EXPERIENCE

Robert Morris University

IT Help Desk Assistant

Moon Twp, PA

Aug. 2023 – Jan. 2024

- Supported desktop hardware/software troubleshooting and maintained technical systems.
- Assisted in backend scripting and light web development using Python.
- Provided customer-focused IT support, resolving tickets related to applications, hardware, and networks.
- Helped automate internal processes and supported tech onboarding of new users.

Radical AI

Software Developer Intern

Remote

May. 2024 – July 2024

- Developed and maintained full-stack applications using JavaScript, Python, and Java.
- Used GitHub for version control and team collaboration.
- Participated in code reviews, feature development, and sprint planning in an agile environment.
- Strengthened skills in writing clean, efficient, and scalable code for production.

PROJECTS

Advanced Automobile Modeling Using Object-Oriented Programming | *Python*

- Built a class-based simulation handling vehicle movement, transmission, and fuel monitoring.

Powerball Lottery Simulation | *C++*

- Created an interactive CLI-based lottery game with random number generation and prize logic.
