Work Experience

ITARMI

New York, NY

Technical Support Analyst

July 2024 – Present

- Delivered hands-on technical support and network installation services for Oracle's infrastructure, adhering to client-specific protocols and high-security compliance standards.
- Supported the setup, configuration, and testing of enterprise networking equipment, ensuring zero-defect deployments in line with SLA expectations.
- Coordinated with Oracle internal teams and external vendors to log, track, and resolve service requests efficiently using ticketing tools and documentation best practices
- Maintained technical documentation, performed troubleshooting and diagnostics, and contributed to successful project handovers and hardware lifecycle management.
- Ensured all project deliverables complied with Oracle's internal controls and ITARMI service quality guidelines.

TRINE UNIVERSITY

Angola, IN

Business Analyst GA

Dec 2022 – May 2024

- Designed and maintained dashboards tracking key academic and financial metrics, enabling leadership to make data-informed operational decisions.
- Conducted variance analysis comparing forecasted vs. actual financial performance across departments using Excel, SQL queries, and Tableau visualizations.
- Partnered with faculty and administrative teams to gather data requirements, translate them into reports, and automate manual tracking processes.
- Identified inefficiencies in monthly budget tracking and introduced new templates that reduced time spent on reporting

by 30%.

- Supported the university's strategic initiatives by analyzing enrollment trends, funding allocations, and academic program performance.

GENPACT

Hyderabad, India

Data Analyst

Dec 2021 - May 2022

- Used advanced SQL (joins, subqueries, aggregations) to analyze insurance claims data, identify patterns, and support compliance and fraud detection efforts.
- Developed and validated data pipelines to ensure accuracy and consistency of internal reports used by risk and audit teams.
- Created automated checks that improved anomaly detection and reduced false positives in claims reporting by 25%.
- Worked cross-functionally with QA teams and business units to build dashboards and KPIs aligned with client expectations, improving stakeholder transparency.
- Authored documentation and data dictionaries for new data sources to support audit trails and onboarding of new analysts.

TECH MAHINDRA

Hyderabad, India

Customer Support Associate

Mar 2021 - Nov 2021

- Handled customer service operations for Flipkart's logistics division, managing over 30 issue tickets daily related to order delays, returns, and payments.
- Monitored and resolved service requests through internal CRM systems, escalating high-priority issues and ensuring timely resolution per SLA standards.
- Coordinated between customer service, warehouse, and logistics teams to ensure smooth delivery and fulfillment cycles.

RADIANT HIGH SCHOOL

Hyderabad, India

Data Instructor

Feb 2020 - Apr 2021

- Designed and led a practical curriculum on business analytics, teaching students hands-on data analysis techniques using Excel, Tableau, and SQL.
- Introduced students to version control (GitHub) and QA techniques through mock projects simulating real-world data environments, including healthcare datasets.
- Developed capstone projects that taught dashboard creation, data validation, and scenario modeling, giving students exposure to industry-relevant tools.
- Mentored students on data ethics, data visualization best practices, and storytelling with data.
