SUMMARY

- Highly effective Full stack developer with more than four years of experience in application development, including design and implementation of client and server-side enterprise applications using Spring frameworks, Angular, and Typescript frameworks and in-depth knowledge of accessibility standards and section 508 compliance ADA WCAG 2.0.
- Technical strengths include Spring, Spring MVC, Spring Boot, Spring cloud, Spring security, AOP, JPA, Hibernate, J2EE, RESTful web services, Maven, Oracle 9i/10g/12c, SQL, MySQL, and Postgres.
- Extensive web development experience with HTML, CSS, JavaScript, Bootstrap, TypeScript, jQuery, Angular.
- Hands-on experience creating and exposing REST API's using Spring Boot framework and consuming APIs in Angular applications.
- Implemented user session management, silent refresh or implicit extension of session using OAuth servers and OpenID connect library and user idleness management service using the event listeners.
- Strong experience with deploying and maintaining Spring Boot Microservices in Azure, Pivotal Cloud Foundry (PCF).
- Exposure to Git, Jenkins, HP ALM, JIRA tools, and Solid experience with RDBMS.
- Implemented Swagger/Swagger UI to auto-generate and streamline documentation for all REST endpoints.
- Expertise in Junit, TestNG, Selenium WebDriver, Mockito test frameworks, and SonarQube code quality tool.
- Wrote Data Base Triggers and procedures to capture changes on tables and insert them into Audit tables.
- Implemented Filters on Spring JPA entities class to allow specific rows of the table based on the authenticated user.
- Implemented Spring boot microservices to process the messages into the Kafka cluster setup, implemented Kafka producer and consumer applications on Kafka cluster setup with help of Zookeeper.
- Configured Spring Cloud config server, API Gateway, Eureka service registry and discovery, Hystrix circuit breaker, and transactional management.
- Experienced in ADA accessibility compliance auditing using methodologies like Visual inspection, browser inspection, keyboard only, screen reader, color contrast reviews, and developing the ADA-compliant angular components.
- Conducted and provided knowledge transfer sessions to Development and quality assurance teams.

EXPERIENCE

Full-Stack Software Engineer | Pacific Life Insurance

May 2021 – Sep 2022

Worked on a commercial insurance application called Submission Hub, It offers multiple types of insurance policies to organizations. It helps the brokers, consultants, users, and administrators to endorse documents, renew, enroll, and submit policies.

- Developed, and maintained multiple microservices to support frontend apps using Spring Boot framework.
- Build responsive, ADA compliance, and reusable front-end components of a web interface with Angular.
- Created and exposed multiple rest endpoints, configured and mapped DB tables with entities using Hibernate and JPA frameworks.
- Conduct code reviews daily to ensure best coding practices and product requirements are met.
- Produce maintainable, reusable, and production-ready code and unit tests with above 99% coverage.
- Actively engage in pair programming to resolve 90% of challenges and blockers faced by teammates.

- Configured Kafka producer and consumer to stream live notifications data with zero latency.
- Created global exception handling to handle all exceptions happening with appropriate failure messages.
- Participated in Sprint planning to review the requirements and acceptance criteria of product owners and TPMs. Help in creating stories and sub-tasks in the backlog grooming.
- Supported release in lower and higher environments, fixed and analyzed the release issues, and collaborated with operations and release planning teams.
- Implemented unit testing using Jasmine and Karma frameworks to test Angular components, services, and directives to ensure high code quality.
- Created Database procedures and triggers to populate audit tables in case DML statements ran on tables.
- Created Spring Cron schedulers to send periodic notifications to users about the status and action of policies.
- Designed and developed complex procedures, and functions for data manipulations and optimized queries to achieve quantifiable performance improvement of 30% reduction in query time.
- Implemented DBMS_PARALLEL_EXECUTE features to create tasks, chunk records and run tasks in parallel.

Software Engineer | Visa

April 2018 – May 2021

Worked with a Risk management group that owns multiple applications called Attack intelligence tool, Global compliance tool and Risk management tool. These applications help issuers, companies and account holders to flag a transaction for review, establish rules to decline a transaction based on the potential for fraud and enable intelligent decisions throughout the entire transaction lifecycle.

- Conducted ADA compliance audits and fixed all Non-ADA compliant UI components in the library.
- Implemented Hibernate connection pooling and transaction management in JPA and service layers.
- Migrated UI features in JSP pages to reusable Angular components and published them in a library.
- Documented and knowledge transferred the codebase to less experienced developers reducing onboarding time by 50%.
- Utilized DevOps, agile principals, and Jenkins to enable CI/CD. Decreased production time by 30%.
- Created Spring AOP aspects and configured join points for logging and grants over the service functions.
- Developed unit test cases using Junit and Mockito frameworks for testing the accuracy of code changes.
- Automated regression testing by comprehensive integration test cases using RestAssured frameworks to validate API endpoints and different response codes of both success and error scenarios.
- Led and mentored a small team of 4 other interns to push new software features to startup applications.
- Improved overall team story completion and acceptance rate by 20% through constant team collaboration.
- Consistently complete sprint stories, tasks, and commitments on time with above 95% acceptance rate.

EDUCATION

Masters in Information Systems | Saint Louis University | St. Louis, Missouri, USA.

Bachelor of Technology in Computer Science | Bharath University | Chennai, Tamil Nadu, INDIA.

PROJECTS

QUICK AND SAFE ROUTE

Web application developed with Angular, Spring Boot and Oracle SQL to provide traffic visualization, predicted time to cross the Missouri bridge and reach collage, warning of any incidents and updates of St. Louis City traffic and crime using live and historical data reported from students and police authorities.

UNIVERSITY SPORTS CLUB MANAGEMENT SYSTEM

Developed a web application using HTML, CSS, and Spring MVC to provide a solution to automate the manual process of pre-evaluating the players to meet the game criteria before selection during the time of registration.

SKILLS

Skill set and Technologies		Years of Experience
Programming	Java, TypeScript, Angular, HTML, Kafka	More than four years
Frameworks	Spring Boot, JPA, Hibernate, AOP, JUnit, Mockito, Swagger, Jasmine, Karma	More than four years
Tools	ALM, Jira, Sonar Qube, Splunk, WAVE, AXE, NVDA, Jenkins, SQL Developer	More than four years
Databases	SQL, Postgres, PL/SQL, Oracle SQL	More than four years
Cloud	PCF and AWS	More than four years
