EDUCATION

Arizona State University

Arizona, USA

M.S in Information Technology (GPA:- 4.00 / 4.00)

Expected Graduation: May 2026

- Relevant Courses: Project Management, Data Engineering and Analytics, Database Management Systems, Data Visualization, Cloud Computing and Big Data Analytics.

University Of Mumbai, (FCRIT)

Mumbai, India

B.E in Information Technology (GPA: 3.93 / 4)

June 2020- May 2024

- Relevant Courses: Database Management Systems, Internet of Things, Web Development, Artificial Intelligence, Data Science, Information Retrieval System and Blockchain.

SKILLS

Data Analytics Tools: SQL, Python, Power BI, R, Microsoft Excel

Data Engineering: Microsoft Power Automate, ETL Pipelines, Data Modeling, Data Cleaning

Programming Languages: Python, SQL, C++, PHP, HTML, CSS

Technical Proficiency: Statistical Analysis, Visualization, Dashboards, Cybersecurity Tools, Web Development

Software: Microsoft Suite (Excel, Word, PowerPoint), Data Factory, Git.

PROFESSIONAL EXPERIENCE

Data Scientist Intern (Remote)

Aug 2023 – Sep 2023

Zeta Holdings, Saratoga, California

- Collaborated on **data procurement, processing**, and visualization projects with clear weekly goals using **Python** and **Power BI**.
- Conducted in-depth **data analysis**, and created insightful reports using **Python** and **Python and visualization tools**.

Cybersecurity Intern

May 2023 – Jun 2023

Nuclear Power Corporation of India Limited, Tarapur, India

- Enhanced organizational network security by implementing open-source cybersecurity tools such as **Graylog** and **Snort**.
- Supported the cybersecurity team in maintaining system integrity through rigorous **monitoring** and **reporting**.

Software Development Intern

Jun 2022 – Jul 2022

Bhabha Atomic Research Centre, Tarapur, India

- Developed a login portal with dual-language support using HTML, CSS, PHP, and XAMPP **dual-language support** using **HTML, CSS, PHP** and **XAMPP**.
- Assisted in ensuring operational efficiency across Security Management Systems and Surveillance tools.

ACADEMIC PROJECTS

Deep Learning-Powered Web Attendance Tracker—MTCNN, DeepFace, Facenet Algorithm(July 2023 – Apr 2024)

- Built a facial recognition-based system for attendance tracking integrated with a college database.
- Automated attendance logging and reporting using Python libraries and Excel
- Published: International Journal of Advance Computational Engineering and Networking (IJACEN)

Customer Segmentation Using Behavioral Analysis—Python

(Jan 2023 – Apr 2023)

- Conducted RFM analysis for clustering customer data based on behavior and engagement.
- Presented actionable insights to enhance marketing campaigns

FOODHOLIC: Online Food and Grocery Ordering System —HTML, CSS, MySQL (Jul 2022 – Nov 2022)

- Built an interactive web application with recipe suggestions and personalized shopping lists.
- Incorporated backend database management for user preferences using MySQL.

Student Achievements and Placements Portal —HTML, CSS, PHP, MySQL

(Jan 2021 – Apr 2022)

- Designed a web portal for student record management aligned with NAAC Criterion 5 standards.
- Enabled user-specific data entry and retrieval functionalities through MySQL.

CERTIFICATIONS AND ACHIEVEMENTS

Microsoft Certified Azure Fundamentals (AZ-900) (In Progress).

Cybersecurity Fundamentals Training (Completed – 2023).

Project Achievement: Awarded 3rd Prize for Deep Learning-Powered Web Attendance Tracker.

Departmental Magazine and Newsletter Served as Designing Head and Editorial Team Member for Fr. C. Rodrigues Institute of Technology (2022 – 2023).
