

Mounika Ashamshetty

Full Stack Developer

Phone: +1 9895724794

Email: mounikaashamshetty67@gmail.com

Professional Summary:

I am a Full Stack Developer with over 5+ years of experience in Designing, developing, analyzing, and testing web applications at all stages of the Software Development Life Cycle (SDLC). Capable of creating dependable applications using both Java/J2EE technologies (Spring Boot, Hibernate) and the .NET framework (ASP.NET Core), as well as modern front-end frameworks like ReactJS and Angular. Has broad expertise in whole software development lifecycle, including design, development, testing, deployment, and maintenance, with focus on Continuous Integration/Continuous Delivery (CI/CD) and Test Driven Development (TDD) techniques. Experienced in cloud development on platforms such as AWS and Azure, as well as establishing application resiliency through microservices architecture and real-time monitoring with ELK Stack and Prometheus tools. Shows a thorough understanding of application security principles (Spring Security) and accessibility standards (WCAG/ADA). Deep understanding of Agile (Scrum) methodology, with active participation in iterative development and daily stand-ups.

I have worked with cloud platforms like AWS and Azure, managing resources including EC2, S3, Azure App Services, and Azure Functions to ensure smooth deployment and scalability. I also follow the Web Content Accessibility Guidelines (WCAG) to ensure ADA compliance and accessibility. With a solid understanding of UX design principles and technologies such as Figma and Adobe XD, I work closely with designers to transform wireframes into interactive interfaces. I know how to use CSS preprocessors like SASS and LESS, as well as frameworks like Bootstrap and Material-UI, to create responsive, pixel-perfect designs.

Tools and Technologies:

Web Technologies	HTML5, CSS3, jQuery, JavaScript, TypeScript, DOM, AJAX, JSON, XML.
Front-end Technologies	Angular, React JS, NodeJS, Vue JS, jQuery, ES6, Vite.
Back-end Technologies	Core Java, J2EE, Spring (3.2/4.0), Spring Boot, Hibernate ORM, Microservices architecture.
Version Control Tools	GitHub Copilot, Git, GitLab, GitHub, SVN, Bitbucket, JIRA, Confluence.
Methodologies	Agile (Scrum), Iterative, Waterfall.
Web Services	JSON, AJAX, RESTful API, SOAP.
Wireframe & Design Tools	Figma, Adobe XD, Sketch, Material-UI.
Testing & CI/CD Tools	Jest, React Testing Library, Cypress, Selenium, Jenkins, Bitbucket.
Cloud Technologies	Azure, AWS, GCP.
Data Visualization & Querying	Power Bi, GraphQL.
Data Management	Oracle, DB2, MongoDB, MySQL, MS SQL Server, Hibernate ORM, PL/SQL stored procedures.

Professional Experience:

FedEx Office || Plano, Texas, USA

Java Full Stack Developer || Jan 2025 - Present

FedEx Office, a subsidiary of FedEx Corporation, is a dynamic and technology-driven leader in logistics and business services. I design, develop, and maintain server-side logic using Java and frameworks like Spring Boot, Hibernate, or Java EE.

Environment: AWS Lambda, Cassandra, CI/CD, Hibernate, Java, Java 8, Jenkins, JSON, Kafka, Microservices, MVC, Node.js, Oracle, PCF, React, Spring, Spring Boot, SQL, AJAX, Bootstrap, CSS, CSS3, Git, Hibernate

Key Responsibilities:

- Designed, developed, and deployed **enterprise-scale Microservices** using **Java 8**, **Spring Boot**, **Spring REST**, and **Hibernate**, supporting high-availability and high-throughput business applications.
- Migrated monolithic applications to **Microservices architecture** using **RESTful APIs**, implemented **DAO and MVC design patterns**, and optimized data access layers to improve performance and scalability.
- Built responsive **Single Page Applications (SPA)** using **React.js**, **Node.js**, **HTML5**, **CSS3**, **JavaScript**, **Bootstrap**, and **AJAX**, delivering intuitive and user-friendly interfaces.
- Implemented **cloud-native solutions on AWS**, leveraging **AWS Lambda**, **Amazon CloudWatch**, and centralized logging to monitor application health, performance, and production issues.
- Designed and optimized **data models and schemas** using **Oracle**, **Apache Cassandra**, and **SQL**, and implemented **data ingestion pipelines** using **Apache Kafka**, **Flume**, and **Sqoop**.
- Established and maintained **CI/CD pipelines** using **Jenkins**, **Git**, and **Docker**, automating build, test, and deployment processes, including deployments to **Pivotal Cloud Foundry (PCF)** in collaboration with DevOps teams.
- Ensured application quality and reliability by conducting **unit and integration testing** using **JUnit**, **Mockito**, and **Cucumber**, while participating actively in **Agile/Scrum ceremonies** and full **SDLC** activities.
- Improved developer productivity and code quality by utilizing **GitHub Copilot** and integrating **Generative AI, LLM, NLP, and ML-based APIs** for intelligent automation, data processing, and enhanced business insights; mentored junior developers and authored technical design and low-level design documents.

ComericaBank | | Dallas, Texas, USA

Java Full Stack Developer | | Nov 2023- Dec 2024

Comerica Bank is a financial services company. It has Business Bank, Retail Bank, and Wealth Management. I developed user-friendly, responsive, and visually appealing interfaces using HTML, CSS, JavaScript, and frameworks like Angular, React, or Vue.js.

Environment: Agile, Angular, AOP, Apache Kafka, Azure, CI/CD, Jenkins, Jira, JMS, JSP, Kafka, Kubernetes, Microservices, MongoDB, Spring, Spring Boot, SQL, XML

Key Responsibilities:

- Designed and implemented **Spring Boot-based Microservices and RESTful APIs** using **Java 8/11**, enabling modular, secure, and high-availability systems aligned with enterprise banking standards.
- Developed responsive and reusable **front-end components** using **Angular**, **React.js**, **TypeScript**, **HTML5**, **CSS3**, and **JavaScript (ES6+)**, ensuring cross-browser compatibility and optimized user experience.
- Implemented **asynchronous and multi-threaded processing** using **JMS**, **Apache Kafka**, and **Spring AOP**, supporting high-volume transactional workflows and event-driven architectures.
- Built and managed **cloud-native deployments** using **Azure Resource Manager (ARM)**, **Kubernetes**, **Apache Camel**, and **Jenkins CI/CD pipelines**, ensuring secure, automated, and scalable releases.
- Designed and optimized **relational and NoSQL data layers** using **Oracle**, **PostgreSQL**, **MySQL**, and **MongoDB**, applied **DAO and IoC patterns**, enforced **TDD with JUnit**, and actively participated in **Agile/Scrum** delivery using **JIRA**.

(Accenture) Broadridge Financial Solutions | | Hyderabad, India

Java Full Stack Developer | | Aug 2022 - Jul 2023

Broadridge Financial Solutions, Inc. is a public corporate services and financial technology company. Created and maintained RESTful or GraphQL APIs to facilitate communication between the front-end and back-end systems.

Environment: AWS, Bamboo, CSS, EC2, Eclipse, Git, GitHub, HTML, HTML5, Java, Java 8, JavaScript, JDBC, JSF, JSP, JUnit, Microservices, MVC, MySQL, PCF, React, Redux, RESTful, S3, Servlets, Spring, Spring Boot, Spring Cloud, SQL.

Key Responsibilities:

- Designed and developed **cloud-native Microservices** using **Java 8, Spring Boot**, and **Spring Cloud (Eureka, Ribbon, Circuit Breaker)**, supporting scalable, fault-tolerant enterprise platforms and integrating **NoSQL (MongoDB)** and relational databases.
- Built responsive **Single Page Applications (SPA)** using **React.js, Redux, React Native, HTML5, CSS3**, and **JavaScript (ES6+)**, and implemented **JSF and Struts MVC** frameworks for legacy and modern UI integration.
- Developed, ~~sexposed~~ **RESTful web services** for user profile and cross-department integrations, leveraging **Spring Boot, JAX-RS**, and secure API design practices in high-volume financial systems.
- Implemented **automated testing, logging, and monitoring** using **JUnit, Spring Validation, Jasper Reports**, and centralized logging, ensuring application reliability, auditability, and regulatory compliance.
- Led **cloud migration and deployment automation** using **AWS (EC2, S3, Lambda), PCF, Bamboo CI/CD, GitHub, UNIX shell scripting**, and **ETL workflows**, enabling efficient data movement, backups, and operational stability.

V Dream Technology & Communication Ptd Ltd || Hyderabad, India

Java Developer || Mar 2020 - Jul 2022

V Dream Technology & Communication Ptd Ltd is one of the leading businesses in the Mobile Phone Dealers Vivo. Participated in the design and architecture of software solutions, ensuring scalability, security, and performance.

Environment: Agile, Cassandra, CSS, Docker, Git, Hibernate, HTML, Java, JavaScript, Jenkins, Jira, JMS, JSP, JUnit, Microservices, RESTful, SDLC, SOA, SOAP, Spring, Spring Boot, SQL, XML

Key Responsibilities:

- Designed and developed **enterprise Java applications and Microservices** using **Spring Boot, Spring MVC, Spring Integration, Hibernate/JPA**, and **RESTful APIs**, implementing layered architecture with validation, service, and persistence components.
- Built and optimized **data-intensive platforms**, including **multi-rack Apache Cassandra clusters**, batch processing jobs, and SQL-based persistence using **Hibernate (HQL, Criteria API)**, ensuring scalability, availability, and data accuracy.
- Implemented **asynchronous messaging and integration patterns** using **JMS, Apache Message Brokers, Spring Integration Async Channels**, and **global error handling**, supporting reliable, event-driven workflows.
- Established, maintained **CI/CD pipelines and release management** using **Git, Maven, Nexus, Jenkins, Docker**, and **JIRA**, supporting automated builds, deployments, and production releases across environments.
- Practiced **Test-Driven Development (TDD)** and quality assurance by creating comprehensive **JUnit test suites**, developing **Jasper Reports**, designing **JSP/HTML/CSS/JavaScript** user interfaces, actively participating in **Agile SDLC** phases including requirements, design, development, and support.

Certifications:

- Oracle Certified Professional (OCP) – Java SE 11 Developer
- Spring Professional Certification (VMware)
- AWS Certified Developer – Associate.
