

MOUKTHIKA BOMMAKANTI

Dallas, TX, 75033 | (469) 799-8499 | srimoukthika20@gmail.com | <https://www.linkedin.com/in/moukthika>

Research ■ Data Analysis ■ Analytics and Visualization

Data Analyst with experience in healthcare data analysis and clinical research support. Skilled in data visualization, SQL, and Excel, with a strong interest in advancing research through data-driven insights. Background includes analyzing healthcare datasets, supporting clinical trial workflows, and collaborating with research teams to ensure accuracy, compliance, and meaningful outcomes.

Key Areas of Expertise

Data Analysis – SQL (Joins, Sub-Queries, CTE) – Tableau – Python – NumPy – Scikit Library – Pandas – R
- Microsoft Office (Word, Excel) – TinkerCAD – Data Entry & Validation – Protocol Documentation –
Problem Solving – Testing & Validation – Data Documentation – HL7 – HIPAA Compliance

PROFESSIONAL EXPERIENCE AND CONTRIBUTIONS

SEANERGY.AI

Jan 2025 - Present

Seanergy Digital is a USA based global software solutions company providing digital transformation for enterprises and technology providers by delivering actionable insights and services across various domains.

Data & AI Engineer, Dallas, Tx (Github Link: <https://github.com/mb-seanergy>)

Project 1: Enabling High Quality Data & Insights for Enterprise Decision Support

- Wrote and executed SQL queries to pull datasets, validate data integrity, and troubleshoot discrepancies in business views and KPIs.
- Developed Tableau dashboards to support operational and strategic reporting, improving accuracy of KPIs by 15%.
- Collaborated with cross-functional teams to translate requirements into data-driven insights, supporting business process improvement.
- Participated in sprint reviews and UAT testing cycles to ensure analytics solutions aligned with client expectations.

Project 2: Voice Assistant Development

- Trained in Artificial Intelligence (AI) and Machine Learning (ML), gaining hands-on experience in data preprocessing, model development, and API deployment and worked with Python libraries to analyze datasets.
- Developed and fine-tuned an AI voice assistant for handling freight pickup requests. Integrated the voice assistant with a server-hosted API containing JSON-based request processing logic to capture shipment details, check truck availability, and confirm bookings.
- Engineered API solutions to connect AI models with real-time logistics systems, enhancing efficiency in freight booking and truck availability checks.

RANDOMTREES

May 2024 - Aug 2024

RandomTrees is a data science and AI company focused on developing machine learning models and providing data-driven solutions to enhance business outcomes.

Data Science Intern, Dallas, TX

- Cleaned, standardized and profiled large healthcare datasets from multiple sources, applying SQL to standardize data quality reporting.
- Worked on analytics in project for clients to align with business objectives where I partnered with cross-functional teams to analyze data processes for improved efficiency.
- Applied python and R for statistical modeling and AI-based methods to evaluate drug performance outcomes, aligning with regulatory and business needs.

NORTHEASTERN UNIVERSITY

Jan 2024 - May 2024

Integrated CGM and EHR data to enhance healthcare analytics and enable data-driven clinical decision-making using SQL.

Student, Boston, MA

- Analyzed EHR and CGM data to understand user behavior and outcomes, developing metrics and visualizations to guide academic healthcare projects where I applied SQL queries to clean, transform, and validate large-scale healthcare datasets.
- Conducted pattern analysis and trend detection of CGM technologies including Dexcom G4 Platinum and Apple's HealthKit to identify integration opportunities.
- Conducted requirements analysis and created process documentation to support system enhancements.
- Developed scalable data models to facilitate the integration of CGM data with EHRs, enhancing data accessibility and self-service analytics for healthcare providers.

CASE WESTERN RESERVE UNIVERSITY

Jan 2023 - Jul 2023

Engaged in a project involving Microchip Technology for AI-based testing of Microbes under the guidance and supervision of Dr. Mohamad Draz.

Paper Published: <https://doi.org/10.1039/d4lc00671b>

Research Assistant, Cleveland, OH

- Engaged in a project involving Microchip Technology for AI-based testing of Microbes where I modified the design and implemented cell phone optical attachment for an antimicrobial resistance project using bead settling technology.
- Conducted literature reviews and summarized findings to support ongoing research projects.
- Maintained high-quality data and detailed documentation for research datasets and contributed to data quality assurance and validation processes along with app testing

ANBLICKS INC.

May 2022 - Jul 2022

Anblicks Inc. is a cloud data engineering and analytics company that helps businesses harness the power of data through cloud platforms, machine learning and data – driven insights.

Data Engineering Summer Intern, Hyderabad, IN

- Explored cloud data warehousing solutions (Snowflake) during mock projects, applying data engineering concepts.
- SQL queries and reporting processes to improve product team efficiency.
- Supported data control development and troubleshooting to ensure high-quality outputs.
- Effectively translated client requirements into actionable data solutions, ensuring alignment with project goal

EDUCATION

MS in Bioinformatics, Northeastern University, Boston, MA (2023 – May 2025)
BE in Electronics and Instrumentation, BITS Pilani, Hyderabad, India (2019 – 2023)
