Professional Summary

2+ years of experience as a Java developer specializing in backend development with expertise in Java, Spring Boot, and microservices architecture. Proven ability to design, develop, and optimize scalable enterprise applications at Capital Technologies. Skilled in building RESTful APIs, database management, and implementing best coding practices to ensure clean, efficient, and maintainable code. Strong collaborator, with cross-functional teams to deliver high-quality software solutions aligned with business goals.

Technical Skills

Programming: Java, J2EE, PL/SQL, Python, SQL, JavaScript

Frameworks and Tools: Spring Boot, Hibernate, JPA, Maven, Git, JUnit

Databases: MySQL, PostgreSQL, MongoDB, Oracle

Cloud and DevOps: Docker, Kubernetes, AWS, Jenkins, CI/CD Pipelines

Web Technologies: HTML, CSS, JavaScript, REST APIs

Work Experience

Capital Technologies

Software Engineer (Java Spring Boot)

April 2021 – May 2023

- Assisted in developing and maintaining RESTful APIs using Spring Boot for enterprise applications.
- Designed and implemented CRUD operations for microservices architecture using Spring Boot and Hibernate.
- Collaborated with senior developers to refactor existing code, improving efficiency and scalability.
- Participated in daily stand-up meetings and sprint planning as part of an Agile development team.
- Worked with MySQL and PostgreSQL, performing data modeling and query optimization.
- Assisted in debugging and optimizing Java applications to improve response times and reduce latency.
- Developed unit tests using JUnit and Mockito to ensure code reliability and maintainability.
- Engaged in version control and collaborative coding practices using Git and GitHub.
- Researched and integrated third-party APIs to extend application functionalities.
- Worked with Threads, Multithreading, Synchronization and Collection API.
- Used Spring Boot for building applications with Spring initializers and bootstrapping the build configuration and developed custom solutions.
- Designed and implemented Kafka producers and consumers designed for event-driven architecture.
- Contributing to development, testing, and deployment lifecycle and delivering high availability and performance.
- Implemented Restful Web Services to retrieve data from the client side using Micro Services architecture.

Education

Indiana Institute of Technology

Master's in Information Systems (GPA: 3.74/4)

May 2023 – Dec 2024

Jawaharlal Nehru Technological University Hyderabad(JNTUH)

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

Aug 2018 – May 2022

Leadership Skills

Team Collaboration: Actively participated in Agile ceremonies, sprint planning, and code reviews to ensure smooth project execution.

Problem-Solving: Led debugging sessions and performance-tuning discussions to enhance application efficiency.

Knowledge Sharing: Conducted technical sessions and documentation reviews to facilitate continuous learning.
