PROFILE

Data Scientist with over 5 years of experience building effective data analytics and business intelligence solutions. Skilled in creating interactive dashboards, combining data from different sources, and turning business needs into actionable insights. A strong team player with the ability to work well under pressure and a commitment to continuous learning.

WORK AUTHORIZATION

US Citizen

EMPLOYMENT HISTORY

Data Analyst at 1800Flowers.com

February 2025 — Present

- Optimized data cleansing in Snowflake, reducing processing time from 3 hours to 20 minutes.
- Built Tableau dashboard tracking 30+ KPIs to enable real-time stakeholder decisions.
- Utilized SAS for automated weekly reports and ad-hoc business analyses.

Business Data Analyst at Meta

August 2022 — January 2025

- Built and maintained Tableau dashboards using data from multiple sources to deliver actionable insights.
- Performed trend analysis on complex datasets to support data-driven decisions and identify growth opportunities.
- Translated business requirements into optimized SQL queries and in-depth analyses.
- Automated reports using SQL Server and Tableau schedules, cutting manual effort by 30%.
- Led data integrity initiatives and mentored junior analysts to uphold accuracy and best practices.

Data Analyst at Alliance Tek Solutions

January 2020 — June 2022

- Built Power BI KPI dashboards for marketing, finance, and product teams to support strategic decisions.
- Integrated Oracle and SQL Server data into unified dashboards, improving stakeholder access.
- Applied ML models (e.g., linear regression) with Python/Scikit-learn to forecast business metrics.
- Developed data security frameworks to safeguard customer and payment data.
- Implemented ETL pipelines using SSIS to enhance data warehousing.

EDUCATION

B.S, Istanbul Bilgi University

Graduated with Honors

B.S, London School of Economics and Political Science
