Kirkland, WA, USA | 206-853-3249 | mustafasb54@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Detail-oriented Data Entry Specialist with vast experience in entering, cleaning, and maintaining large datasets in Excel, SQL, and internal databases. Experienced working with organizational and real estate-related data. Skilled at reviewing source documents, standardizing naming conventions, and validating data to support reporting and business operations. Recognized for fast, accurate data entry, clear communication, and dependable follow-through in team settings.

EXPERIENCE

Data Analyst | DreamStudio | Remote (Kirkland, WA, USA) | August 2025 – Present

- Entered, cleaned, and reconciled thousands of rows of international trade and development indicators from Google Data Commons and EXIOBASE into centralized SQL tables, improving reporting timeliness by 14%.
- Maintained data dictionaries and consistent naming conventions across sustainability datasets, feeding Power BI dashboards used for leadership reporting.
- Validated source files, investigated anomalies in Excel, and coordinated clarifications with teammates before loading data into production reports.

Business Intelligence Analyst (Capstone Project) | Costco Wholesale | Issaquah, WA, USA | January 2025 – May 2025

- Consolidated and cleaned large volumes of product-review text from multiple e-commerce platforms into a single Power BI data model, reducing manual review time by 63.2%.
- Standardized fields such as rating, sentiment, and product category using DAX, Excel, and documented business rules to improve data quality and reproducibility.
- Built dashboards that allowed business users to quickly filter, inspect, and export validated data for quality and merchandising decisions.

Data Analyst | Data Entry Specialist | DigiTurg | Bengaluru, India | November 2022 – August 2023

- Reviewed, entered, and monitored questionnaire responses in anomaly-tracking datasets, increasing QA tracking visibility by 2.5x via a Power BI dashboard.
- Standardized respondent, issue-type, and priority codes in Excel and Power BI, improving consistency of reports used by operations and product teams.

EDUCATION

Master of Science in Data Science | Seattle University | Seattle, WA, USA | September 2023 – June 2025

- Dean's Graduate Student Honor Roll – Fall 2024 and Winter 2025

Bachelors in Computer Science | Visvesvaraya Technological University | India | August 2018 – September 2022

PROJECTS

Wide-Scope Analysis of Organizational and Real Estate Data | [Link](#) – Analyzed over 14,980 rows of organizational and real estate data in Excel using VLOOKUP, SUMIFS, and pivot tables to identify data-quality issues.

Costco Inventory Management System: Relational Database | [Link](#) – Designed SQL tables and ETL flows for inventory and delivery data; optimized queries and validated joins, cutting query response time by 9.6%

SKILLS

Data Entry and Tools: Excel (VLOOKUP, SUMIFS, Pivot Tables), Power BI, Tableau, Microsoft Office Suite

Databases and Languages: SQL (MySQL), Python, R

Analytics and ML: Scikit-learn, Statsmodels, Seaborn

Other: Data quality checks, documentation, stakeholder communication, detail-oriented, punctual, reliable
