate** through robust **microservice architecture**.

PROJECTS

AI-Driven Personalized Medicine: Python

- Improved patient outcomes by 20% through optimized treatment plans using logistic regression and neural network models in Python..

Music Genre Classification and Prediction of User Behavior: Python/Flask

- Boosted user engagement by 87.4% through accurate music genre classification and user behavior prediction using CNN-based models with Python/Flask.
