PROFESSIONAL SUMMARY

- Business Analyst with **5+ years of progressive experience** delivering business and data-driven solutions across CRM, Banking, Financial Services, E-commerce, Education, and Enterprise Applications in Agile and SDLC environments.
 - Proven expertise in **end-to-end Business Analysis lifecycle**, including requirements elicitation, analysis, documentation, validation, and implementation support across multiple enterprise projects.
 - Strong ability to translate **complex business needs into clear functional and technical requirements**, ensuring alignment between stakeholders, product owners, and development teams.
 - Extensive experience working with **cross-functional teams**, including business users, product managers, architects, developers, QA, and leadership teams to deliver scalable solutions.
 - Hands-on expertise in **Business Requirement Documents (BRD), Functional Requirement Documents (FRD), user stories, use cases, acceptance criteria, wireframes, and process flow diagrams**.
 - Highly skilled in **SQL and Advanced Excel** for data analysis, validation, reconciliation, and reporting to support operational and strategic decision-making.
 - Strong background in **KPI definition, dashboard development, and business performance reporting**, enabling leadership to monitor sales, financial, and operational metrics.
 - Demonstrated experience in **CRM systems, Sales Operations, Banking & Financial Transactions, Order Management, and Workflow Automation**.
 - Well-versed in **Agile and Scrum methodologies**, actively participating in sprint planning, backlog grooming, daily stand-ups, sprint reviews, and retrospectives.
 - Played a key role in **UAT planning, execution, defect tracking, and stakeholder sign-offs**, ensuring quality delivery and business readiness.
 - Adept at **AS-IS / TO-BE analysis**, gap analysis, and process optimization to improve efficiency, reduce manual effort, and enhance system usability.
 - Strong experience supporting **system integrations, data mapping, and reporting accuracy** across multiple platforms and databases.
 - Proven ability to **manage changing requirements**, assess impact, and ensure smooth change management across project lifecycles.
 - Excellent communication and presentation skills, capable of **conducting requirement workshops, walkthroughs, and stakeholder demos**.
 - Known for strong **analytical thinking, problem-solving ability, and attention to detail** in high-pressure environments.
 - Experienced in working with **US-based clients and stakeholders**, understanding regulatory, compliance, and enterprise-level expectations.
 - Comfortable working independently as well as in team-oriented environments with minimal supervision.
 - Passionate about continuous learning and applying best practices in Business Analysis to drive business value.
 - Seeking a **Senior / Lead Business Analyst role** to leverage analytical expertise, stakeholder management, and domain knowledge while contributing to organizational growth in the U.S. IT industry.

Master of Science in Engineering Management | University of Alabama, Birmingham, AL | Dec 2024

Bachelor of Technology in Civil Engineering | JNTUH College of Engineering Sultanpur, Sanga Reddy, India | May 2020

TECHNICAL SKILLS

Business Analysis:

Requirements Gathering, BRD, FRD, User Stories, Use Cases, Acceptance Criteria, Process Flow Diagrams, Gap Analysis, Impact Analysis, UAT Coordination, Stakeholder Management.

Data & Reporting:

SQL, Advanced Microsoft Excel (Pivot Tables, VLOOKUP, HLOOKUP), Data Validation, Data Reconciliation, KPI Tracking, Dashboards & Reports

Methodologies:

Agile, Scrum, SDLC, Waterfall (Hybrid Exposure)

Tools:

JIRA, Confluence, MS Excel, MS Word, PowerPoint

Databases:

MySQL, PostgreSQL (Basic to Intermediate Querying)

Soft Skills:

Communication, Analytical Thinking, Problem Solving, Collaboration, Documentation Excellence, Time Management

PROFESSIONAL EXPERIENCE

Synergenix Inc.

New Jersey, USA

Role: Business Analyst

Duration: Jan 2024 – Present

Project Summary: CRM & Sales Operations Optimization

This project focused on enhancing the organization's CRM platform to improve lead management, opportunity tracking, sales reporting, and overall sales operations efficiency. The initiative aimed to streamline workflows, increase sales visibility, and improve data accuracy for decision-makers by aligning CRM functionalities with business goals.

Roles & Responsibilities

- Collaborated with Sales, Operations, and Customer Success teams to gather, analyze, and document detailed business requirements for CRM enhancements.
- Conducted stakeholder interviews, workshops, and requirement walkthroughs to ensure complete understanding of business needs.
- Created comprehensive BRD, FRD, user stories, acceptance criteria, and AS-IS / TO-BE process flow diagrams. Worked closely with Product Owners to prioritize backlog items and align features with business objectives.
- Supported CRM enhancements related to lead lifecycle management, opportunity pipelines, forecasting, and reporting.
- Acted as a liaison between business users and technical teams to clarify requirements and resolve functional gaps.

- Participated in Agile ceremonies including sprint planning, backlog grooming, daily stand-ups, sprint reviews, and retrospectives.
 - Assisted QA teams with test case reviews, defect triaging, and validation of fixes.
 - Coordinated UAT activities, supported business users during testing, and obtained final sign-off.
- Contributed to improved sales visibility, increased user adoption, and enhanced reporting accuracy.
-

Fannie Mae & Freddie Mac

Virginia, USA

Role: Business Analyst

Duration: Mar 2023 – Dec 2023

Project Summary: E-Commerce Web Application & Banking Transaction Management System

This engagement involved supporting financial and transactional systems used for managing online services, payments, and banking transactions. The focus was on improving reporting accuracy, transaction monitoring, and business intelligence dashboards to support regulatory and operational decision-making.

Roles & Responsibilities

- Worked with business stakeholders to define KPIs, reporting needs, and operational metrics.
 - Gathered and documented functional requirements for transaction processing and reporting modules.
 - Used SQL to analyze transactional datasets and validate data accuracy and integrity.
 - Leveraged advanced Excel to perform data reconciliation, trend analysis, and exception reporting.
 - Supported the design and development of dashboards for management and executive reporting.
 - Conducted continuous reviews to ensure alignment between business expectations and technical implementation.
 - Collaborated with developers to clarify data logic, transformations, and reporting rules.
 - Assisted in system testing, dashboard validation, and pre-production verification.
 - Supported UAT execution and coordinated feedback from business users.
-

IDC Technologies

Role: Business Analyst

Duration: Jun 2021 – Nov 2022

Project Summary: Online Food Ordering System & Employee Leave Management System

These projects involved developing and enhancing web-based applications to manage order processing, inventory, and employee leave workflows. The goal was to automate processes, improve system efficiency, and ensure accurate reporting and integrations

Roles & Responsibilities

- Analyzed existing business processes to identify inefficiencies and improvement opportunities.
- Gathered and documented functional requirements, use cases, and business rules.
- Created process flows for order creation, tracking, fulfilment, and inventory updates.
- Prepared data mapping documents to support integrations and reporting accuracy.
- Worked closely with Agile development teams to clarify requirements during sprint cycles.
- Assisted QA teams in functional testing and defect resolution.

- Coordinated UAT execution and ensured business readiness prior to release.
 - Supported change management activities and user onboarding.
-

Cognizant

Role: Business Analyst

Duration: Sep 2020 – May 2021

Project Summary: Student Management System

This project focused on managing student data, financial transactions, reporting, and reconciliation processes for educational institutions, ensuring data accuracy and compliance.

Roles & Responsibilities

- Gathered and analyzed business requirements related to student records and financial transactions.
 - Documented detailed workflows, business rules, and exception handling scenarios.
 - Supported SQL-based data validation and reconciliation activities.
 - Assisted in financial and operational reporting enhancements.
 - Coordinated UAT activities, defect tracking, and resolution.
 - Ensured compliance, audit readiness, and improved reporting accuracy.
 - Supported production deployments and post-release validations.
-
