

Muhib Siddiqi

(517) 505-1193 | muhibsiddiqi2704@gmail.com | linkedin.com/in/Muhib | github.com/muhib2704

EDUCATION

Michigan State University, College of Engineering
Bachelor of Science, Computer Science
Minor in Business

Lansing, MI
Aug 2022 – May 2026

Cumulative GPA: **3.7**

Dean's List: Fall 2022, Spring 2023, Fall 2023, Fall 2024, Spring 2025

Relevant Coursework: Data Structures and Algorithms, Intro to Machine Learning, Intro to Artificial Intelligence

EXPERIENCE

Software Engineering Intern | Global Informatics Logistics System Inc

May 2024 – Aug 2025

- Boosted operational efficiency by 30% through development and optimization of logistics software
- Collaborated on feature design and deployment for advanced route optimization and real-time tracking systems
- Developed and maintained scalable applications using Python and JavaScript, ensuring high performance and reliability
- Led code reviews and resolved critical bugs, enhancing software quality through automated testing frameworks
- Leveraged cloud infrastructure, Git, and Agile methodologies to streamline workflows and improve project outcomes

Michigan State University — Introduction to Engineering Design

Aug 2022 – Dec 2022

- Led a team of 5 in developing a To-Do list app using MIT App Inventor, enhancing collaboration among first-year peers
- Introduced features like Image animation and improved data storage, boosting app session durations by 20%
- Engineered a user-friendly app using feedback from 150+ participants, increasing user engagement by 30%

PROJECTS

Cold-Chain Pharma Logistics Optimization | Python, Google OR-Tools, GeoPy

May 2025 – Aug 2025

- Used AI and operations research to optimize pharmaceutical cold-chain logistics routing
- Employed Google OR-Tools to minimize delivery costs and temperature excursions
- Integrated real-time sensor data (e.g., temperature, vibration) into routing logic
- Simulated edge cases (e.g., heatwaves, delays) to test resilience

Chatbot Application | OpenAI API, Python, Tkinter

May 2023 – Aug 2023

- Developed a chatbot application using Python and OpenAI API, increasing average session duration and customer retention by 20%
- Designed a user-centric GUI with Tkinter, improving feedback ratings and user experience quality by 35%
- Integrated OpenAI's text-davinci-002 engine for intelligent, context-aware responses in real-time
- Implemented features like message display and user input processing to create a dynamic and interactive chat

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, C/C++, Java, JavaScript

Developer Tools: Git, VS Code, Visual Studio IDE, PyCharm

Libraries: NumPy, pandas, Tkinter, OpenAI API

Certifications: CodePath Certificate in Technical Interview Prep (June 2024 – Aug 2024)
