SUMMARY

Data Analyst and AI Engineer with 4+ years of experience transforming marketing and business data into actionable insights that drive growth, retention, and customer value. Proficient in **SQL, Python, Power BI, Tableau, and predictive modeling**, with proven success in improving KPI performance (CAC, LTV, ROI) and automating reporting workflows. Adept at using **GenAI and ML tools (ChatGPT, Gemini, predictive modeling libraries)** to accelerate analysis, personalize campaigns, and guide data-driven decision-making across marketing and finance.

WORK EXPERIENCE

Data Analytics Specialist, Insight Global LLC(Client: Rollins Inc), Marietta, GA , United States Aug 2025 — Present

- Delivered **comprehensive marketing performance analysis** using SQL and Power BI to uncover channel-wise ROI gaps, leading to **15% higher lead conversion** and optimized ad spend allocation.
- Conducted **funnel analysis and LTV/CAC tracking**, enabling the marketing team to identify underperforming campaigns and refocus spend, resulting in a **\$250K improvement in annual ROI**.
- Developed predictive models in Python to assess customer churn and engagement patterns, feeding insights into **segmentation and personalization strategies** that improved retention by 12%.
- Automated reporting workflows by integrating **Power Automate and Databricks**, reducing manual dashboard refresh times by 40% while ensuring alignment with GDPR/SOX data compliance.
- Partnered with marketing, finance, and product teams to translate analytical findings into **data-driven storytelling and strategic planning insights**, adopted for annual growth forecasts.

Data Modeler, Prasquare Technologies, Atlanta, United States (Remote) Jan 2025 — Aug 2025

- Built and optimized SQL models to **analyze marketing attribution**, cross-channel performance, and campaign lift across web and CRM data, reducing query latency by 45%.
- Designed data pipelines in Python (Pandas, PyODBC) to ingest and harmonize multi-source customer data, enabling more accurate segmentation and persona analysis.
- Collaborated with analytics teams to implement **A/B testing frameworks** for marketing experiments and integrate results into visualization dashboards for leadership.
- Created standardized metadata tags and governance layers that improved data traceability and transparency for business stakeholders across multiple departments

GenAI Engineer, Techswaper Solutions, United States (Remote) Jan 2024 — Dec 2024

- Designed **GenAI-powered marketing analytics assistants** using RAG pipelines (AWS RDS, Pinecone, Hugging Face) that allowed non-technical users to query campaign data via natural language, reducing dependency on analysts by 70%.
- Leveraged **LLMs and predictive models** to generate personalized marketing recommendations and optimize media mix models, resulting in a **20% faster insight turnaround**.
- Automated end-to-end data lineage and KPI reporting using Databricks + MLflow, ensuring consistency and accuracy across digital marketing datasets.
- Deployed AI microservices with Docker and AWS Lambda for real-time insight generation, maintaining **99.9% uptime** and improved decision agility for stakeholders.

BI Analyst, Standalone IT Solutions Jan 2022 — Dec 2022

- Performed **marketing performance and conversion analysis** across campaigns, producing interactive Tableau dashboards that visualized revenue growth, churn, and acquisition metrics.
- Conducted regression and causal impact analysis to measure campaign effectiveness, enabling a **27% improvement in customer lifetime value**.
- Built data storytelling frameworks to convert complex analytical results into clear marketing narratives and presentations for executive stakeholders.
- Led collaboration between marketing, sales, and finance teams to establish shared KPIs, resulting in consistent performance measurement across departments.

Sales Data Analyst, Standalone IT Solutions Jul 2021 — Dec 2021

- Managed end-to-end analysis of **sales funnel and compensation performance**, developing Power BI dashboards with trend insights that increased sales productivity by 10%.
- Built automated Python and Excel VBA scripts for campaign and revenue reconciliation, cutting manual effort by 60% and eliminating reporting discrepancies.
- Partnered with HR and finance to deliver insights on incentive programs, improving transparency in performance-based payouts and aligning compensation with ROI outcomes.

EDUCATION

University of Central Missouri, Warrensburg, United States - <i>MS, Big Data Analytics and IT - (GPA: 3.70)</i>	Dec 2024
Jawaharlal Nehru Technological University (JNTUK), Kakinada - <i>Bachelors - (GPA: 3.5)</i>	Jul 2022

CERTIFICATIONS

AWS Certified Machine Learning – Specialty, AWS	Feb 2025
Power BI Analyst Associate, Microsoft	Sep 2024
Certified Cloud Practitioner, AWS	Sep 2024

PROJECTS

Real-Time Disaster Misinformation Tracker	
- Extracted and tagged metadata from 1,000+ Reddit threads using spaCy and BERT, enabling real-time misinformation detection. - Enabled metadata tagging for misinformation and visualization via a Streamlit dashboard.	
Healthcare Risk Analysis Dashboard	
- Trained a Random Forest model on UCI data and applied metadata tagging to datasets, improving explainability by 40%. - Integrated generative summaries for patient risk profiling using Random Forest + GenAI outputs.	
AI-Driven Customer Segmentation	
Developed a predictive segmentation model combining customer demographics, behavior data, and engagement signals using Scikit-learn and Power BI, improving personalization precision by 18%.	

SKILLS

Languages & Tools	: SQL, Python, R, Power BI, Tableau, Looker, Excel (Power Query, DAX, VBA)
AI & ML Frameworks	: ChatGPT, Gemini, Hugging Face, Scikit-learn, TensorFlow
Analytics	: A/B Testing, Regression, Cohort & Funnel Analysis, Predictive Modeling, Causal Impact
Cloud & Data Engineering	: AWS (Lambda, Glue, RDS, S3), Databricks, Airflow, Docker, Kubernetes
Data Governance	: Metadata Catalogs, Lineage Tracking, GDPR/SOX Compliance
Soft Skills	: Data Storytelling, Collaboration, Strategic Thinking, Problem Solving, Communication
