EXPERIENCE

Software Engineer

May 2023 – Present

U.S Bank

Hackensack, NJ

- Developed RESTful services using Python (FastAPI/Flask) to add and support features for the U.S. Bank's Fund Source application, enabling seamless integration between members, providers, and brokers, thereby streamlining interactions.
- Owned end-to-end migration of core backend services from an SQL (MySQL) based system to NoSQL (DynamoDB). Evaluated risks and formulated an approach with detailed architectural and service level changes required to implement the migration. Also responsible for subsequent production rollout and performance.
- Managed complex forms in customer Demographics page using React Final Form, implementing robust validations and integrating APIs to post and fetch data, prepopulate fields, and streamline the authorization process for claims related to portfolios, investments, and more.
- Utilized Redux for efficient state management and unidirectional data flow.
- Played a pivotal role in provisioning AWS resources, including EC2, S3, ELB, RDS, ECS, Keyspaces and EKS.
- Led functional specification reviews, conducted code reviews, implemented testing using PyTest and unittest (with mock), performed bug fixes, and provided production support.

Associate Software Engineer

Jan 2021 – July 2022

Enthra technologies ltd

Hyderabad, INDIA

- Developed a job platform for businesses to source contingent workers using Python 3, FastAPI (or Flask/Django), and MySQL. Built RESTful API endpoints end-to-end with input validations, transaction management, and support for various request/response formats (JSON, Multipart – files, documents). Designed and implemented API authorization using JWT tokens, integrated with AWS Cognito.
- Implemented high performing and advance search capable Elasticsearch matching API's, Auto suggest APIs, complex matching filters with the usage of various Elasticsearch queries achieving a response time improvement time of 95
- Configured, Implemented and Maintained Communication Service between Multiple External clients with the RabbitMQ as a Message Broker.
- Implemented Maintained Notification Service of the Application which triggers - single/bulk emails (AWS SES), SMS.
- Awarded with Star of the Sprint for effective communication, contribution and teamwork.

PROJECTS

Emotion Recognition System | *Python, OpenCV, Tensorflow*

- Developed an Deep learning model which uses CNN's along with openCV to extract facial features from images.
- Implemented various CNN architectures such as ResNet, EfficientNet, DeepCNN to achieve 92 percent accuracy in classifying various emotional states of a human face .

Exam Study Tool | *HTML/CSS, JavaScript, Node JS, Express Js, MySQL, AWS*

- Designed and developed a exam preparation platform utilizing HTML/CSS, JavaScript, Node.js, and Express.js.
- Engineered a robust data management system on AWS RDS MySQL, optimizing storage, retrieval, and leveraging HTTP protocol and web services. Implemented Android integration for mobile access, including UI design, performance optimization, and memory management

TECHNICAL SKILLS

Languages: Python, Java, C, C++, HTML5, CSS, JavaScript, Typescript

Databases: SQL Server, MySQL, PostgreSQL, DynamoDB, NoSQL

Frameworks: Spring boot, React, Angular, Angular JS, Bootstrap, jQuery, JUnit, Mockito, Scrapy

Tools IDE's: Swagger, CI/CD pipelines, VS Code, Shlurm, Datadog, Sublime Text, IntelliJ, GIT, Docker, Kubernetes, Kafka, PyTorch, Microservices, REST APIs, TCP/IP Protocols, Unit testing, Flask, Splunk, Agile, Data Structures, PostMan, AWS, GCP, Jenkins, Selenium

EDUCATION

University at Buffalo - SUNY

Master's in Computer Science

Buffalo, NY

Aug. 2022 – Dec 2023
