EDUCATION

New York Institute of Technology

B.S. in Computer Science

New York, NY

May 2025

- o **Concentrations:** Data Science and CyberSecurity
- o **GPA:** 3.5/4.00, Dean's List
- o **Related Coursework:** Data Structures & Algorithms, Operating Systems, Computer Organization & Architecture, Big Data Analytics, Security Engineering & Administration, Distributed Database Systems, Computer Networks

EXPERIENCE

Moon Supermarket and Grill

Store Associate

New York, NY

Aug 2023 – Current

- Developed an Inventory Management System that reduced operational costs by 15% and enhanced inventory tracking accuracy, improving profit monitoring for over 100+ products.
- Maintained up-to-date knowledge of store products and promotions, contributing to a 20% increase in sales
- Provided exceptional customer service, ensuring a 95% satisfaction rate through personalized and engaging experiences.

PROJECTS

Citi ICG Technology Software Development Job Simulation on Forage

November 2024

- Completed a job simulation involving hypothetical tasks to improve Citi's loan management system and stock market risk reporting
- Created a state diagram of the loan management process using the Unified Modeling Language (UML)
- Researched potential machine learning systems to assess credit risk and provided recommendations for next steps
- Used Java to build an internal tool visualizing stock market risk in real time

NBA Search Application

Jun 2024 – Aug 2024

- Developed a Python web scraper to collect, clean, and export comprehensive NBA player statistics across all seasons into CSV files for data analysis.
- Implemented RESTful API endpoints to query and retrieve specific player statistics by name and season, enhancing data accessibility and supporting career-wide stat analysis.
- Developed a React.js frontend to create an interactive user interface for searching and comparing NBA players, improving usability and engagement
- Integrated charts and visualizations using Chart.js and D3.js, allowing users to track career trends and compare key player stats side by side.

Banking System

Jun 2023 – Sep 2023

- Developed a full-stack banking application using Java + Spring Boot, enabling user registration, account creation, and secure login with Spring Security
- Implemented core banking operations including deposits, withdrawals, and fund transfers with real-time balance validation and email notifications for every transaction.
- Designed relational database schema with MySQL, managing users, accounts, and transaction history using Spring Data JPA.

Inventory Management System

Jun 2022 – July 2022

- Designed and implemented a system to track inventory and sales, reducing manual tracking time by 40%.
- Identified inefficiencies that led to a 25% reduction in redundant inventory purchases, saving \$5,000 annually
- Provided management with actionable insights across 100+ products, boosting decision-making accuracy.
- Improved operational efficiency by automating profit reporting for 50+ weekly transactions.

TECHNICAL SKILLS

Languages and Web Development: Java, Spring Boot, Python, SQL, React, HTML, CSS

Tools and Frameworks: Git, GitHub, Postman, Trello

Concepts: Object-Oriented Programming, REST APIs, Agile Methodologies, CI/CD, Unit Testing
