PROFESSIONAL SUMMARY

Versatile Full-Stack Software Engineer with expertise in React, Angular, .NET/C#, SQL, and RESTful API design. Skilled in building scalable, high-quality web applications from concept to deployment. Strong background in component-based UI development, database architecture, and cloud-integrated systems. Experienced in Agile teams, cross-functional collaboration, and incorporating modern tools like Figma and AI-assisted development to accelerate delivery and improve user experience.

TECHNICAL SKILLS

AI & Machine Learning: OpenAI APIs, ChatGPT, Python for AI, Prompt Engineering
Frontend Development: React.js, Angular, JavaScript, TypeScript, HTML5, CSS3, Next.js, Bootstrap, Chakra UI, Material-UI, Daisy UI, Fluent UI, Chart.js, JQuery, JSX, AJAX
Backend Development: .NET Core, C#, Web API, RESTful API, ASP.NET, Entity Framework, SendGrid
Database & Data Engineering: Microsoft SQL Server, PostgreSQL, MongoDB, T-SQL, SSIS, Supabase, MongoDB Atlas, PgAdmin 4
Cloud & DevOps: AWS, Azure DevOps, AWS Cognito, Amazon S3, Azure Blob Storage, Secure File Transfer Protocol (SFTP)
Development Tools: GitHub, Jira, Postman, Trello, Visual Studio Code, Visual Studio 2019, Pycharm, Slack, Figma, NPM/YARN, Chrome Developer Tools, TeamWork, AirTable, Expo
Agile Methodologies & Collaboration: Agile, Scrum, Kanban, Daily Stand-ups, Peer Code Reviews, Cross-Functional Teamwork

PROFESSIONAL EXPERIENCE

Provoke Solutions

Software Engineer | Dallas, TX | *Nov 2022 – Aug 2024*

Provoke Solutions is an end-to-end technology services firm founded in 2001, specializing in AI-accelerated digital product development. The company leverages its patent-pending KNOVVA platform and expertise in UX, data engineering, and cloud architecture to deliver faster, smarter solutions across multiple global offices.

Key Projects & Achievements:

- **Ministry of Primary Industries (NZ) – BioSecurity Portal**
Delivered a real-time Container Checks web portal enabling inspection reports within 48 hours—supporting MPI's mandate of 100% container traceability. Contributed to faster container clearance (1–2 days per vessel vs. up to a week) and data pipelines managing ~10K biosecurity alerts and thousands of annual lab tests.
- **Generation Labs (Biotech Client)**
Delivered MVP of a health tracking portal for users of the SystemAge™ epigenetic test, supporting continuous monitoring of 460+ biomarkers across 19 organ systems.
 - Built core features adopted by 150+ clinics for delivering personalized, longitudinal health reports

- Collaborated with founding team to meet tight timelines ahead of 2024 launch
- Developed intuitive UI and backend integrations for seamless test-to-portal continuity
- **Microsoft – SharePoint Embedded Demo**
Refactored Microsoft's SharePoint Embedded demo into a streamlined standalone app, integrating Microsoft 365 document management APIs.
 - Implemented secure file storage, version control, and Office Web integration
 - Improved app performance and structure in line with Microsoft's embedded UI/UX best practices
- **Internal Hackathons (2023–2024)**
Created AI-driven prototypes for internal innovation showcases, focusing on rapid iteration and cross-functional collaboration.

Technical Contributions:

- Built reusable components in Angular and React to streamline development across enterprise and biotech projects
- Developed single-page AI demo sites for client and internal presentations
- Integrated modern UI libraries (Material UI, Chakra, Daisy UI) for rapid, consistent design
- Gained hands-on experience with Figma, designing and prototyping UIs for internal AI tools

BigDBM

SQL Server Developer | Surfside, FL | *September 2021 - November 2022*

BigDBM (founded 2016, Surfside FL) is a data infrastructure and analytics firm specializing in high-quality B2B & B2C identity graphs. With over 7 years in operation, they offer real-time intent signals and behavioral data—covering 140 M+ individuals, 50 M+ daily devices, and 12 B+ behavioral data rows—to drive targeted marketing and actionable insights.

- Managed import/matching/updates of large datasets, delivering accurate results to clients monthly through automated pipelines.
- Leveraged SQL + SSIS + SFTP/S3 to streamline complex data exports and ensure secure, compliant delivery.
- Extracted and compiled high-quality datasets driving insights from BigDBM's 12 billion-row identity graph (140 M+ individuals across 80% of U.S. web traffic).
- Identified inefficiencies, restructured data processes—cutting query runtimes and increasing workflow efficiency.
- Collaborated with senior developers and international teams to enhance product management and maintain high-quality analytics deliverables.

TypeBeat

Full Stack Developer | Los Angeles, CA | *January 2021 - August 2021*

TypeBeat is a small Los Angeles–based digital marketplace (11–50 employees) that enables music producers and composers to sell and license instrumental “type beats” mimicking popular artist styles

- Enhanced landing and search UI to support dynamic discovery of type beats in a niche \$B-scale music marketplace.
- Created infinite-scroll carousels and query-based search routing to improve beat discoverability and engagement (SEO-driven model).
- Built robust RESTful .NET APIs and relational database pipelines in SQL Server, enabling efficient beat licensing and delivery.
- Integrated SendGrid-driven email workflows for automated user notifications and beat operations.

PROFESSIONAL DEVELOPMENT

AI & Machine Learning

- ChatGPT Prompt Engineering for Developers – DeepLearning.AI (*Completed*)
- Fundamental AI Concepts – Microsoft Learn (*Completed*)

Python for AI Development

- Basics of AI Python Coding – DeepLearning.AI (*Completed*)
- Automating Tasks with Python – DeepLearning.AI (*Completed*)
- Working with Your Own Data & Documents – DeepLearning.AI (*Completed*)
- Extending Python with Packages & APIs – DeepLearning.AI (*Completed*)

Cloud & DevOps

- MultiCloud, DevOps & AI Intensive – The Cloud Bootcamp Platform (*Completed*)

EDUCATION

Vanguard University of Southern California
Bachelor of Arts, Communications
