

MOUNIKA GANGAVARAPU

BUSINESS ANALYST

TEXAS, USA | Gangavarapumounika171100@gmail.com | (551) 888-0098 | [LINKEDIN](#)

PROFESSIONAL SUMMARY

- Business Analyst with 4+ years of experience delivering digital transformation projects across healthcare, finance, and retail domains. Skilled in CMS interoperability, HL7 v2/v3, FHIR, USCDI, and HIPAA compliance with strong expertise in Agile and regulatory documentation.
- Proficient in translating CMS mandates and stakeholder requirements into BRD, FRD, and SRS documentation using tools like Confluence, MS SharePoint, and MS Office. Coordinated Agile, Waterfall, and RUP project lifecycles using Jira, Rally, MS Project, and Primavera.
- Experienced in SQL, Python, and Excel for data extraction, cleansing, and transformation. Designed cloud-scale analytics solutions on AWS, Azure, and GCP. Built executive dashboards using Tableau, Power BI, QlikView, and Google Analytics to deliver real-time operational insights.
- Led API and middleware integration testing across RESTful and SOAP-based architectures with platforms like Salesforce, SAP ISU, MS Dynamics, and HubSpot. Conducted UAT, regression testing, and QA planning using Azure DevOps, RTM, and Rational ClearQuest.
- Conducted GAP analyses, SWOT evaluations, cost-benefit and risk assessments for system modernization and rollout planning. Created interactive process models and wireframes using MS Visio, Balsamiq, IBM Rational Rose, and SmartDraw to align stakeholders on functional delivery outcomes.

TECHNICAL SKILLS

Methodologies:	Agile (Scrum), Rational Unified Process (RUP), Waterfall
Data analysis:	Excel, Python, SQL
Data visualization tools:	Tableau, Power BI, QlikView
Documentation:	BRD, FRD, SRS, BPMN
Project management tools:	Jira, Confluence, Trello, MS Project, MS Excel, MS SharePoint, Primavera
UML and prototyping tools:	MS Visio, SmartDraw, IBM Rational Rose, Balsamiq mock-ups, Sketch
Business Analysis Skills:	Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
CRM & ERP system:	Salesforce, Microsoft Dynamics, SAP
Tracking / Other tools:	Rational ClearQuest, RTM, UAT, KPI, Alteryx, Requirement gathering, Google Analytics, Data Analysis, MS Visio, JAD, MS Office, Software development & testing, Data Modelling, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Quality Assurance (QA) Knowledge, Prototyping
Soft skills:	Business Intelligence, Stakeholder Engagement, Requirements Gathering, Time management, Leadership, management, Problem-solving, Negotiation, Decision-Making, Documentation, Presentation, Verbal communication

PROFESSIONAL EXPERIENCE

Business Analyst | HCA Healthcare | Texas | USA

Jan 24 - Present

- Translated CMS Interoperability & Patient Access Rule requirements into detailed BRDs, FRDs, and Agile user stories by collaborating with compliance, clinical, and data teams to support scalable FHIR and EDI-based claims and eligibility exchange across healthcare systems.
- Aligned FHIR API schemas with backend systems by partnering with architects and product teams; designed Lucidchart and Visio diagrams for resource mappings, authentication flows, and EDI pipelines (837, 834, 270/271), improving implementation clarity and reducing rework cycles.
- Conducted GAP analyses and system impact assessments to uncover interoperability issues across legacy and cloud systems; reduced CMS reporting latency by 25% through remediation planning and iterative Agile delivery using feedback loops and stakeholder alignment sessions.

- Authored functional specs, user stories, and acceptance criteria in Jira and Confluence; participated in backlog grooming, sprint planning, and demos to ensure consistent delivery of CMS-compliant APIs and patient data-sharing features under HIPAA and ONC guidelines.
- Developed executive dashboards using Power BI, Smartsheet, and AWS QuickSight to visualize patient access KPIs, API traffic, and compliance timelines; enabled leadership to monitor operational readiness and audit status across digital healthcare interoperability workflows.
- Led user acceptance testing and coordinated monthly audits by analyzing API logs, FHIR usage, and OAuth transactions via OpenSearch and Azure Synapse; validated compliance with ONC certification standards and ensured accuracy of patient-authorized data-sharing protocols.
- Facilitated JAD sessions with clinicians, compliance officers, and integration teams to validate functional requirements, resolve change requests, and accelerate consensus across technical and non-technical stakeholders, improving sprint velocity and reducing delivery bottlenecks in regulatory API development cycles.
- Created centralized documentation repositories in SharePoint and Confluence, including data dictionaries, integration guides, test artifacts, and compliance checklists, ensuring traceability and improving onboarding efficiency for new team members across digital product and regulatory audit teams.

Business Analyst | Accenture | India

Jan 20 – Oct 22

- Partnered with global banking and insurance clients to deliver compliance and risk reporting platforms by translating FATCA, Basel III, and AML mandates into BPMN models, BRDs, FRDs, and Agile user stories with full audit trail traceability in Jira and Rally.
- Designed scalable ETL pipelines using SQL Server and SSIS to process customer, credit, and transaction data; collaborated with engineering teams to enforce schema standards, track lineage, and ensure data accuracy for regulatory filings and audit traceability frameworks.
- Executed structured UAT and regression cycles with QA and risk teams to validate credit scoring models and fraud detection logic; proactively identified edge cases that reduced post-production defects by 30% and improved testing coverage across core workflows.
- Integrated RESTful APIs with third-party credit bureaus and government platforms using versioned JSON schemas; implemented fallback logic to manage latency and data mismatch scenarios, ensuring synchronization accuracy for high-volume regulatory reporting use cases.
- Created Tableau dashboards to monitor credit risk indicators, AML flags, and fraud triggers across regions; enabled real-time alerting and reduced suspicious activity report preparation time by improving risk visibility and response efficiency for compliance stakeholders.
- Managed centralized documentation in SharePoint and Confluence including data dictionaries, test logs, lineage maps, and change requests; participated in change control and metadata alignment meetings to ensure consistency across evolving compliance and enterprise data governance systems.
- Conducted impact assessments, SWOT analysis, and cost-benefit evaluations to prioritize credit policy changes, AML thresholds, and risk model updates; collaborated with compliance leads and delivery managers to align roadmaps using MS Project and Primavera P6 planning tools.
- Supported legacy modernization efforts by mapping business processes and data models using IBM Rational Rose and SmartDraw; helped transition manual reporting workflows to digital platforms by documenting technical specifications and wireframes aligned with audit, UI, and compliance needs.

EDUCATION

Master in Information Systems and Technology

University of North Texas, Denton, TX, USA

Bachelor's in Computer Science

Raghu Engineering College, Visakhapatnam, Andhra Pradesh, India
