

MOUNIKA RAVIPATI

JAVA FULL STACK DEVELOPER

USA | +1 (863)-488-6439 | ravipatimounika87@gmail.com | [LinkedIn](#)

SUMMARY

A Java Full Stack Developer with 4 years of experience in developing and deploying enterprise applications using Java, Spring Framework (Core, Boot, IoC, DI, MVC, AOP, Security), Hibernate, and JPA. Proficient in core Java concepts, cloud platforms (AWS), web technologies (GraphQL, RESTful APIs, React, Angular, Vue.js), and databases (MySQL, PostgreSQL, Oracle). Experienced with messaging queues (Kafka, RabbitMQ, JMS) and writing unit/integration tests using Mockito and JUnit. I am skilled in Agile methodologies and project management tools like Git, Confluence, and Jira. Known for strong problem-solving, communication, and delivering projects on time and within budget.

SKILLS

- **Methodologies:** SDLC, Agile, Scrum, Kanban, Waterfall
- **Languages:** Java (8+), JavaScript, TypeScript, SQL, HTML5, CSS3
- **IDEs:** IntelliJ IDEA, Eclipse, NetBeans, Visual Studio Code
- **Backend:** Spring Boot, Spring MVC, Spring Security, Hibernate, Spring Data JPA, Microservices
- **Frontend:** React.js, Angular, Redux, Bootstrap, jQuery
- **Cloud:** AWS (EC2, S3, Lambda, RDS, CloudWatch, IAM), Azure (App Services, Blob Storage)
- **Web:** REST APIs, AJAX, JSON, XML, WebSockets, Bootstrap
- **Application Servers:** Apache Tomcat, WebSphere, Jetty
- **Databases:** MongoDB, MySQL, PostgreSQL, Firebase, Redis
- **Testing:** JUnit, Mockito, Postman
- **Version Control:** Git, GitHub, GitLab, Bitbucket, Jira, Confluence
- **Build/Automation:** Maven, Gradle, Jenkins, Docker, Kubernetes, GitLab CI
- **OS:** Windows, Linux, macOS

EXPERIENCE

Wells Fargo | Java Full Stack Developer | USA

Jun 2024 - Present

- Engineered and maintained robust backend systems using Spring, including Spring Core and Spring Batch, with efficient data management via Hibernate and the integration of GraphQL for flexible data querying.
- Deployed scalable microservices with Spring Boot and Java, ensuring high performance and reliability, while securing access control with Spring Security.
- Crafted and implemented responsive web applications with JavaScript ES6+, React, Redux, React Router, and Bootstrap, delivering dynamic and engaging user experience.
- Optimized database operations and performance with MySQL, ensuring data integrity and seamless interaction across application layers.
- Leveraged AWS services such as EC2, S3, Lambda, RDS, Auto Scaling, ELB, EBS, SQS, SNS, and API Gateway to build scalable and resilient cloud infrastructure.
- Engineered multithreading solutions in Java applications, enhancing concurrency and performance to efficiently tackle complex processing tasks.
- Automated and managed CI/CD pipelines using Gradle, Jenkins, and Docker to streamline build, test, and deployment processes.
- Orchestrated containerized deployments using Kubernetes and implemented infrastructure as code with Terraform, automating application deployment and scaling.
- Deployed and managed applications on Apache Tomcat to ensure reliable hosting and high-performance delivery of Javabased web applications.
- Documented and tested APIs using Swagger and Postman, ensuring comprehensive functionality and reliability.
- Monitored and troubleshooted application performance using ELK Stack, resolving issues promptly to ensure optimal system health.
- Coordinated source code and version control using GIT, fostering collaboration and efficient code management within the development team

Accenture | Java Full Stack Developer | India

Aug 2022 - Jan 2023

- Played a key role in all SDLC phases within an Agile Scrum framework, improving sprint velocity by 25% and ensuring successful project delivery.

- Developed front-end systems using JavaScript, ReactJS, jQuery, Ajax, Bootstrap, HTML5, and CSS3, focusing on modern UI components and responsive design.
- Designed and deployed scalable cloud applications using AWS services (S3, EC2, Lambda, DynamoDB), ensuring high availability and performance.
- Optimized application performance by 30% through code enhancements, query optimizations, and object management, improving user experience.
- Developed RESTful APIs and integrated Spring MVC with Hibernate, boosting data retrieval speed by 30% and optimizing database performance by 30%.
- Implemented microservices architecture with Spring Boot, enabling modular development, and integrated Redis caching to reduce database load by 40%.
- Conducted rigorous testing with JUnit, Mockito, and collaborated on automated testing, reducing testing time by 50% and minimizing post-deployment bugs.
- Led sprint demos, enhancing customer satisfaction by 95%, while improving team productivity by 85% and reducing time to market by 3 months.
- Exceptional knowledge of database development, including SQL, MySQL, Oracle, and managing relational and NoSQL databases.

Nefroverse | Java Full Stack Developer | India

Jan 2020- July 2022

- Developed and maintained dynamic web applications using Java, Spring Boot, and Angular, improving system performance by 30% and efficiently handling 100+ concurrent users.
- Designed and optimized user interfaces with Angular, enhancing user engagement by 25% and boosting conversion rates by 15%.
- Engineered robust RESTful APIs using Java and Spring Boot, reducing data retrieval times by 40%, enabling seamless integration between the frontend (Angular) and backend systems, and significantly enhancing overall application performance
- Integrated front-end systems using AJAX, JSON, and XML, streamlining data exchanges and improving load times by 25%.
- Implemented Spring MVC to architect robust client-server communication, optimizing backend APIs to handle 10K+ concurrent users, improving overall responsiveness and scalability.
- Leveraged SQL Server and MongoDB for data management, enhancing query performance by 20% while ensuring 99.9% data integrity and improving data security.
- Implemented CI/CD pipelines with Jenkins and Docker, reducing release time from 4 weeks to 2 weeks and increasing deployment frequency by 50%.
- Achieved over 85% code coverage through unit and integration testing with JUnit and Mockito, reducing production bugs by 40%.
- Led efforts to optimize data persistence by integrating MongoDB, Firebase, and SQL-based databases, reducing data redundancy and enhancing security.
- Demonstrated strong problem-solving skills by debugging and resolving bottlenecks, leading to a 35% decrease in user-reported issues.
- Managed project tasks using Jira, reducing project delivery times by 20% through effective task tracking and streamlined workflows.
- Coordinated the deployment of applications, utilizing Git for source code management and feature tracking, ensuring smooth version control across development teams.

EDUCATION

Master of Science MS in Computer

Jan 2023 - Dec 2024

University of South Florida Tampa, FL

Bachelor of Technology in Computer Science

July 2018 - Jul 2022

Vignan's Foundations for Science, Technology and Research, India

RESEARCH PAPER

Prediction of Breast Cancer, Comparative Review of Machine Learning Techniques and link:

Jan 2022 – Aug 2022

<https://www.irjet.net/archives/V9/i8/IRJET-V9I882.pdf>

CERTIFICATIONS

- Completed the Introduction to HTML course, certified by Michigan University (Coursera).
- Earned a Python for Everybody certification from Michigan University (Coursera).
