

Professional Summary

Data Engineer / Data Analyst with expertise in SQL, Python, and Power BI, with hands-on experience in building and optimizing ETL pipelines, data warehouses, and dashboards. Skilled in data modeling, data governance, and reporting, with growing knowledge of Azure Databricks and Cloud-based data platforms. Strong ability to collaborate with engineers, analysts, and stakeholders to deliver reliable, high-quality data solutions.

Skills

SQL (Data Warehousing, ETL Optimization)
Python (Pandas, NumPy, SQLAlchemy, Matplotlib)
Power BI, Tableau, Excel
Data Pipeline Development (ETL/ELT, Automation)
Data Modeling (Star Schema, Snowflake Schema)
Data Governance & Quality Assurance
Cloud Platforms: Azure Databricks, Azure Data Lake (learning)
Database Performance Tuning and Optimization

Work Experience

Data Analyst & Planning Manager

Moallem Insurance Company – Tehran, Iran | 2017 – 2025

- Designed and optimized ETL processes for integrating data from multiple sources.
- Built and maintained data warehouses and analytical structures for business reporting.
- Developed automated reporting workflows and data pipelines using SQL and Python.
- Created interactive dashboards with Power BI and Tableau to support data-driven decision making.
- Led data quality management and governance across organizational data systems.

Data Coordinator

Persian Real Estate Developer – Tehran, Iran | 2013 – 2017

- Gathered, cleaned, and transformed raw business data into structured reports.
- Documented business processes, data flows, and system diagrams to support IT teams.
- Analyzed datasets to identify patterns, forecast outcomes, and optimize operations.

Education
