OBJECTIVE

Ambitious, determined, and detail-oriented individual with strong technical expertise in data engineering, seeking a Data Engineer position with a leading organization. Eager to leverage leadership experience, excellent communication skills, and advanced programming knowledge to design, build, and optimize scalable data pipelines.

EDUCATION

Governors State University

University Park, Illinois

Master of Science in Health Informatics

WORK EXPERIENCE

Optum

Eden Prairie, MN

Azure Data Engineer

Jan 2023 - Present

- Worked in an agile environment and implemented the changes required by the business owners on a regular basis.
- Worked with internal teams and third-party vendors to deliver comprehensive BI applications and reporting solutions, including Power BI, Tableau, QlikView, and Qlik Sense.
- Managed data storage in Azure Blob Storage and Data Lake, ensuring scalability and cost efficiency.
- Assisted in migrating on-premises data to Azure cloud platforms, ensuring seamless transitions.
- Optimized SQL queries to improve performance, reduce processing time, and enhance database efficiency.
- Developed data visualization dashboards and reports using tools like Power BI and Tableau for stakeholders.
- Provided ongoing support and troubleshooting for data systems, ensuring uptime and performance.
- Assisted in migrating on-premises data to Azure cloud platforms, ensuring seamless transitions.
- Designed and developed data pipelines using Azure Data Factory for efficient ETL processes across multiple sources.
- Leveraged Python libraries (e.g., Pandas, NumPy) to process large datasets and perform complex data analysis for reporting and decision-making.

Molina Healthcare

Long Beach, CA

Data Engineer

Oct 2021 - Dec 2022

- Worked in an agile environment to deliver data-driven insights and reports for clients.
- Created and maintained Power BI and SSRS dashboards and reports, providing real-time, actionable insights for decision-makers.
- Utilized Python for statistical analysis and data manipulation, supporting business insights and analytics initiatives.
- Assisted with automating data workflows and monitoring pipelines using Azure Monitor.
- Wrote and optimized SQL queries to extract, clean, and load data into Azure SQL Database.
- Assisted senior engineers in troubleshooting and resolving data issues to maintain system integrity.

Avon Technologies

Hyderabad, India

Data Intern

Aug 2017 - Dec 2019

- Coordinated with the project management team to set database development timelines and scope.
- Collaborated with cross-functional teams to create scalable BI solutions, developing SSRS and Power BI reports for real-time business insights.
- Supported the migration of data from on-premises systems to Azure cloud, gaining hands-on experience.
- Worked with the team to generate insights from data using Power BI for reporting and visualization.
- Gained experience in data visualization and reporting tools to communicate technical results to non-technical stakeholders.

CERTIFICATION

- Microsoft Certified Azure Data Fundamentals | Issued: August 14, 2023 | Credential ID: 54BF1U-318569.
- Microsoft Certified Azure Data Engineer Associate | Issued: August 19, 2023 | Credential ID: 2E0P7E-597F09

PROJECT EXPERIENCE

- Developed and maintained data models by integrating data from hospital management systems, transforming and cleansing data using Power Query and SQL for accurate reporting.
- Created and optimized Power BI dashboards, providing insights on hospital availability, patient care, doctor performance, and medicine inventory through interactive visualizations.
- Wrote complex DAX expressions to create custom metrics, such as patient length of stay and hospital performance, ensuring reports met business needs.
- Collaborated with stakeholders to translate business requirements into technical solutions, optimizing reports for performance and providing training on Power BI usage.
