

PRATEEK MANTHRI

+1 (720) 960-9804 | prateekmmanthri@gmail.com | CO, USA | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data-driven Analyst with a strong academic foundation and hands-on experience in Python, SQL, R, Tableau, Power BI and Excel. Passionate about solving business problems through data-driven decisions and impactful storytelling.

PROFESSIONAL EXPERIENCE

Primoris Renewable Energy

Data Analyst Project Intern

Aurora District, CO, USA

March 2025 - May 2025

- Led a team of 5 in workforce analytics project to support talent management at Primoris Renewable Energy.
- Analyzed HR records covering hires, promotions, transfers, rehires, and terminations to understand employee lifecycle dynamics and identify churn risk patterns.
- Developed automated ETL workflows using AWS S3 and Glue to integrate and process HR data from over 1,500 employees, enhancing data quality across 4 key attributes: job role, department, tenure, and performance metrics.
- Built and validated predictive churn models using SageMaker with algorithms including logistic regression (85%), decision trees (88%), and LSTM (91%), improving modeling accuracy across multiple approaches.
- Applied SHAP and feature attribution methods to extract critical insights on employee attrition, uncovering 7 primary turnover factors.
- Delivered interactive Tableau dashboards and actionable insights to optimize employee retention, workforce planning, Key Performance Indicators (KPIs) and engagement strategies.
- Delivered data-backed recommendations forecasted to lower churn by 14% and drive a 12% increase in workforce operational performance.
- Actively collaborated in Agile sprints using Jira for backlog tracking, task assignment, and cross-functional coordination.

Rudi's Bakery

Data Analyst Project Intern

Boulder, CO, USA

January 2025 - February 2025

- Analyzed Rudi's Bakery's Direct Store Delivery (DSD) data to optimize sales forecasting, inventory management, and retailer collaboration.
- Built a predictive analytics framework using ensemble models (Random Forest, Extra Trees – 95% accuracy) and time series forecasting (Prophet, Exponential Smoothing) to reduce returns by 10%.
- Created a dynamic Tableau dashboard that enabled business users to explore route efficiency, promotional effectiveness, and store-level trends.
- Orchestrated data preparation and clustering (K-Means) over 100K+ transaction records to detect 7 key performance indicators influencing sales.
- Recommendations informed strategy changes that increased sales volume by 15% and improved route efficiency by 12%.
- Partnered with stakeholders to translate business requirements into KPIs and model features, supporting the dashboard and analytical framework design.

SKILLS

Languages: Python, SQL, R

Databases/Libraries: Pandas, Pytorch, Scikit-learn, Tensorflow, Numpy, Seaborn, MySQL, Maria DB, MongoDB, dplyr, tidyr, ggplot2

Cloud/Tools: AWS (EC2, S3, Glue, Lambda, Athena, SageMaker), Microsoft Excel, Excel Solver, Power BI, Tableau, Git, Apache Spark, Hadoop, Kubernetes, Google Sheets

Methodologies: Agile, scrum, SWOT analysis

Soft Skills: Critical Thinking, Problem Solving, Attention to Detail, Leadership, Team Collaboration, Time Management, Project Management, Adaptability, Active Listening

PROJECTS

AI-Powered Music Recommender System (Spotify Dataset)

Modern AI

Boulder, CO, USA

March 2025 - May 2025

- Developed a hybrid recommender system combining neural collaborative filtering and content-based filtering to generate personalized music suggestions.
- Engineered new audio features (e.g., energy-loudness, mood score) to enrich input data and improve prediction accuracy.
- Implemented deep learning models using TensorFlow and Keras; optimized using Adam and early stopping.
- Addressed cold-start problem via cosine similarity using Spotify audio features.
- Applied SHAP for model explainability; visualized results with Matplotlib and Seaborn.
- Conducted extensive data preprocessing, EDA, clustering (KMeans, UMAP), and feature engineering.

Crocs Archive Database

Structured Data Modeling

Boulder, CO, USA

October 2024 - December 2024

- Designed and implemented a normalized relational database for Crocs to centralize and standardize 20+ years of historical product, customer, and sales data
- Created an ERD and translated it into SQL schema using MySQL, integrating data from multiple sources including Amazon reviews, company archives, and web scraping
- Developed and executed complex SQL queries to extract business insights such as top-performing products, competitor pricing patterns, VIP customer behaviors, and marketing campaign effectiveness
- Utilized Tableau for data visualization to present findings, including state-level profitability, customer segmentation, and product trends
- The project improved Crocs' data accessibility enabled consistent future data entry, and supported data-driven strategic planning.

EDUCATION

University of Colorado - Boulder

Master's, of Science in Business Analytics

July 2024 - May 2025

GPA: 3.54

- Machine Learning, Modern AI, Supply Chain Analytics, Optimization Modeling, Advanced Data Analytics, Structured Data Modeling/Analysis, Unstructured and Distributed data Modeling/Analysis, Process Analytics.

Osmania University

Bachelor's, of Business Administration (Marketing)

July 2019 - October 2022

GPA: 3.6

INTERESTS AND HOBBIES

Cricket, Hiking, Travel and Explore, Listening Music, Mind games and puzzles
