

Mouhamadou Bassirou Bane

Front-End Developer

banebachir596@gmail.com | 551-283-5150 | <http://linkedin.com/in/bachir-bane-024756364> | <https://github.com/bachirbane> | b-my-portfolio.netlify.app

SKILLS & COMPETENCIES

Languages: HTML, CSS, JavaScript, React, Tailwind CSS, Daisy-UI, Node.js, NPM

Technologies: GitHub, Figma, Postman, VS Code

Competencies: Software Development Life Cycle (SDLC), Agile, APIs, Debugging, Leadership, Customer Service

EXPERIENCE

Front-End Developer | Capstone Project – Pinpoint

May 2025

Pinpoint is a web application developed to make legislative and civic data easier to access. It connects a modern user interface to a robust backend, allowing users to:

- Explore interactive maps of local districts
- Follow and view current government bills
- Learn about their elected representatives
- Register, log in, and manage accounts
- Access educational content about political institutions.

Technical Achievements:

- Developed frontend components using React and Vite to display bills, profiles of officials, and navigation, ensuring a responsive design across all devices.
- Integrated an interactive map using Leaflet.js, enabling users to explore geographic districts and access real-time data.
- Implemented secure authentication using JWT and Express.js, with MongoDB for managing users, legislative data, and content.
- Built and tested RESTful APIs with Postman to ensure reliable frontend-backend communication.
- Used Git and GitHub for version control with a structured workflow (branches, pull requests, code reviews).
- Collaborated in an agile team of 3 developers using weekly sprints, daily stand-ups, and Trello for task management.
- Worked closely with mentors and stakeholders to prioritize features and maintain both technical and educational quality.

Manager | Gie Safina Multi Services – Real Estate & Travel - Dakar, Senegal

Jan 2015 – Feb 2019

- Assisted with real estate transactions and negotiated with clients.
- Coordinated travel services and supervised daily operations.

Principal & Arabic Language Teacher | Elementary School El Hadj Oumar Tall - Dakar, Senegal

Oct 2006 – Feb 2015

- Managed a team of 10 teachers and oversaw the education of over 120 students.
 - Promoted from Arabic language teacher to school principal in recognition of leadership and dedication.
 - Facilitated parent-teacher meetings and ensured strong academic performance across the school.
-

EDUCATION

Upright Education – Software Engineering Bootcamp

December 2024 – May 2025

Completed weekly projects during an immersive software development bootcamp.

- Built a real-time chat app using React.js (frontend) and Node.js with Express.js (backend), including user sign-up/login, multiple chat rooms, and message persistence via MongoDB.
- Created an interactive Jeopardy-style game with HTML, CSS, and JavaScript, featuring complete game logic, score tracking, and user interactivity.
- Used Git for version control and focused on writing optimized, maintainable, and user-friendly code across all projects.
