

MURALI KRISHNA MUPPARAJU

812 New York Avenue, Union City, NJ ◊ +1 (646)504-3643 ◊ muralimupparaju@gmail.com ◊ [linkedin.com/in/mupparaju-7b37271a9](https://www.linkedin.com/in/mupparaju-7b37271a9)

EDUCATION

Avila University, Kansas City

August 2023 – May 2025

Master of Computer Science and Management

Kalasalingam Academy of Research and Education, India

2019 – 2023

Bachelor of Science in Computer Science

Experience

CSTS Technologies Inc ◊ DevOps Engineer

March 2022 - July 2023

- **Serverless CRUD Application Development:** Built and deployed serverless CRUD application on AWS using Lambda, API Gateway, and DynamoDB, reducing operational costs by 40% and achieving 99.9% uptime through secure IAM policies and comprehensive documentation.
- **Event-Driven Architecture Implementation:** Designed event-driven system using AWS EventBridge, SNS, SQS, Kinesis, and Lambda to streamline real-time data processing, handling 10,000+ daily events and reducing processing latency by 60% with CloudWatch monitoring.
- **Scalable WordPress Solution:** Implemented high-availability WordPress infrastructure on AWS with Elastic Beanstalk, RDS Multi-AZ, EFS, and S3, supporting 50,000+ monthly users through auto-scaling groups and load balancers that dynamically adjusted to traffic demands.
- **Multi-AZ Infrastructure with CloudFormation:** Built production infrastructure using modular CloudFormation templates integrating RDS MySQL Multi-AZ, S3, Route 53, and Auto Scaling, achieving 99.99% availability and enabling zero-downtime deployments.
- **Automated AWS Provisioning:** Streamlined infrastructure provisioning for EC2, RDS, and S3 using CloudFormation integrated with CI/CD pipelines via CodePipeline, CodeCommit, and CodeBuild, reducing deployment time by 75% while ensuring secure IAM and Secrets Manager integration.
- **Kubernetes CI/CD Pipelines with GitOps:** Developed and maintained CI/CD pipelines for Kubernetes deployments using Jenkins and ArgoCD, implementing GitOps practices for managing Dockerized applications in EKS clusters and reducing deployment errors by 85%.
- **VPC Design, Connectivity and Monitoring:** Engineered secure and scalable VPCs by configuring subnets, NAT/Internet Gateways, and security groups; implemented VPC Peering and Endpoints for private S3 access; and monitored traffic with Flow Logs and CloudWatch for visibility and proactive issue resolution.
- **Production-Ready EKS Cluster with Terraform:** Created and managed EKS clusters using Terraform following Infrastructure as Code principles, securing access with IAM and automating outputs for repeatable, scalable containerized applications.
- **Cloud Security & Compliance:** Enhanced cloud environment security by applying IAM best practices, encryption, and access controls, ensuring compliance with enterprise governance standards and reducing vulnerabilities across deployments.
- **Continuous Improvement Collaboration:** Partnered with cross-functional teams to optimize DevOps workflows, driving faster feature delivery, improved system resilience, and a culture of adaptability and innovation.

Skills

Cloud Services: Azure, AWS (Lambda, API Gateway, DynamoDB, EventBridge, SNS, SQS, Kinesis, EC2, RDS, S3, EFS, Route 53, CloudFront, CloudWatch, IAM, Elastic Beanstalk, ACM)

Infrastructure as Code (IaC): Terraform, AWS CloudFormation

Automation & Configuration Management: Ansible, AWS CLI

CI/CD & GitOps: Jenkins, ArgoCD, GitHub Actions

Containerization & Orchestration: Docker, Kubernetes, Amazon EKS

Web Hosting & Content Delivery: Amazon S3, CloudFront CDN, Route 53, ACM

Monitoring & Logging: Amazon CloudWatch

Version Control: Git, GitHub, GitLab

Scripting Languages: Shell, YAML, Python
